SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended July 31, 2021

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-38291

STITCH FIX, INC.

(Exact name of registrant as specified in its charter)

Delaware

27-5026540

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

**1 Montgomery Street, Suite 1500
San Francisco, California 94104**

(Address of principal executive offices and zip code)

(415) 882-7765

Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol	Name of Each Exchange on Which Registered
Class A common stock, par value \$0.00002 per share	SFIX	Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management’s assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of January 30, 2021, the last day of the registrant’s most recently completed second fiscal quarter, the aggregate market value of the registrant’s voting Class A common stock and Class B common stock held by non-affiliates of the registrant was approximately \$6,126,944,119 and \$87,794,779, respectively, based on a closing price of \$95.44 per share of the registrant’s Class A common stock as reported on The Nasdaq Global Market on January 29, 2021.

As of September 21, 2021, the number of outstanding shares of the registrant’s Class A common stock, par value \$0.00002 per share, was 79,309,535, and the number of outstanding shares of the registrant’s Class B common stock, par value \$0.00002 per share, was 29,422,439.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant’s definitive Proxy Statement for the 2021 Annual Meeting of Stockholders to be filed with the U.S. Securities and Exchange Commission pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K are incorporated by reference in Part III, Items 10-14 of this Annual Report on Form 10-K.

PART I
SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report contains forward-looking statements that involve risks, uncertainties, and assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. The statements contained in this Annual Report that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Forward-looking statements are often identified by the use of words such as, but not limited to, “anticipate,” “believe,” “can,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “might,” “plan,” “project,” “seek,” “should,” “target,” “will,” “would,” and similar expressions or variations intended to identify forward-looking statements. These statements are based on the beliefs and assumptions of our management, which are in turn based on information currently available to management. Such forward-looking statements are subject to risks, uncertainties, and other important factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in the section titled “Risk Factors” included under Part I, Item 1A below. Furthermore, such forward-looking statements speak only as of the date of this Annual Report. Except as required by law, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

Item 1. Business.

Overview

Stitch Fix is transforming the way people find what they love.

Stitch Fix was inspired by the vision of a client-first, client-centric new way of retail. What people buy and wear matters. When we serve our clients well, we help them discover and define their styles, we find jeans that fit and flatter their bodies, we reduce their anxiety and stress when getting ready in the morning, we give them confidence in job interviews and on first dates, and we give them time back in their lives to invest in themselves or spend with their families. Most of all, we are fortunate to play a small part in our clients looking, feeling, and ultimately being their best selves.

Stitch Fix operates in the United States and United Kingdom. Since our founding in 2011, we have helped millions of men, women, and kids discover and buy what they love through personalized shipments of apparel, shoes, and accessories. Currently, clients can engage with us in one of two ways that, combined, form an ecosystem of personalized experiences across styling, shopping, and inspiration: (1) by receiving a personalized shipment of apparel informed by our algorithms and sent by a Stitch Fix stylist (a “Fix”); or (2) by purchasing directly from our website or mobile app based on a personalized assortment of outfit and item recommendations (“Freestyle”). Clients can choose to schedule automatic shipments or order a Fix on demand after they fill out a style profile on our website or mobile app. After receiving a Fix, our clients purchase the items they want to keep and return the other items, if any. Freestyle utilizes our algorithms to recommend a personalized assortment of outfit and item recommendations that will update throughout the day and will continue to evolve as we learn more about the client.

Stitch Fix was founded with a focus on Women’s apparel. In our first few years, we were able to gain a deep understanding of our clients and merchandise and build the capability to listen to our clients, respond to feedback, and deliver the experience of personalization. We have since extended those capabilities into Men’s, Kids, Petite, Maternity, and Plus apparel, as well as shoes and accessories.

We are successful when we are able to help clients find what they love again and again, creating long-term, trusted relationships. Our clients share personal information with us, including detailed style, size, fit, and price preferences, as well as unique inputs, such as how often they dress for certain occasions or which parts of their bodies they like to flaunt or cover up. Our clients are motivated to share these personal details with us and provide us with ongoing feedback because they recognize that doing so will result in more personalized and successful experiences. This feedback also creates a valuable network effect by helping us to better serve other clients. As of July 31, 2021, we had approximately 4,165,000 active clients. See the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Key Financial and Operating Metrics” for information on how we define and calculate active clients.

The very human experience that we deliver is powered by data science. Our data science capabilities consist of our rich data set and our proprietary algorithms, which fuel our business by enhancing the client experience and driving business model efficiencies. The vast majority of our client data is provided directly and explicitly by the client, rather than inferred, scraped, or obtained from other sources. We also gather extensive merchandise data, such as inseam, pocket shape, silhouette, and fit. This large and growing data set provides the foundation for proprietary algorithms that we use throughout our business, including those that predict purchase behavior, forecast demand, optimize inventory, and enable us to design new apparel. We believe our data science capabilities give us a significant competitive advantage, and as our data set grows, our algorithms become more powerful.

With a Fix, we leverage our data science through a custom-built, web-based styling application that provides recommendations to our stylists from our broad selection of merchandise. Our stylists then send the most relevant items from our merchandise in each Fix. Our stylists provide a personal touch, offer styling advice and context to each item selected, and help us develop long-term relationships with our clients.

We offer merchandise across multiple price points and styles from established and emerging brands, as well as our own private labels, which we call Exclusive Brands. Many of our brand partners also design and supply items exclusively for our clients.

Industry Overview

Technology is Driving Transformation Across Industries

Technological innovation has profoundly impacted how consumers discover and purchase products, forcing businesses to adapt to engage effectively with consumers. We believe that new business models that embrace these changes and truly focus on the consumer will be the winners in this changing environment.

The Apparel, Shoes, and Accessories Market is Massive, but Many Retailers have Failed to Adapt to Changing Consumer Behavior

The U.S. apparel, shoes, and accessories market is large, but we believe many brick-and-mortar retailers have failed to adapt to evolving consumer preferences. Historically, brick-and-mortar retailers have been the primary source of apparel, shoes, and accessories sales in the United States. Over time, brick-and-mortar retail has changed and the era of salespersons who know each customer on a personal level has passed. We believe many of today's consumers view the traditional retail experience as impersonal, time-consuming, and inconvenient. This has led to financial difficulties, bankruptcies, and store closures for many major department stores, specialty retailers, and retail chains, and this has been further exacerbated by the COVID-19 pandemic as consumers feel less comfortable shopping at physical stores.

eCommerce is Growing, but has Further Depersonalized the Shopping Experience

The internet has created new opportunities for consumers to shop for apparel. eCommerce continues to take market share from brick-and-mortar retail. The first wave of eCommerce companies prioritized low price and fast delivery. This transaction-focused model is well suited for commoditized products and when consumers already know what they want. However, we believe eCommerce companies often fall short when consumers do not know what they want and price and delivery speed are not the primary decision drivers. There is an overwhelming selection of apparel, shoes, and accessories available to consumers online, and searches and filters are poor tools when it comes to finding items that fit one's style, figure, and occasion. eCommerce companies also lack the critical personal touchpoints necessary to help consumers find what they love, further depersonalizing the shopping experience.

Personalization is the Next Wave

To be relevant today, retailers must find a way to connect with consumers on a personal level and fit conveniently into their lifestyles. Personalization in retail can be difficult and nuanced, as consumers consider many factors that can be difficult to articulate, including style, size, fit, feel, and occasion. We believe that consumers seek personalized retail experiences, which we power through a combination of data science and human judgment.

Competition

The retail apparel industry is highly competitive. Our competitors include eCommerce companies that sell apparel, shoes, and accessories; local, national, and global department stores; specialty retailers; discount chains; independent retail stores; and the online offerings of these traditional retail competitors. Additionally, we experience competition for consumer discretionary spending from other product and experiential categories.

We compete primarily on the basis of client experience, brand, product selection, quality, convenience, and price. We believe that we are able to compete effectively because we offer clients a personalized and fun shopping experience that our competitors are unable to match. Further, as an eCommerce company without physical store locations, we believe that the COVID-19 pandemic has enhanced our competitive position in the retail industry. See Part I, Item 1A "Risk Factors—Our industry is highly competitive and if we do not compete effectively our operating results could be adversely affected" for more information.

Our Service

We help millions of clients discover and buy what they love through personalized apparel, shoes, and accessories.

Our Data Science Advantage

Our data science capabilities fuel our business. These capabilities consist of our rich and growing set of detailed client and merchandise data and our proprietary algorithms. We use data science throughout our business, including to style our clients, offer personalized direct buy options, predict purchase behavior, forecast demand, optimize inventory, and design new apparel.

Our data set is particularly powerful because:

- the vast majority of our client data is provided directly and explicitly by the client, rather than inferred, scraped, or obtained from other sources;
- our clients are motivated to provide us with relevant personal data, both at initial signup and over time as they use our service, because they trust it will improve their shopping experience; and
- our merchandise data tracks dimensions that enable us to predict purchase behavior and deliver a more personalized experience.

On average, clients that complete our style profile provide us with over 100 meaningful data points, including detailed style, size, fit, and price preferences, as well as unique inputs such as how often they dress for certain occasions or which parts of their bodies the clients like to flaunt or cover up. Over time, through their feedback on Fixes they receive and Freestyle orders, clients share additional information about their preferences as well as detailed data about both the merchandise they keep and return. Historically, over 80% of our shipments have resulted in direct client feedback. This feedback loop drives important network effects, as our client-provided data informs not only our personalization capabilities for the specific client, but also helps us better serve other clients. In addition, Style Shuffle, an interactive mobile and web-based feature in which participants rate Stitch Fix merchandise and outfits, provides additional data to strengthen our understanding of client tastes and style preferences.

We believe our proprietary merchandise data set is differentiated from other retailers. We encode each of our SKUs with numerous information attributes to help our algorithms make better recommendations for our clients. The information we store for each SKU includes:

- basic data, such as brand, size, color, pattern, silhouette, and material;
- item measurements, such as length, width, diameter of sleeve opening, and distance from collar to first button;
- nuanced descriptors, such as how appropriate the piece is for a client that prefers preppy clothing or whether it is appropriate for a formal event; and
- client feedback, such as how the item fit a 5'10" client or how popular the piece is with young mothers.

Our algorithms use our data set to match merchandise to each of our clients. For every combination of client and merchandise, we compute the probability the clients will keep that item based on their and other clients' preferences and purchase history as well as the attributes and past performance of the merchandise.

Pairing Data Science and Human Judgment

The pairing of data science and human judgment drives a better client experience and a more powerful business model. Our advanced data science capabilities harness the power of our data for our stylists and clients by generating predictive recommendations to streamline the curation process, and in the case of Freestyle, generate highly personalized items and outfit recommendations in near real-time. For clients who prefer the assistance of a stylist, these stylists add a critical layer of contextual, human decision making that augments and improves our algorithms' selections and creates the ultimate personalization experience.

Our Differentiated Value Proposition

Our Value Proposition to Clients

Our clients love our service for many reasons. We help clients find apparel, shoes, and accessories that they love in a way that is convenient and fun. We save our clients time by presenting them with a personalized shopping experience and expert styling advice they can trust, whether through Freestyle or a Fix. We believe our personalization capability removes the frustration of endlessly scrolling through hundreds of items that clients experience on other eCommerce platforms.

Clients also value the quality and diversity of our merchandise as we deliver the familiar brands they know, offer items they can't find anywhere else, and expand their fashion palette by exposing them to new brands and styles they might not have tried. We proudly serve women, men, and kids across ages, sizes, tastes, geographies, and price preferences.

Our Value Proposition to Brand Partners

We believe that we are a preferred channel and a powerful growth opportunity for our brand partners. Unlike many sales channels, we do not rely on discounts or promotions. Also, by introducing our clients to brands they may not have shopped for, we help our brand partners reach clients they may not have otherwise reached. Further, we provide our brand partners with insights based on client feedback that help our brand partners improve and evolve their merchandise to better meet consumer demand.

Our Strengths

Since we were founded in 2011, we have shipped millions of orders to our clients. We have achieved this success due to our following key strengths:

- our rich client and merchandise data;
- our expert data science team and proprietary and predictive algorithms; and
- our team of expert stylists.

Our Strategy

We aim to transform the way people find what they love. We plan to achieve this goal by continuing to:

- expand our relationships with existing clients;
- acquire new clients; and
- expand our addressable market.

How it Works

Clients can engage with us in two ways that, when combined, form an ecosystem of personalized experiences across styling, shopping, and inspiration. The first is the “Fix,” a personalized shipment of apparel informed by algorithms and sent by a Stitch Fix Stylist. The second is “Freestyle,” an online assortment of apparel, shoes, and accessories personalized to each client from which the client can purchase.

A Fix is a Stitch Fix-branded box containing a personalized assortment of apparel, shoes, and accessories informed by our algorithms and sent by Stitch Fix stylists and delivered to the clients to try on in the comfort of their own homes. They can keep some, all, or none of the items in the Fix and easily return any items in a prepaid-postage bag provided in the Fix. In each Fix, a stylist sends a client items from a broad range of merchandise recommended for the client by our algorithms. These algorithmic recommendations are based on the clients’ personal style profile, their own order behavior, the aggregate historical behavior of our client base, and the aggregate historical data we have collected on each item of merchandise we have available.

We have numerous touch points with our clients. Before clients receive their first Fix, they share the following information with us:

- *Style profile.* Upon registering, each client fills out a style profile on either our website or mobile application. The style profile allows us to introduce ourselves to a client, initiate a dialogue, and start gathering data.
- *Personal note to stylist.* Clients can share a personal note with their stylists when placing a Fix order or after receiving a Fix. For example, a client might request shoes for a friend’s wedding or shorts for an upcoming vacation. These personal notes enable us to better personalize a Fix.

After completing their initial style profiles, clients choose their preferred order frequency and can select the exact date by which they want to receive their Fix. We currently offer two types of Fix scheduling:

- *Auto-ship.* A client can elect to auto-ship Fixes every two to three weeks, monthly, bi-monthly, or quarterly.
- *On-demand.* Our on-demand option allows clients to schedule a one-time Fix at any time, either instead of or in addition to utilizing the auto-ship option. On-demand clients are prompted to schedule their next Fix each time they check out, but are not obligated to do so.

We recognize that our clients have different needs, so our Fix frequency options are another way that we personalize the client experience. Clients can increase or decrease the Fix frequency at any time, and can also easily reschedule any given shipment to better accommodate their needs. Each Fix is delivered to the client’s address of choice.

We are investing in product experiences that we believe will drive greater personalization, such as Fix Preview. Fix Preview allows clients the opportunity to view proposed items for their next Fix before it ships, giving clients a chance to provide feedback to their stylists and have more control over the items they receive.

We also offer Extras, a feature that allows clients to select items such as socks, bras, underwear, and other intimates that are then added to the items their stylist selects for their Fix.

In addition to a personalized selection of apparel, shoes, and accessories, each Fix also includes a personal note from the stylist and a style card to provide clients with outfit ideas for each item.

Once clients decide which items they wish to keep they can easily check out and pick the delivery date for their next Fix via our website or mobile application.

We charge clients a styling fee of \$20 in the United States and £10 in the United Kingdom (“UK”) for each Fix, which is credited toward the merchandise purchased. For our Style Pass clients, we charge a \$49 annual fee in the United States, the only country where Style Pass is offered, which provides unlimited styling for the year and is credited toward the merchandise purchased over the course of the year. If clients choose to keep all items chosen for them by their stylist, they receive a discount on the entire shipment, which is 25% in the United States and 20% in the UK. Clients can return the items they do not want or exchange items for a different size if available, using the prepaid-postage bag delivered in the Fix. We request that clients return items to us that they do not wish to purchase within three calendar days of receiving a Fix.

With Freestyle, a client can visit our website or mobile application and make direct purchases of apparel, shoes and accessories from a personalized set of recommended items and outfits. A client who onboards through Freestyle will complete a style quiz, which we use to build a personalized shop with curated items that will continue to evolve as we learn more about the client. For clients who have previously made purchases on our platform, our Freestyle algorithms utilize additional data points, including: a client’s style profile, past purchases, Style Shuffle responses, and our aggregate historical data with respect to clients and merchandise. Clients can engage with Freestyle through the following features:

- *Trending for You.* A client can discover and shop an array of trending looks, personalized for each client. These picks are based on their style profile, Style Shuffle responses, and trending styles.
- *Complete your Looks.* After a client has purchased at least one item from us, a client will be able to shop complete outfits that complement their Stitch Fix purchases.
- *Categories.* A client can find pieces curated by categories which are informed by their style quiz, style profile, and trending styles.
- *Buy It Again.* A client can shop new colors, prints, or sizes of any previously purchased items.

Freestyle purchases can be exchanged or returned using a prepaid-postage bag included in each shipment. No styling fee is charged for Freestyle purchases.

After clients receive their order, they are invited to provide feedback about the fit, price, style, and quality of the items. This feedback informs both our algorithms and stylists to improve each future order. We also gather feedback through Style Shuffle providing additional data to strengthen our understanding of client tastes and style preferences.

Our Merchandise, Brand Partners, and Exclusive Brands

The breadth of our merchandise selection is essential to our success. Our algorithms filter over one thousand SKUs to recommend a subset of relevant merchandise to our stylists or clients, who leverage the information to select or purchase merchandise. We source merchandise from brand partners and also create our own merchandise to serve unmet client needs. We offer apparel, shoes, and accessories across a range of price points. We currently serve our clients in the following categories: Women’s, Men’s, Kids, as well as Petite, Maternity, and Plus.

Brand Partners

We partner with established and emerging brands across multiple price points and styles. With many of our brand partners, we develop third-party branded items exclusively sold to Stitch Fix clients. This exclusivity allows our clients to discover personally recommended products that are unavailable elsewhere.

In 2020, we founded the Stitch Fix Elevate Grant & Mentorship Program (the “Elevate Program”), with the mission of helping to grow, mentor, and support apparel and accessories businesses owned by Black, Indigenous and People of Color (“BIPOC”) and are including Elevate Program grantees as new brand partners on the Stitch Fix platform.

Exclusive Brands

We also design and bring to market our own styles, which we refer to as Exclusive Brands, in order to target specific client needs that are unmet by what our merchandising team can source in the market. We use data science to identify and develop the new products for our Exclusive Brands. We then pair our data with the expertise of our design teams to bring these new products to market. We expect our product development efforts will yield better products for our clients as we acquire more data and feedback.

Exclusive Brands are a meaningful part of our business and we expect them to be a permanent part of our portfolio. However, we do not have specific targets for the merchandise mix provided by our brand partners and our Exclusive Brands, and expect it will fluctuate over time. We will continue to develop products when we identify opportunities or gaps in the market.

Sourcing

We purchase substantially all of our merchandise directly from our brand partners or Exclusive Brands merchandise vendors, who are responsible for the entire manufacturing process.

For the production of our Exclusive Brands, we contract with merchandise vendors, who are responsible for the entire manufacturing process. Some of these vendors operate their own manufacturing facilities and others subcontract the manufacturing to other parties. Our vendors generally agree to our standard vendor terms, which govern our business relationship. Although we do not have long-term agreements with our vendors, we have long-standing relationships with a diverse base of vendors that we believe to be mutually satisfactory.

All of our Exclusive Brand merchandise is produced according to our specifications, and we require that all of our vendors comply with applicable law and observe strict standards of conduct. We have hired independent firms that conduct audits of the working conditions at the factories producing our Exclusive Brands. If an audit reveals potential problems, we require that the vendor institute corrective action plans to bring the factory into compliance with our standards, or we may discontinue our relationship with the vendor. We require that all new factories producing Exclusive Brand merchandise for us be audited before Stitch Fix production begins.

Inventory Management and Fulfillment

We have seven fulfillment centers, six of which are in the United States (located in Arizona, Texas, Pennsylvania, Georgia, and Indiana), and one in the UK.

In November 2020, we entered into an agreement to lease approximately 700,000 square feet of space to be used as a fulfillment center in Salt Lake City, Utah, which will be our seventh fulfillment center in the United States. We expect this facility to begin receiving merchandise from vendors and shipping products to clients in early fiscal 2022.

In our fulfillment centers, our algorithms increase efficiencies in processes such as allocation, batch picking, transportation, shipping, returns, and ongoing process improvement. We have a reverse logistics operation to manage returned merchandise. Our specialist returns teams in our dedicated return intake areas accept, process, and reallocate returns to our inventory so the merchandise can be offered for another Fix or Freestyle order. Our expertise in inventory management allows us to turn inventory quickly, which drives working capital efficiency.

Seasonality

Seasonality in our business does not follow that of traditional retailers, such as typical high concentration of revenue in the holiday quarter. Historically, our net sales have grown throughout the fiscal year as we acquire additional active clients, though active client additions may fluctuate from period to period. We recognized 23%, 24%, 26%, and 27% of our annual net sales during the first, second, third, and fourth quarters of the fiscal year ended 2021, respectively.

Intellectual Property

We protect our intellectual property through a combination of trademarks, domain names, copyrights, trade secrets, and patents, as well as contractual provisions and restrictions on access to our proprietary technology. Our principal trademark assets include the trademarks “Stitch Fix” and “Fix,” which are registered in the United States and some foreign jurisdictions, our logos and taglines, and multiple private label apparel and accessory brand names. We have applied to register or registered many of our trademarks in the United States and other jurisdictions, and we will pursue additional trademark registrations to the extent we believe they would be beneficial and cost-effective.

We file patents in the United States and abroad and intend to pursue additional patent protection to the extent we believe it would be beneficial and cost-effective.

We are the registered holder of multiple domestic and international domain names that include “stitchfix” and similar variations. We also hold domain registrations for many of our private-label brand names and other related trade names and slogans.

Our proprietary algorithm technologies, other than those incorporated into a patent application, are protected by trade secret laws.

In addition to the protection provided by our intellectual property rights, we enter into confidentiality and proprietary rights agreements with our employees, consultants, contractors, and business partners. Our employees are also subject to invention assignment agreements. We further control the use of our proprietary technology and intellectual property through provisions in both our client terms of use on our website and in our vendor terms and conditions.

Government Regulation

As with all retailers and companies operating on the internet, we are subject to a variety of international and U.S. federal and state laws governing the processing of payments, consumer protection, the privacy of consumer information, and other laws regarding unfair and deceptive trade practices.

Apparel, shoes, and accessories sold by us are also subject to regulation by governmental agencies in the United States and in the UK. These regulations relate principally to product labeling, licensing requirements, flammability testing, and product safety. We are also subject to environmental laws, rules, and regulations. Similarly, apparel, shoes, and accessories sold by us are also subject to import regulations in the United States and other countries concerning the use of wildlife products for commercial and non-commercial trade, including the U.S. Fish and Wildlife Service. We do not estimate any significant capital expenditures for environmental control matters either in the current fiscal year or in the near future.

Human Capital

Headcount

As of July 31, 2021, we had approximately 11,260 full-time and part-time employees, including over 5,700 stylists, 4,100 fulfillment center employees, 360 engineers and data scientists, 250 client experience employees, 190 merchandising employees, and 660 general and administrative employees. As of such date, 84% of our employees, 50% of our management team, and 50% of our Board of Directors identified as female.

Employee Relations

None of our employees is represented by a labor union. We have not experienced any work stoppages due to employee disputes, and we consider our relations with our employees to be good.

We value our employees' feedback and conduct anonymous employee engagement and satisfaction surveys at least annually, with quarterly pulse surveys, which we use to determine what is important to our employees and to evolve Company practices and policies.

Pay Equity

We believe pay equity is equal pay for work of equal value. By paying employees fairly and consistently based on the role they perform, location, and according to market data, companies can ensure that employees are not paid based on factors like gender, race, or ethnicity. We know these subjective factors can play a role in compensation, to the employee's disadvantage or to their advantage, and so our compensation philosophy is rooted in pay equity as a guiding principle.

We established a system of equal pay from Stitch Fix's inception. We believe a fair and unbiased compensation structure is a critical component to drive a more inclusive culture within our own walls and beyond—and ultimately helps us attract and retain the highest caliber talent. It also means that we can sustain a system that creates less motivation for self-serving politics or individual goals, and creates intrinsic motivation to drive toward collective success and the happiness of our clients.

On an annual basis, we retain a third party to audit our pay data. While we have confidence in our approach and philosophy, we want to ensure that our compensation system withstands external review by applying appropriate and accepted methods and standards. The results have continued to show there is no statistically significant difference in pay across gender, race or any other protected classes at Stitch Fix, and that women earn \$1.00 for every \$1.00 earned by comparable men and BIPOC employees earn \$1.00 for every \$1.00 earned by comparable white employees.

We will continue to analyze these numbers each year to ensure we maintain pay equity. While we have equal pay for work of equal value, other biases can impact pay. With that in mind, we continue to be vigilant and review areas like leveling and promotions in our organization to ensure that we are working to identify and mitigate any biases in these processes.

Diversity, Equity, and Inclusion

The goal of our Diversity, Equity and Inclusion Strategy is to ensure that our people and business practices allow us to build a company, products, and experiences that reflect the richness of the communities in which we operate. We know that a diverse employee base makes Stitch Fix better, our ideas stronger, and our experience more broadly resonate with the clients we serve today, and will serve in the future. We work towards equitable practices to mitigate bias across areas like hiring and promotion, our employee experience, and our vendor and brand engagement. We invest in spaces for employees to learn and grow so that they are equipped to design and uphold equitable systems and processes.

To ensure that our ongoing Diversity, Equity and Inclusion strategy is informed by and rooted in data, we set out to more deeply understand our company demography and define clear baselines to improve upon. Our goal in this work is to drive knowledge, precision, and transparency—not only for ourselves internally, but also to contribute to the dialogue and information sharing that is critical to chartering a path forward for the broader industry.

We also have established Employee Resource Groups, which we call Stitch Fix Communities. The goal of our Stitch Fix Communities is to create spaces that drive increased inclusion and belonging for individuals from underrepresented groups who have historically been marginalized in our broader society, build on our mission of inspiring people to be their best, authentic selves, and to create opportunities for employees to share their perspectives with our leaders and connect with each other on a deeper level. Each Stitch Fix Community has two co-leads who are supported throughout the Company, recognized for their leadership, and compensated for their time with learning and development investments and annual special equity grants.

Corporate and Available Information

We were incorporated in Delaware in 2011 under the name rack habit inc. We changed our name to Stitch Fix, Inc. in October 2011. Our principal executive offices are located at 1 Montgomery Street, Suite 1500, San Francisco, California, 94104, and our telephone number is (415) 882-7765. Our website is located at www.stitchfix.com, and our investor relations website is located at <https://investors.stitchfix.com>.

We file or furnish electronically with the U.S. Securities and Exchange Commission (the “SEC”) annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act. We make copies of these reports available free of charge through our investor relations website as soon as reasonably practicable after we file or furnish them with the SEC. The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements and other information regarding Stitch Fix and other issuers that file electronically with the SEC.

Information contained on or accessible through our websites is not incorporated into, and does not form a part of, this Annual Report or any other report or document we file with the SEC, and any references to our websites are intended to be inactive textual references only.

Item 1A. Risk Factors.

RISK FACTOR SUMMARY

Our business is subject to numerous risks. The following summary highlights some of the risks you should consider with respect to our business and prospects. This summary is not complete and the risks summarized below are not the only risks we face. You should review and consider carefully the risks and uncertainties described in more detail in the “Risk Factors” below, which includes a more complete discussion of the risks summarized here.

Risks Relating to Our Business

- The COVID-19 pandemic has caused significant disruption to our operations and impacted our business, key financial and operating metrics, and results of operations in numerous ways that remain unpredictable.
- Our failure to adequately and effectively staff our fulfillment centers, through third parties or with our own employees, and other operational constraints at our fulfillment centers could adversely affect our client experience and operating results.
- If we are unable to manage our inventory effectively, our operating results could be adversely affected.
- Shipping is a critical part of our business and any changes in our shipping arrangements or any interruptions in shipping could adversely affect our operating results.
- Our business, including our costs and supply chain, is subject to risks associated with sourcing of merchandise and raw materials and manufacturing.
- We have a short operating history in an evolving industry and, as a result, our past results may not be indicative of future operating performance.
- If we fail to effectively manage our growth, our business, financial condition, and operating results could be harmed.
- Our continued growth depends on attracting new clients.
- We may be unable to maintain a high level of engagement with our clients and increase their spending with us, which could harm our business, financial condition, or operating results.
- We expect to increase our paid marketing to help grow our business, but these efforts may not be successful or cost effective.
- If we are unable to develop and introduce new merchandise offerings or expand into new markets in a timely and cost-effective manner, our business, financial condition, and operating results could be negatively impacted.
- Expansion of our operations internationally requires management attention and resources, involves additional risks, and may be unsuccessful.
- We may not be able to sustain our revenue growth rate and we may not be profitable in the future.
- Our business depends on a strong brand and we may not be able to maintain our brand and reputation.
- If we fail to attract and retain key personnel, effectively manage succession, or hire, develop, and motivate our employees, our business, financial condition, and operating results could be adversely affected.
- If we fail to effectively manage our stylists, our business, financial condition and operating results could be adversely affected.
- If we are unable to acquire new merchandise vendors or retain existing merchandise vendors, our operating results may be harmed.
- We may incur significant losses from fraud.
- We are subject to payment-related risks.

Risks Relating to our Industry, the Market, and the Economy

- We rely on consumer discretionary spending and have been, and may in the future be, adversely affected by economic downturns and other macroeconomic conditions or trends.
- Our industry is highly competitive and if we do not compete effectively our operating results could be adversely affected.
- We must successfully gauge apparel trends and changing consumer preferences.
- Our operating results have been, and could be in the future, adversely affected by natural disasters, public health crises, political crises, or other catastrophic events.

Cybersecurity, Legal and Regulatory Risks

- System interruptions that impair client access to our website or other performance failures in our technology infrastructure could damage our business.
- Compromises of our data security could cause us to incur unexpected expenses and may materially harm our reputation and operating results.
- Some of our software and systems contain open source software, which may pose particular risks to our proprietary applications.
- Adverse litigation judgments or settlements resulting from legal proceedings in which we are or may be involved could expose us to monetary damages or limit our ability to operate our business.
- Any failure by us or our vendors to comply with product safety, labor, or other laws, or our standard vendor terms and conditions, or to provide safe factory conditions for our or their workers, may damage our reputation and brand, and harm our business.
- Our use of personal information and other data subjects us to privacy laws and obligations, and our compliance with or failure to comply with such obligations could harm our business.
- Unfavorable changes or failure by us to comply with evolving internet and eCommerce regulations could substantially harm our business and operating results.
- If the use of “cookie” tracking technologies is further restricted, regulated, or blocked, or if changes in technology cause cookies to become less reliable or acceptable as a means of tracking consumer behavior, the amount or accuracy of internet user information we collect would decrease, which could harm our business and operating results.
- If we cannot successfully protect our intellectual property, our business would suffer.
- We may be accused of infringing intellectual property rights of third parties.

Risks Relating to Taxes

- Changes in U.S. tax or tariff policy regarding apparel produced in other countries could adversely affect our business.
- We could be required to collect additional sales taxes or be subject to other tax liabilities that may increase the costs our clients would have to pay for our offering and adversely affect our operating results.
- Federal income tax reform could have unforeseen effects on our financial condition and results of operations.
- We may be subject to additional tax liabilities, which could adversely affect our operating results.
- Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

Risks Relating to Ownership of Our Class A Common Stock

- The market price of our Class A common stock may continue to be volatile or may decline steeply or suddenly regardless of our operating performance and we may not be able to meet investor or analyst expectations. You may lose all or part of your investment.
- Future sales of shares by existing stockholders could cause our stock price to decline.
- The dual class structure of our common stock concentrates voting control with our executive officers, directors and their affiliates, and may depress the trading price of our Class A common stock.
- We do not currently intend to pay dividends on our Class A common stock and, consequently, your ability to achieve a return on your investment will depend on appreciation of the value of our Class A common stock.
- Delaware law and provisions in our amended and restated certificate of incorporation and amended and restated bylaws could make a merger, tender offer, or proxy contest difficult, thereby depressing the trading price of our Class A common stock.
- Our amended and restated certificate of incorporation provides that the Court of Chancery of the State of Delaware and the federal district courts of the United States are the exclusive forums for substantially all disputes between us and our stockholders, which could limit our stockholders’ ability to obtain a favorable judicial forum for disputes with us or our directors, officers, or employees.

General Risk Factors

- If we are unable to maintain effective internal control over financial reporting, investors may lose confidence in the accuracy of our reported financial information and this may lead to a decline in our stock price.
- We may require additional capital to support business growth, and this capital might not be available or may be available only by diluting existing stockholders.
- If securities or industry analysts either do not publish research about us or publish inaccurate or unfavorable research about us, our business, or our market, or if they change their recommendations regarding our common stock adversely, the trading price or trading volume of our Class A common stock could decline.
- Future securities sales and issuances could result in significant dilution to our stockholders and impair the market price of our Class A common stock.

RISK FACTORS

Investing in our Class A common stock involves a high degree of risk. You should consider and read carefully all of the risks and uncertainties described below, as well as other information included in this Annual Report on Form 10-K (this “Annual Report”), and in our other public filings. The risks described below are not the only ones facing us. The occurrence of any of the following risks or additional risks and uncertainties not presently known to us or that we currently believe to be immaterial could materially and adversely affect our business, financial condition, or results of operations. In such case, the trading price of our Class A common stock could decline, and you may lose all or part of your investment. This Annual Report also contains forward-looking statements and estimates that involve risks and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements as a result of specific factors, including the risks and uncertainties described below.

Risks Relating to Our Business

The COVID-19 pandemic has caused significant disruption to our operations and impacted our business, key financial and operating metrics, and results of operations in numerous ways that remain unpredictable.

Our business has been and may continue to be materially impacted by the effects of the ongoing COVID-19 pandemic. This pandemic and related measures taken to contain the spread of COVID-19, such as government-mandated business closures, office closures, state and local orders to “shelter in place,” and travel and transportation restrictions, have negatively affected the U.S. and global economies, disrupted global supply chains, and led to unprecedented levels of unemployment.

There continues to be uncertainty around the COVID-19 pandemic, its duration, and its impact on U.S. and global economic activity and consumer behavior. The Delta variant of COVID-19, which appears to be the most transmissible and contagious variant to date, has caused a surge in COVID-19 cases globally. The impact of the Delta variant, or other variants that may emerge, cannot be predicted at this time, and could depend on numerous factors, including the availability of vaccines in different parts of the world, vaccination rates among the population, the effectiveness of COVID-19 vaccines against the Delta variant and other variants, and the response by governmental bodies to reinstate mandated business closures, orders to “shelter in place,” and travel and transportation restrictions.

The COVID-19 pandemic and related measures have resulted in significant disruption that has negatively impacted and may continue to negatively impact our business, including our operational capacity and results of operations. While all of our fulfillment centers are currently open, we experienced temporary closures and reduced capacity in the third quarter of fiscal year 2020 as we temporarily closed three of our fulfillment centers as we responded to the pandemic. We allowed employees to opt-in to work, provided them with four weeks of flexible paid time off, and implemented additional safety protocols. These efforts resulted in significantly less capacity in our fulfillment centers during the third quarter of fiscal year 2020, which resulted in delayed Fix shipments, a significant Fix backlog, delayed inventory and return processing, extended wait times for clients, and inventory management challenges. While we have only experienced intermittent and temporary closures since the third quarter of fiscal year 2020, we have recently begun to experience an increase of COVID-19 cases in our fulfillment centers in connection with the surge of cases caused by the Delta variant. This recent increase in cases has negatively affected, and may continue to negatively affect, operations at our fulfillment centers. Additionally, we have experienced difficulty hiring employees in our fulfillment centers, which we attribute to COVID-19 concerns and to increased competition and rising wages for eCommerce fulfillment center workers as eCommerce demand accelerates. Capacity constraints in our fulfillment centers could cause delayed Fix shipments, delayed inventory and return processing, and inventory management challenges.

The COVID-19 pandemic has, at times, negatively impacted our results of operations, and the future impact and duration of this impact remain uncertain. It will depend on factors such as the length of time the pandemic continues; the efficacy and availability of the COVID-19 vaccines; the impact of the Delta variant and the duration of the surge in cases related thereto; the emergence of additional variants; how national, state and local governments continue to respond; the impact of the crisis on the economy and consumer behavior; and the effect on our clients, employees, vendors, and other partners. For example, we continue to work with our vendors to minimize inventory disruptions, but future delays and supply constraints may negatively affect our ability to obtain and manage inventory. We have experienced shipping delays to and from our customers as a result of our shipping vendors' challenges fulfilling higher eCommerce shipping demand, which has impacted our results of operations. We also have been affected by, and expect to continue to be affected by, COVID-related freight delays and difficulties sourcing materials. Additionally, we may be negatively impacted if consumers shift back to traditional brick-and-mortar apparel retailers following the pandemic.

Our corporate headquarters remains closed to the majority of employees. While we expect many employees to return to our office later this fiscal year, the expected timing of such a return has been affected by the Delta variant and related surge in Covid cases and could be further delayed by this resurgence of COVID-19 or additional resurgences. Additionally, when we return to our office, we expect many employees to continue to work in a remote capacity or a hybrid of in-person and remote work. These changes to our operations going forward present additional risks, uncertainties and costs that could affect our performance, including increased operational risk, uncertainty regarding office space needs, heightened vulnerability to cyber attacks due to increased remote work, potential reduced productivity, changes to our Company culture, potential strains to our business continuity plans, and increased costs to insure our offices are safe and functional as hybrid offices that enable effective collaboration of both remote and in-person colleagues.

The COVID-19 pandemic and resulting economic disruption has also led to significant volatility in the capital markets. And while we have taken measures to preserve our access to liquidity, our cash generated from operations has been negatively impacted and future cash flows may be impacted by the development of the pandemic.

The impact of the COVID-19 pandemic may also exacerbate other risks discussed below, any of which could have a material effect on us. Though we continue to monitor the COVID-19 pandemic closely, the situation is changing rapidly, and additional impacts may arise that we are not aware of currently. In addition, if there are future resurgences of COVID-19, including of new strains or variants, the negative impacts on our business may be exacerbated.

Our failure to adequately and effectively staff our fulfillment centers, through third parties or with our own employees, and other operational constraints at our fulfillment centers could adversely affect our client experience and operating results.

We currently receive and distribute merchandise at six fulfillment centers in the United States. We are in the process of building out another fulfillment center in the United States and we closed our South San Francisco fulfillment center in the third quarter of fiscal year 2021. We also have a fulfillment center in the UK, which is operated by a third party. During the third quarter of our 2020 fiscal year, in response to the COVID-19 pandemic, we temporarily closed three of our fulfillment centers, offered our fulfillment center employees four weeks of paid time off, and reduced the maximum number of employees in each fulfillment center in order to implement social distancing protocols. These changes resulted in operational constraints, which in turn temporarily reduced our ability to ship merchandise to clients and earn revenue during the third quarter of our 2020 fiscal year. Since the third quarter of fiscal year 2020, we have experienced smaller, intermittent interruptions in connection with temporary closures of fulfillment centers. We have recently also begun to experience an increase of COVID-19 cases in our fulfillment centers in connection with the surge of cases caused by the Delta variant, which has negatively affected and may continue to negatively affect capacity at our fulfillment centers.

Additionally, we have experienced difficulty hiring employees in our fulfillment centers, which we attribute to COVID-19 concerns and to increased competition and rising wages for eCommerce fulfillment center workers as eCommerce demand accelerates. To address this, we have increased wages in our fulfillment centers and implemented other policies in order to be more competitive in hiring employees. These wage increases impacted our operating results. We are likely to continue to have difficulty hiring employees in fulfillment centers due to increased competition and we expect to continue to increase wages for our fulfillment center employees, as necessary, which would impact our operating results. These hiring difficulties, and our closure of one fulfillment center while in the process of building out a new one which is not yet operational, have caused and may in the future cause additional capacity constraints in our fulfillment centers. Capacity constraints in our fulfillment centers could affect the amount and types of inventory we have available to offer to clients, which will affect our results of operations. Surges in COVID-19 cases among fulfillment center employees could also affect the capacity of our fulfillment centers, and therefore our operating results. Additionally, if we or our third-party partner are unable to adequately staff our fulfillment centers to meet demand, or if the cost of such staffing is higher than projected due to competition, mandated wage increases, regulatory changes, international expansion, or other factors, our operating results will be further harmed.

Severe weather events, including earthquakes, hurricanes, tornadoes, floods, fires, storms, and other adverse weather events and climate conditions could also cause operational constraints or temporarily reduce our ability to ship merchandise to clients. For instance, the severe winter weather and temperatures experienced in Texas and other parts of the country in February 2021 caused us to temporarily close two of our fulfillment centers and affected the shipping of merchandise in and out of fulfillment centers. Future weather events, which we expect to become more frequent and more severe with the increasing effects of climate change, could have a significant impact on our operations and results of operations.

In addition, operating fulfillment centers comes with potential risks, such as workplace safety issues and employment claims for the failure or alleged failure to comply with labor laws or laws respecting union organizing activities. Furthermore, if we fail to comply with wage and hour laws for our nonexempt employees, many of whom work in our fulfillment centers, we could be subject to legal risk, including claims for back wages, unpaid overtime pay, and missed meal and rest periods, which could be on a class or representative basis. Any such issues may result in delays in shipping times, reduced packing quality, or costly litigation, and our reputation and operating results may be harmed.

Finally, by using a third-party operator for one of our fulfillment centers, we also face additional risks associated with not having complete control over operations at our UK fulfillment center. Any deterioration in the financial condition or operations of that third party, or the loss of the relationship with that third party, or any event or crisis that impacts the UK generally or the specific area where our fulfillment center is located, would have a significant impact on our operations.

If we are unable to manage our inventory effectively, our operating results could be adversely affected.

To ensure timely delivery of merchandise, we generally enter into purchase contracts well in advance of a particular season and often before apparel trends are confirmed by client purchases. As a result, we are vulnerable to demand and pricing shifts and to suboptimal selection and timing of merchandise purchases. For example, in response to the initial consumer reaction to COVID-19, we cancelled many inventory orders to be prepared for what we expected would be lower client demand. Consequently, when client demand increased, our inventory was not as optimized to meet the demand as we would have liked. During the COVID-19 pandemic, we sought to rapidly shift elements of our inventory away from office attire and towards athleisure to accommodate consumer demand changes caused by the COVID-19 pandemic. Additionally, the surge in the Delta variant of COVID-19 has impacted some of our vendors, who have had delays in producing our orders. Shipping and freight delays have also been increasing as port closures, port congestion, and shipping container and ship shortages have increased over the last several months. Our inventory levels also may be affected by product launch delays, demand fluctuations, and our inability to predict demand with respect to new categories or products. In the past, we have not always predicted our clients' preferences and acceptance levels of our trend items with accuracy, which has resulted in significant inventory write offs and lower gross margins. Furthermore, we do not use the same liquidation methods as traditional retailers, such as markdowns. We rely on our merchandising team to order styles and products that our clients will purchase and we rely on our data science to inform the depth and breadth of inventory we purchase, including when to reorder items that are selling well and when to write off items that are not selling well. If our merchandise team does not predict client demand and tastes well or if our algorithms do not help us reorder the right products or write off the right products in a timely manner, we may not effectively manage our inventory and we may experience future significant inventory write-offs, which will adversely affect our operating results. Additionally, we have experienced challenges managing our inventory within the fulfillment centers given storage capacity constraints and challenges hiring fulfillment center employees. These constraints have affected, and may continue to affect, the amount and types of inventory we have available to offer to clients, which could affect our operating results.

Shipping is a critical part of our business and any changes in our shipping arrangements or any interruptions in shipping could adversely affect our operating results.

We currently rely on three major vendors for our shipping. If we are not able to negotiate acceptable pricing and other terms with these entities, shipping prices increase at unexpected levels, or our vendors experience performance problems or other difficulties, it could negatively impact our operating results and our clients experience. In addition, our ability to receive inbound inventory efficiently, ship merchandise to clients, and receive returned merchandise from clients may be negatively affected by inclement weather, fire, flood, power loss, earthquakes, public health crises such as the ongoing COVID-19 pandemic, labor disputes, acts of war or terrorism, and similar factors. Due to our business model and the fact that we recognize revenue from Fixes when a client checks out items, rather than when Fixes are shipped, we may be impacted by shipping delays to a greater extent than our competitors. Additionally, delays in shipping may cause an auto-ship client's subsequent Fixes to be scheduled for a later date, as their next Fix is not scheduled until their checkout is complete. In the second quarter of our 2021 fiscal year, we experienced carrier and client shipping delays due to the ongoing COVID-19 pandemic and the increased strain on our shipping partners during the holiday season. These delays affected our ability to recognize revenue within the quarter, and we may in the future experience these delays and the resulting impact to our financial results, including potentially during future holiday seasons. In response to the COVID-19 pandemic, we temporarily closed three of our fulfillment centers during the third quarter of our 2020 fiscal year, offered our fulfillment center employees four weeks of paid time off, implemented social distancing protocols in each fulfillment center, and periodically closed fulfillment centers for part of a work day or a full work day, all of which resulted in operational constraints, which in turn reduced our ability to ship merchandise to clients and earn revenue. With the emergence of the Delta variant and related surge in COVID-19 cases, we are experiencing an increase in the number of COVID-19 cases among fulfillment center employees, which is affecting the capacity of our fulfillment centers and is likely to continue to do so. In the past, strikes at major international shipping ports have impacted our supply of inventory from our vendors and severe weather events have resulted in long delivery delays and Fix cancellations. Some of our merchandise may be damaged or lost during transit with our shipping vendors. If a greater portion of our merchandise is not delivered in a timely fashion or is damaged or lost during transit, it could adversely affect our operating results or could cause our clients to become dissatisfied and cease using our services, which would adversely affect our business.

Our business, including our costs and supply chain, is subject to risks associated with sourcing of merchandise and raw materials and manufacturing.

We currently source nearly all of the merchandise that we offer from third-party vendors, many of whom use manufacturers in the same geographic region, and as a result we may be subject to price increases or fluctuations, tariffs, demand disruptions, increased shipping or freight costs, or shipping delays in connection with our merchandise. Our operating results would be negatively impacted by increases in the cost of our merchandise, and we have no guarantees that costs will not rise. In addition, as we expand into new categories, product types, and geographies, we expect that we may not have strong purchasing power in these new areas, which could lead to higher costs than we have historically seen in our current categories. We may not be able to pass increased costs on to clients, which could adversely affect our operating results.

The fabrics used by our vendors are made of raw materials including, but not limited to, petroleum-based products and cotton. Significant price increases or fluctuations, currency volatility or fluctuation, tariffs, shortages, increases in shipping or freight costs, or shipping delays of petroleum, cotton, or other raw materials could significantly increase our cost of goods sold or affect our operating results. The COVID-19 pandemic caused delays in some shipments from our suppliers, and as the Delta variant causes a resurgence of COVID-19, we are starting to again experience delays in some shipments from our suppliers caused by factory and port closures, port congestion, and shipping container and other shortages. Additionally, we have limited visibility into delays or control over shipping. We expect these delays to continue as long as COVID-19 continues to affect geographies around the world. We are also experiencing increased costs of goods, due to these freight challenges, increases in the price of raw materials, and currency volatility, and we expect that prices may continue to increase in the near future.

Other factors such as natural disasters have in the past increased raw material costs, impacted pricing with certain of our vendors, and caused shipping delays for certain of our merchandise. Also, the U.S. government's recent ban on cotton imported from the Xinjiang region of China, the source of a large portion of the world's cotton supply, may impact prices and the availability of cotton for our merchandise. Additionally, our products and materials (including potentially non-cotton materials) could be held for inspection by the United States Customs & Border Patrol (the "US CBP"), which would cause delays and unexpectedly affect our inventory levels. In addition, the labor costs to produce our products may fluctuate. In the event of a significant disruption in the supply of fabrics or raw materials used in the manufacture of the merchandise we offer, our vendors might not be able to locate alternative suppliers of materials of comparable quality at an acceptable price. Any delays, interruption, damage to, or increased costs in raw materials or the manufacture of the merchandise we offer could result in higher prices to acquire the merchandise, or non-delivery of merchandise altogether, and could adversely affect our operating results.

In addition, we cannot guarantee that merchandise we receive from vendors will be of sufficient quality or free from damage, or that such merchandise will not be damaged during shipping, while stored in one of our fulfillment centers, or when returned by customers. While we take measures to ensure merchandise quality and avoid damage, including evaluating vendor product samples, conducting inventory inspections, and inspecting returned product, we cannot control merchandise while it is out of our possession or prevent all damage while in our fulfillment centers. We may incur additional expenses and our reputation could be harmed if clients and potential clients believe that our merchandise is not of high quality or may be damaged.

We have a short operating history in an evolving industry and, as a result, our past results may not be indicative of future operating performance.

We have a short operating history in a rapidly evolving industry that may not develop in a manner favorable to our business. Our relatively short operating history makes it difficult to assess our future performance. You should consider our business and prospects in light of the risks and difficulties we may encounter.

Our future success will depend in large part upon our ability to, among other things:

- cost-effectively acquire new clients and engage with existing clients;
- overcome the impacts of the ongoing COVID-19 pandemic;
- adequately and effectively staff our fulfillment centers;
- manage our inventory effectively;
- increase our market share;
- increase consumer awareness of our brand and maintain our reputation;
- anticipate and respond to macroeconomic changes;
- successfully expand our offering and geographic reach;
- anticipate and respond to changing style trends and consumer preferences;
- compete effectively;
- avoid interruptions in our business from information technology downtime, cybersecurity breaches, or labor stoppages;
- effectively manage our growth;
- continue to enhance our personalization capabilities;
- hire, integrate, and retain talented people at all levels of our organization;
- maintain the quality of our technology infrastructure;
- develop new features to enhance the client experience; and
- retain our existing merchandise vendors and attract new vendors.

If we fail to address the risks and difficulties that we face, including those associated with the challenges listed above as well as those described elsewhere in this “Risk Factors” section, our business and our operating results will be adversely affected.

If we fail to effectively manage our growth, our business, financial condition, and operating results could be harmed.

To effectively manage our growth, we must continue to implement our operational plans and strategies, improve and expand our infrastructure of people and information systems, and expand, train, and manage our employee base. From inception to date, we have rapidly and significantly increased our employee headcount to support the growth of our business. We added a significant number of employees over the last several years and plan to continue to do so. To support continued growth, we must effectively integrate, develop, and motivate a large number of new employees while maintaining our corporate culture, which is made more challenging due to (i) the COVID-19 pandemic, which has required us to transition to a more remote working environment, and (ii) our expected future hybrid environment of in-person and remote work. The risks associated with a rapidly growing workforce will be particularly acute as we expand internationally, as we are less familiar with the labor markets outside of the United States, and if we choose to expand into new merchandise categories.

We are also required to manage numerous relationships with various vendors and other third parties. Further growth of our operations, vendor base, fulfillment centers, information technology systems, or internal controls and procedures may not be adequate to support our operations. For example, in May 2019, we launched our service in the UK, which involves working with international vendors, establishing offices and fulfillment centers in the UK, and complying with UK and European Union (“EU”) laws and regulations. Additionally, we continue to introduce new offerings such as, Freestyle and Fix Preview, as well as new business initiatives and inventory models. The roll-out of these new offerings and initiatives require investments of time and resources and may require changes in our website, mobile apps, information technology systems or processes, which involves inherent risk. These initiatives and changes also may not be rolled out as timely or effectively as we expect or may not produce the results we intend. If new offerings and initiatives are delayed, it could affect our inventory levels. If we are unable to manage the growth of our organization effectively, or if growth initiatives are not introduced timely or do not produce the anticipated results, our business, financial condition, and operating results may be adversely affected.

Our continued growth depends on attracting new clients.

Our success depends on our ability to attract new clients in a cost-effective manner. To expand our client base, we must appeal to and acquire clients who have historically used other means to purchase apparel, shoes, and accessories, such as traditional brick-and-mortar apparel retailers or the websites of our competitors. We also face competition for clients from other retailers who offer or plan to offer similar services as ours. We reach new clients through paid marketing, referral programs, organic word of mouth, and other methods of discovery, such as mentions in the press or internet search engine results. Although we have reduced our marketing spend at times, we expect to continue to increase our marketing spend, which may include increased spending on digital, television, radio and other paid marketing channels, and cannot be certain that these efforts will yield more clients, continue to achieve meaningful payback on our investments, or be as cost effective. Our marketing activity and spend may vary from period to period and we may adjust our marketing strategy or spend within a period if we are not achieving the intended results or if we believe the return-on-investment is not favorable, which may result in faster or slower rates of active client growth in any given period. For instance, while we expected to spend a certain amount on marketing in the second quarter of fiscal year 2021, we experienced higher costs per acquisition than expected and, therefore, did not spend as much on marketing as anticipated. Also in the fourth quarter of fiscal year 2021, we did not spend as much on marketing as anticipated as we waited to launch Freestyle to new-to-Stitch Fix customers. Consequently, now that we have launched Freestyle in the first quarter of fiscal year 2022, we expect to increase marketing spend as we market this new offering. In addition, we seek to attract new clients by offering new products, services, and ways to engage with our platform, such as our Freestyle offering. If such new products or services are not timely launched or are not successful in attracting new clients, our revenue growth and results of operations may suffer. Moreover, new clients may not purchase from us as frequently or spend as much with us as existing clients, and the revenue generated from new clients may not be as high as the revenue generated from our existing clients. These factors may harm our growth prospects and our business could be adversely affected.

We may be unable to maintain a high level of engagement with our clients and increase their spending with us, which could harm our business, financial condition, or operating results.

A high proportion of our revenue comes from repeat purchases by existing clients, especially those existing clients who are highly engaged and purchase a significant amount of merchandise from us. The large majority of our clients choose to receive Fixes on a recurring basis, which we call “auto-ship.” In the third quarter of fiscal year 2020, we saw a temporary increase in the rate of auto-ship cancellations. If the ongoing COVID-19 pandemic and related economic impact worsen or continue for longer than anticipated, auto-ship cancellations may increase again, negatively impacting our business.

If existing clients no longer find our service and merchandise appealing or appropriately priced, they may make fewer purchases and may stop using our service. Even if our existing clients continue to find our service and merchandise appealing, they may decide to receive fewer Fixes or purchase fewer items from their Fixes or through Freestyle over time as their demand for new apparel declines. For example, as a result of changes to daily life due to the ongoing COVID-19 pandemic, including increased rates of working remotely from home, many clients' demand for new apparel may be reduced or eliminated. In addition, as we expand our assortment to include more products with lower price points, the amount clients spend with us may decrease. If clients who receive Fixes most frequently or purchase a significant amount of merchandise from us were to make fewer or lower priced purchases or stop using our service, our financial results could be negatively affected. In addition, we seek to attract high-quality clients who will remain clients for the long term, but our efforts may not be successful or produce the results we anticipate. A decrease in the number of clients, a decrease in client spending on the merchandise we offer, or our inability to attract high-quality clients could negatively affect our operating results. Further, we believe that our future success will depend in part on our ability to increase sales to our existing clients over time and, if we are unable to do so, our business may suffer.

We expect to increase our paid marketing to help grow our business, but these efforts may not be successful or cost effective.

Promoting awareness of our service is important to our ability to grow our business, drive client engagement, and attract new clients. We believe that much of the growth in our client base during our first five years originated from referrals, organic word of mouth, and other methods of discovery, as our marketing efforts and expenditures were relatively limited. In recent years, we increased our paid marketing initiatives and intend to continue to do so. Our marketing efforts currently include client referrals, affiliate programs, partnerships, display advertising, television, print, radio, video, content, direct mail, social media, email, mobile "push" communications, search engine optimization, and keyword search campaigns. External factors beyond our control, including general economic conditions and decreased discretionary consumer spending, may impact the success of our marketing initiatives or how much we decide to spend on marketing in a given period. For example, in response to the ongoing COVID-19 pandemic, we reduced our marketing expenditures in the third quarter of our fiscal year 2020. This led to fewer new clients being acquired in the third quarter, which we anticipate may impact demand for several subsequent quarters.

Our marketing initiatives may become increasingly expensive and generating a meaningful return on those initiatives may be difficult, such as the increased costs we have seen in certain digital marketing channels. We may also adjust our marketing activity from period to period or within a period as we launch new initiatives or offerings, such as Freestyle, run tests, or make decisions on marketing investments in response to anticipated rates of return, such as when we identify favorable cost per acquisition trends. For example, although we have historically reduced our advertising during the holiday season, when many other retailers compete for marketing opportunities, we had planned for more robust advertising during our second fiscal quarter of fiscal year 2021. However, as we experienced higher costs per acquisition than we expected, we did not spend as much on marketing during the quarter as we anticipated. And in the fourth quarter 2021, we did not spend as much on marketing as anticipated as we waited to launch Freestyle to new-to-Stitch Fix customers, and expect to increase marketing spend in the first quarter of fiscal year 2022 as we market this new offering. Even if we successfully increase revenue as a result of our paid marketing efforts, it may not offset the additional marketing expenses we incur.

We currently obtain a significant number of visits to our websites via organic search engine results. Search engines frequently change the algorithms that determine the ranking and display of results of a user's search, which could reduce the number of organic visits to our websites, in turn reducing new client acquisition and adversely affecting our operating results.

Social networks are important as a source of new clients and as a means by which to connect with current clients, and their importance may be increasing. We may be unable to effectively maintain a presence within these networks, which could lead to lower than anticipated brand affinity and awareness, and in turn could adversely affect our operating results.

Further, mobile operating system and web browser providers, such as Apple and Google, have announced or recently implemented product changes to limit the ability of advertisers to collect and use data to target and measure advertising. For example, Apple recently made a change to iOS 14 to require apps to get a user's opt-in permission before tracking or sharing the user's data across apps or websites owned by companies other than the app's owner. Google intends to further restrict the use of third-party cookies in its Chrome browser in 2022, consistent with similar actions taken by the owners of other browsers, such as Apple in its Safari browser, and Mozilla in its Firefox browser. These changes are expected to reduce our ability to efficiently target and measure advertising, in particular through online social networks, making our advertising less cost effective and successful.

With respect to our email marketing efforts, if we are unable to successfully deliver emails to our clients or if clients do not engage with our emails, whether out of choice, because those emails are marked as low priority or spam, or for other reasons, our business could be adversely affected.

If we are unable to develop and introduce new merchandise offerings or expand into new markets in a timely and cost-effective manner, our business, financial condition, and operating results could be negatively impacted.

The largest portion of our revenue today comes from the sale of Women's apparel. From 2015 to 2018, we expanded our merchandise offering into categories including Petite, Maternity, Men's, Plus, Premium Brands, and Kids; began offering different product types including accessories and Extras; and expanded the number of brands we offer. In May 2019, we launched our service in the UK market. In June 2019, we introduced our direct-buy functionality (now called "Freestyle") with Buy It Again allowing clients in the United States to buy previously purchased items in new colors, prints, and sizes. We expanded direct buy in February 2020, with Complete Your Looks, which allows clients to discover and shop personalized outfits with new items that complement their prior purchases. In addition, in early June 2020, we introduced Trending For You, which allows clients to shop personalized looks based on their style profiles. In May 2021, we introduced Categories, a new way for clients to easily discover pieces within a range of categories based on occasion, brand, or item type. And, in August 2021, we opened up Freestyle to new-to-Stitch Fix clients who have never received a Fix from us previously. We continue to explore additional offerings to serve our existing clients, attract new clients, and expand our geographic scope. Developing new offerings requires significant investments of resources and time, and if a new offering, such as Freestyle, does not appeal to new clients as we expect, our business may not grow as anticipated.

New offerings may not have the same success, or gain traction as quickly, as our current offerings. If the merchandise we offer is not accepted by our clients or does not attract new clients, or if we are not able to attract clients in new markets, our sales may fall short of expectations, our brand and reputation could be adversely affected, and we may incur expenses that are not offset by sales. If the launch of a new category or offering or in a new geography requires investments greater than we expect or is delayed, our operating results could be negatively impacted. Also, our business may be adversely affected if we are unable to attract brands and other merchandise vendors that produce sufficient high-quality, appropriately priced, and on-trend merchandise. For example, vendors in the UK may not be familiar with our company or brand, which may make it difficult for us to obtain the merchandise we seek or be able to purchase products at an appropriate price.

Our current merchandise offerings have a range of margin profiles and we believe new offerings will also have a broad range of margin profiles that will affect our operating results. New businesses generally contribute lower margins and imported merchandise may be subject to tariffs or duties that lower margins. Additionally, as we enter into new categories and markets, we may not have as high purchasing power as we do in our current offerings, which could increase our costs of goods sold and further reduce our margins. Expansion of our merchandise offerings and geographic scope may also strain our management and operational resources, specifically the need to hire and manage additional merchandise buyers to source new merchandise and to allocate new categories across our distribution network. We may also face greater competition in specific categories or regions from companies that are more focused on these areas. For example, now that we have launched in the UK, we compete with existing businesses that have been providing similar services in the region and may be more familiar with trends and customer preferences in that market. Also, our entry into the Kids category means we now compete with a number of additional companies that have been in the Kids category for a longer period of time and may have more experience in children's clothing. If any of the above were to occur, it could damage our reputation, limit our growth, and have an adverse effect on our operating results.

Expansion of our operations internationally requires management attention and resources, involves additional risks, and may be unsuccessful.

In May 2019, we launched our service in the UK market, and we may choose to expand to other international markets in the future. Prior to launching in the UK, we had no experience operating internationally or selling our merchandise outside of the United States, and if we continue to expand internationally, we will need to adapt to different local cultures, standards, laws, and policies. The business model we employ may not appeal as strongly to consumers in international markets. Furthermore, to succeed with clients in international locations, such as the UK, we will need to locate fulfillment centers in foreign markets and hire local employees, and we will have to invest in these facilities and employees before proving we can successfully run foreign operations. We may not be successful in expanding into additional international markets or in generating revenue from foreign operations for a variety of reasons, including:

- the need to localize our merchandise offerings, including translation into foreign languages and adaptation for local practices;
- different consumer demand dynamics, which may make our model and the merchandise we offer less successful compared to the United States;
- competition from local incumbents that understand the local market and may operate more effectively;
- regulatory requirements, taxes, trade laws, trade sanctions and economic embargoes, tariffs, export quotas, custom duties, or other trade restrictions, or any unexpected changes thereto such as Brexit (as defined below);
- differing laws and regulations, including with respect to anti-bribery and anti-corruption compliance;
- differing labor regulations where labor laws may be more advantageous to employees as compared to the United States and result in increased labor costs;

- more stringent or differing regulations relating to privacy and data security and access to, or use of, commercial and personal information, particularly in Europe;
- differing payment requirements and customer behavior relating to payments and fraud;
- changes in a specific country's or region's political, economic, and public health conditions; and
- risks resulting from changes in currency exchange rates.

For example, clients in the UK are accustomed to more return shipping options than are typically offered in the United States, which required us to increase the number of shipping vendors we use in that market, increasing our costs. If we continue to invest substantial time and resources to establish and expand our operations internationally and are unable to do so successfully and in a timely manner, our operating results would suffer.

We may not be able to sustain our revenue growth rate and we may not be profitable in the future.

Our past revenue growth and profitability should not be considered indicative of our future performance. Our revenue increased by 22.8% in fiscal 2021 compared to 2020, 8.5% in fiscal 2020 compared to fiscal 2019, and 28.6% in fiscal 2019 compared to fiscal 2018. As we grow our business, our revenue growth rates may slow in future periods or decline due to a number of reasons, which may include the short- and long-term impacts of the COVID-19 pandemic, slowing demand for our merchandise and service, increasing competition, a decrease in the growth rate of our overall market, and our failure to capitalize on growth opportunities, as well as the maturation of our business.

Moreover, our expenses have increased in recent periods, and we expect expenses to increase substantially in the near term, particularly as we make significant investments in our marketing initiatives; expand our geographic markets, operations, and infrastructure; develop and introduce new merchandise offerings; and hire additional personnel. We may not always pursue short-term profits but are often focused on long-term growth, which may impact our financial results. If our revenue does not increase to offset increases in our operating expenses, we may not be profitable in future periods.

Our business depends on a strong brand and we may not be able to maintain our brand and reputation.

We believe that maintaining the Stitch Fix brand and reputation is critical to driving client engagement and attracting clients and merchandise vendors. Building our brand will depend largely on our ability to continue to provide our clients with an engaging and personalized client experience, including valued personal styling services, high-quality merchandise, and appropriate price points, which we may not do successfully. Client complaints or negative publicity about our styling services, merchandise, delivery times, or client support, especially on social media platforms, could harm our reputation and diminish client use of our services, the trust that our clients place in Stitch Fix, and vendor confidence in us.

Our brand depends in part on effective client support, which requires significant personnel expense. Failure to manage or train our client support representatives properly or inability to handle client complaints effectively could negatively affect our brand, reputation, and operating results.

If we fail to cost-effectively promote and maintain the Stitch Fix brand, our business, financial condition, and operating results may be adversely affected.

If we fail to attract and retain key personnel, effectively manage succession, or hire, develop, and motivate our employees, our business, financial condition, and operating results could be adversely affected.

Our success, including our ability to anticipate and effectively respond to changing style trends and deliver a personalized styling experience, depends in part on our ability to attract and retain key personnel on our executive team and in our merchandising, algorithms, engineering, marketing, styling, and other organizations.

We do not have long-term employment or non-competition agreements with any of our personnel. Senior employees have left Stitch Fix in the past and others may in the future, which we cannot necessarily anticipate and whom we may not be able to promptly replace. For example, after our former Chief Financial Officer left in December 2019, we conducted a search for a candidate to replace him that did not conclude until we announced the hiring of Dan Jedda as our Chief Financial Officer in December 2020. Additionally, our former President, Chief Operating Officer and Interim Chief Financial Officer, Mike Smith, resigned as an employee of the Company in January 2021. The loss of one or more of our key personnel or the inability to promptly identify a suitable successor to a key role could have an adverse effect on our business. We do not currently maintain key-person life insurance policies on any member of our senior management team or other key employees.

Elizabeth Spaulding was named to the role of Chief Executive Officer on August 1, 2021, and Katrina Lake, our Founder, transitioned to the role of Executive Chairperson of the Board on August 1, 2021. Currently, Ms. Lake remains an employee of ours. Ms. Lake has unique and valuable experience leading our company from its inception through August 1, 2021. If we do not continue to manage the transition of Ms. Lake to her new role and Ms. Spaulding's succession to Chief Executive Officer successfully, it could disrupt our business, affect our Company culture, or cause retention concerns with respect to our colleagues, all of which could affect our financial condition and operating results.

We also face significant competition for personnel, particularly in the San Francisco Bay Area where our headquarters are located. To attract top talent, we have had to offer, and believe we will need to continue to offer, competitive compensation and benefits packages before we can validate the productivity of those employees. Recently, we also have had difficulty hiring employees in fulfillment centers due to increased competition for distribution workers and rising wages. We have increased, and expect to continue to increase, our employee compensation levels in response to competition, as necessary. We cannot be sure that we will be able to attract, retain, and motivate a sufficient number of qualified personnel in the future, or that the compensation costs of doing so will not adversely affect our operating results. Additionally, we may not be able to hire new employees quickly enough to meet our needs. If we fail to effectively manage our hiring needs or successfully integrate new hires, our efficiency, ability to meet forecasts, and employee morale, productivity, and retention could suffer, which may have an adverse effect on our business, financial condition, and operating results.

If we fail to effectively manage our stylists, our business, financial condition and operating results could be adversely affected.

As of July 31, 2021, approximately 5,700 of our employees were stylists, most of whom work remotely and on a part-time basis for us and are paid hourly. The stylists track and report the time they spend working for us. These employees are classified as nonexempt under federal and state law. If we fail to effectively manage our stylists, including by ensuring accurate tracking and reporting of their hours worked and proper processing of their hourly wages, then we may face claims alleging violations of wage and hour employment laws, including, without limitation, claims of back wages, unpaid overtime pay, and missed meal and rest periods. Any such employee litigation could be attempted on a class or representative basis. For example, in August 2020, a representative action under California's Private Attorneys General Act was filed against us alleging various violations of California's wage and hour laws relating to our current and former non-exempt stylist employees. While we were able to settle this matter, future litigation concerning our styling employees could be expensive and time-consuming regardless of whether the claims against us are valid or whether we are ultimately determined to be liable, and could divert management's attention from our business. We could also be adversely affected by negative publicity, litigation costs resulting from the defense of these claims, and the diversion of time and resources from our operations.

In August 2021, we introduced changes to work schedules for our stylists to better align with when and how clients will most likely want to connect with their stylist. We anticipated that many of our stylists would find the new schedule challenging and may not want to continue their employment, so we offered a voluntary exit package to help ease job transitions. As expected, some stylists did accept this offer, which decreased our total number of stylists. We may experience some capacity constraints, morale issues or other unintended effects that could negatively affect our operations as we transition to these new scheduling practices.

If we are unable to acquire new merchandise vendors or retain existing merchandise vendors, our operating results may be harmed.

We offer merchandise from hundreds of established and emerging brands. In order to continue to attract and retain quality merchandise brands, we must help merchandise vendors increase their sales and offer them a high-quality, cost-effective fulfillment process.

If we do not continue to acquire new merchandise vendors or retain our existing merchandise vendors on acceptable commercial terms, we may not be able to maintain a broad selection of products for our clients, and our operating results may suffer.

In addition, our Exclusive Brands are sourced from third-party vendors and contract manufacturers. The loss of one of our Exclusive Brand vendors for any reason, or our inability to source any additional vendors needed for our Exclusive Brands, could require us to source Exclusive Brand merchandise from another vendor or manufacturer, which could cause inventory delays, impact our clients' experiences, and otherwise harm our operating results.

We may incur significant losses from fraud.

We have in the past incurred and may in the future incur losses from various types of fraud, including stolen credit card numbers, claims that a client did not authorize a purchase, merchant fraud, and clients who have closed bank accounts or have insufficient funds in open bank accounts to satisfy payments. Our clients may re-use their login information (i.e., username and password combination) across multiple websites and, therefore, when a third-party website experiences a data breach, that information could be exposed to bad actors and be used to fraudulently access our clients' accounts. In addition to the direct costs of such losses, if the fraud is related to credit card transactions and becomes excessive, it could result in us paying higher fees or losing the right to accept credit cards for payment. In addition, under current credit card practices, we are typically liable for fraudulent credit card transactions. Our failure to adequately prevent fraudulent transactions could damage our reputation, result in litigation or regulatory action, and lead to expenses that could substantially impact our operating results.

We are subject to payment-related risks.

We accept payments online via credit and debit cards and online payment systems such as PayPal, which subjects us to certain regulations and fraud. We may in the future offer new payment options to clients that would be subject to additional regulations and risks. We pay interchange and other fees in connection with credit card payments, which may increase over time and adversely affect our operating results. While we use a third party to process payments, we are subject to payment card association operating rules and certification requirements, including the Payment Card Industry Data Security Standard and rules governing electronic funds transfers. If we fail to comply with applicable rules and regulations, we may be subject to fines or higher transaction fees and may lose our ability to accept online payments or other payment card transactions. If any of these events were to occur, our business, financial condition, and operating results could be adversely affected.

Risks Relating to our Industry, the Market, and the Economy

We rely on consumer discretionary spending and have been, and may in the future be, adversely affected by economic downturns and other macroeconomic conditions or trends.

Our business and operating results are subject to global economic conditions and their impact on consumer discretionary spending. Some of the factors that may negatively influence consumer spending include high levels of unemployment; higher consumer debt levels; reductions in net worth, declines in asset values, and related market uncertainty; home foreclosures and reductions in home values; fluctuating interest rates, increased inflationary pressures and credit availability; fluctuating fuel and other energy costs; fluctuating commodity prices; and general uncertainty regarding the overall future political and economic environment. We have experienced many of these factors due to the ongoing COVID-19 pandemic and the related responses of national, state and local government and public health officials and have, at times, seen negative impacts on client demand as a result. Furthermore, any increases in consumer discretionary spending during times of crisis may be temporary, such as those related to government stimulus programs. Economic conditions in certain regions may also be affected by natural disasters, such as hurricanes, tropical storms, earthquakes, and wildfires; other public health crises; and other major unforeseen events. Consumer purchases of discretionary items, including the merchandise that we offer, generally decline during recessionary periods or periods of economic uncertainty, when disposable income is reduced or when there is a reduction in consumer confidence.

Adverse economic changes could reduce consumer confidence, and could thereby negatively affect our operating results. In challenging and uncertain economic environments, we cannot predict when macroeconomic uncertainty may arise, whether or when such circumstances may improve or worsen or what impact such circumstances could have on our business.

Our industry is highly competitive and if we do not compete effectively our operating results could be adversely affected.

The retail apparel industry is highly competitive. We compete with eCommerce companies that market the same or similar merchandise and services that we offer; local, national, and global department stores; specialty retailers; discount chains; independent retail stores; and the online offerings of these traditional retail competitors. Additionally, we experience competition for consumer discretionary spending from other product and experiential categories. We believe our ability to compete depends on many factors within and beyond our control, including:

- effectively differentiating our service and value proposition from those of our competitors;
- attracting new clients and engaging with existing clients;
- our direct relationships with our clients and their willingness to share personal information with us;
- further developing our data science capabilities;
- maintaining favorable brand recognition and effectively marketing our services to clients;
- delivering merchandise that each client perceives as personalized to him or her;
- the amount, diversity, and quality of brands and merchandise that we or our competitors offer;
- our ability to expand and maintain appealing Exclusive Brands and exclusive-to-Stitch Fix merchandise;
- the price at which we are able to offer our merchandise;
- the speed and cost at which we can deliver merchandise to our clients and the ease with which they can use our services to return merchandise; and
- anticipating and quickly responding to changing apparel trends and consumer shopping preferences.

Many of our current competitors have, and potential competitors may have, longer operating histories; larger fulfillment infrastructures; greater technical capabilities; faster shipping times; lower-cost shipping; larger databases; more purchasing power; higher profiles; greater financial, marketing, institutional, and other resources; and larger customer bases than we do. Mergers and acquisitions by these companies may lead to even larger competitors with more resources. These factors may allow our competitors to derive greater revenue and profits from their existing customer bases; acquire customers at lower costs; or respond more quickly than we can to new or emerging technologies, changes in apparel trends and consumer shopping behavior, and changes in supply conditions. These competitors may engage in more extensive research and development efforts, enter or expand their presence in the personalized retail market, undertake more far-reaching marketing campaigns, and adopt more aggressive pricing policies, which may allow them to build larger customer bases or generate revenue from their existing customer bases more effectively than we do. If we fail to execute on any of the above better than our competitors, our operating results may be adversely affected.

We must successfully gauge apparel trends and changing consumer preferences.

Our success is, in large part, dependent upon our ability to identify apparel trends, predict and gauge the tastes of our clients, and provide a service that satisfies client demand in a timely manner. However, lead times for many of our purchasing decisions may make it difficult for us to respond rapidly to new or changing apparel trends or client acceptance of merchandise chosen by our merchandising buyers. In addition, external events may disrupt or change client preferences and behaviors in ways we are not able to anticipate. For example, the COVID-19 pandemic has resulted in significant changes to daily life, working arrangements, travel, and social events, which has impacted the type of apparel our clients seek to purchase. We generally enter into purchase contracts significantly in advance of anticipated sales and frequently before apparel trends are confirmed by client purchases. In the past, we have not always predicted our clients' preferences and acceptance levels of our merchandise with accuracy. Further, we use our data science to predict our clients' preferences and gauge demand for our merchandise, and there is no guarantee that our data science and algorithms will accurately anticipate client demand and tastes. Our entry into the UK also requires us to become familiar with different apparel trends and customer preferences. In addition, consumer shopping behavior may continue to evolve and we may need to adapt our service to such changes, which could be further complicated by any future expansion into additional geographic markets. To the extent we misjudge the market for the service we offer or fail to execute on trends and deliver attractive merchandise to clients, our sales will decline and our operating results will be adversely affected.

Our operating results have been, and could be in the future, adversely affected by natural disasters, public health crises, political crises, or other catastrophic events.

Natural disasters, such as earthquakes, hurricanes, tornadoes, floods, fires, and other adverse weather events and climate conditions, which may become more frequent and more severe with the increasing effects of climate change; unforeseen public health crises, such as the ongoing COVID-19 pandemic or other pandemics and epidemics; political crises, such as terrorist attacks, war, and other political instability; or other catastrophic events, whether occurring in the United States or internationally, could disrupt our operations in or cause us to close one or more of our offices and fulfillment centers or could disrupt, delay, or otherwise negatively impact the operations of one or more of our third-party providers or vendors. For instance, the severe winter weather and temperatures experienced in Texas and other parts of the country in February 2021 caused us to temporarily close two of our fulfillment centers and affected the shipping of merchandise in and out of fulfillment centers. Furthermore, these types of events could impact our merchandise supply chain, including our ability to ship merchandise to or receive returned merchandise from clients in the impacted region, and could impact our ability or the ability of third parties to operate our sites and ship merchandise. In addition, these types of events could negatively impact consumer spending in the impacted regions. In fact, the COVID-19 pandemic has: disrupted our operations in and caused us to close our offices and require that most of our employees work from home; disrupted our operations in and caused us to close three of our fulfillment centers; required us to implement various operational changes to ensure the health and safety of our employees; had a range of negative effects on the operations of our third-party providers and vendors, including our merchandise supply chain and shipping partners; and negatively impacted consumer spending and the economy generally. Because the COVID-19 pandemic has caused many of these factors to materialize, as described above and throughout these risk factors, it has adversely affected our business and operating results. The ongoing COVID-19 pandemic (including future resurgences of COVID-19 or new variants in the United States or internationally) or the occurrence of another natural disaster or crisis could recreate and/or exacerbate these effects.

Cybersecurity, Legal and Regulatory Risks

System interruptions that impair client access to our website or other performance failures in our technology infrastructure could damage our business.

The satisfactory performance, reliability, and availability of our website, mobile application, internal applications, and technology infrastructure are critical to our business. We rely on our website and mobile application to engage with our clients and sell them merchandise. We also rely on a host of internal custom-built applications to run critical business functions, such as styling, merchandise purchasing, warehouse operations, and order fulfillment. In addition, we rely on a variety of third-party, cloud-based solution vendors for key elements of our technology infrastructure. These systems are vulnerable to damage or interruption and we have experienced interruptions in the past. For example, in February 2017, as a result of an outage with Amazon Web Services, where much of our technology infrastructure is hosted, we experienced disruptions in applications that support our warehouse operations and order fulfillment that caused a temporary slowdown in the number of Fix shipments we were able to make. Additionally, the launch of a new category or new product offering requires investments in and the development of new technology, which may be more susceptible to performance issues or interruptions. Interruptions may also be caused by a variety of incidents, including human error, our failure to update or improve our proprietary systems, cyber attacks, fire, flood, earthquake, power loss, or telecommunications failures. These risks are exacerbated by our move to a more remote workforce in response to the COVID-19 pandemic. Any failure or interruption of our website, mobile application, internal business applications, or our technology infrastructure could harm our ability to serve our clients, which would adversely affect our business and operating results.

Compromises of our data security could cause us to incur unexpected expenses and may materially harm our reputation and operating results.

In the ordinary course of our business, we and our vendors collect, process, and store certain personal information and other data relating to individuals, such as our clients and employees, which may include client payment card information. We rely substantially on commercially available systems, software, tools, and monitoring to provide security for our processing, transmission, and storage of personal information and other confidential information. There can be no assurance, however, that we or our vendors will not suffer a data compromise, that hackers or other unauthorized parties will not gain access to personal information or other data, including payment card data or confidential business information, or that any such data compromise or unauthorized access will be discovered in a timely fashion. The techniques used to obtain unauthorized access or to sabotage systems change frequently and generally are not identified until they are launched against a target, and we and our vendors may be unable to anticipate these techniques or to implement adequate preventative measures. As we have significantly increased the number of employees and contractors working remotely due to the COVID-19 pandemic and expect to continue to have a more remote and hybrid work force, and as our vendors and other business partners move to permanent or hybrid remote work as well, we and our partners may be more vulnerable to cyber attacks. In addition, our employees, contractors, vendors, or other third parties with whom we do business may attempt to circumvent security measures in order to misappropriate such personal information, confidential information, or other data, or may inadvertently release or compromise such data.

Compromise of our data security or of third parties with whom we do business, failure to prevent or mitigate the loss of personal or business information, and delays in detecting or providing prompt notice of any such compromise or loss could disrupt our operations, damage our reputation, and subject us to litigation, government action, or other additional costs and liabilities that could adversely affect our business, financial condition, and operating results.

Some of our software and systems contain open source software, which may pose particular risks to our proprietary applications.

We use open source software in the applications we have developed to operate our business and will use open source software in the future. We may face claims from third parties demanding the release or license of the open source software or derivative works that we developed from such software (which could include our proprietary source code) or otherwise seeking to enforce the terms of the applicable open source license. These claims could result in litigation and could require us to purchase a costly license, publicly release the affected portions of our source code, or cease offering the implicated solutions unless and until we can re-engineer them to avoid infringement. In addition, our use of open source software may present additional security risks because the source code for open source software is publicly available, which may make it easier for hackers and other third parties to determine how to breach our website and systems that rely on open source software. Any of these risks could be difficult to eliminate or manage and, if not addressed, could have an adverse effect on our business and operating results.

Adverse litigation judgments or settlements resulting from legal proceedings in which we are or may be involved could expose us to monetary damages or limit our ability to operate our business.

Currently, we are involved in various legal proceedings, including the securities litigation and other matters described elsewhere herein. We have in the past and may in the future become involved in other private actions, collective actions, investigations, and various other legal proceedings by clients, employees, suppliers, competitors, government agencies, stockholders, or others. In addition, the COVID-19 pandemic could give rise to new types of claims or lawsuits, including, without limitation, workers compensation claims for employees that contracted the COVID-19 virus. The results of any such litigation, investigations, and other legal proceedings are inherently unpredictable and expensive. Any claims against us, whether meritorious or not, could be time consuming, result in costly litigation, damage our reputation, require significant amounts of management time, and divert significant resources. If any of these legal proceedings were to be determined adversely to us, or we were to enter into a settlement arrangement, we could be exposed to monetary damages or limits on our ability to operate our business, which could have an adverse effect on our business, financial condition, and operating results.

Any failure by us or our vendors to comply with product safety, labor, or other laws, or our standard vendor terms and conditions, or to provide safe factory conditions for our or their workers, may damage our reputation and brand, and harm our business.

The merchandise we sell to our clients is subject to regulation by the Federal Consumer Product Safety Commission, the Federal Trade Commission, and similar state and international regulatory authorities. As a result, such merchandise could in the future be subject to recalls and other remedial actions. Product safety, labeling, and licensing concerns may result in us voluntarily removing selected merchandise from our inventory. Such recalls or voluntary removal of merchandise can result in, among other things, lost sales, diverted resources, potential harm to our reputation, and increased client service costs and legal expenses, which could have a material adverse effect on our operating results.

Some of the merchandise we sell, including the children's merchandise sold through Stitch Fix Kids, may expose us to product liability claims and litigation or regulatory action relating to personal injury or environmental or property damage. Although we maintain liability insurance, we cannot be certain that our coverage will be adequate for liabilities actually incurred or that insurance will continue to be available to us on economically reasonable terms or at all. In addition, some of our agreements with our vendors may not indemnify us from product liability for a particular vendor's merchandise or our vendors may not have sufficient resources or insurance to satisfy their indemnity and defense obligations.

We purchase our merchandise from numerous domestic and international vendors. Our standard vendor terms and conditions require vendors to comply with applicable laws. We have hired independent firms that conduct audits of the working conditions at the factories producing our Exclusive Brand products. If an audit reveals potential problems, we require that the vendor institute corrective action plans to bring the factory into compliance with our standards, or we may discontinue our relationship with the vendor. The loss of an Exclusive Brand vendor due to failure to comply with our standards could cause inventory delays, impact our clients' experiences, and otherwise harm our operating results. In addition, failure of our vendors to comply with applicable laws and regulations and contractual requirements could lead to litigation against us, resulting in increased legal expenses and costs. Furthermore, the failure of any such vendors to provide safe and humane factory conditions and oversight at their facilities could damage our reputation with clients or result in legal claims against us.

The United States Treasury Department placed sanctions on China's Xinjiang Production and Construction Corporation ("XPCC") for serious human rights abuses against ethnic minorities in China's Xinjiang Uyghur Autonomous Region (the "XUAR"). Additionally, the US CBP issued a withhold release order (the "WRO") on all products containing cotton from the XUAR. The XUAR is the source of large amounts of cotton and textiles for the global apparel supply chain and XPCC controls many of the cotton farms and much of the textile industry in the region. Although we do not knowingly source any products or materials from the XUAR (either directly or indirectly through our suppliers), we have no known involvement with XPCC or its subsidiaries and affiliates, and we prohibit our apparel vendors from doing business with XPCC, we could be subject to penalties, fines or sanctions if any of the vendors from which we purchase goods is found to have dealings, directly or indirectly, with XPCC or entities it controls. Additionally, our products or materials (including potentially non-cotton materials) could be held or delayed by the US CBP under the WRO, which would cause delays and unexpectedly affect our inventory levels. Even if we were not subject to penalties, fines or sanctions, if products we source are linked in any way to XPCC or the XUAR, our reputation could be damaged.

Our use of personal information and other data subjects us to privacy laws and obligations, and our compliance with or failure to comply with such obligations could harm our business.

We collect and maintain significant amounts of personal information and other data relating to our clients and employees. Numerous laws, rules, and regulations in the United States and internationally, including the EU’s General Data Protection Regulation (the “GDPR”), California’s Consumer Privacy Act (the “CCPA”) and the UK’s Data Protection Act (the “UK GDPR”), govern privacy and the collection, use, and protection of personal information. These laws, rules, and regulations evolve frequently and may be inconsistent from one jurisdiction to another or may be interpreted to conflict with our practices. Any failure or perceived failure by us or any third parties with which we do business to comply with these laws, rules, and regulations, or with other obligations to which we may be or become subject, may result in actions against us by governmental entities, private claims and litigation, fines, penalties, or other liabilities. Any such action would be expensive to defend, damage our reputation, and adversely affect our business and operating results. For example, the GDPR imposes more stringent data protection requirements and provides greater penalties for noncompliance than previous data protection laws. Further, the UK withdrew from the EU on January 31, 2020, subject to a transition period that ended on December 31, 2020 (“Brexit”). The regulation of data protection in the UK after December 31, 2020 is still uncertain and depends on ongoing negotiations between the UK and the EU. The UK GDPR is currently consistent with the GDPR in effect since 2018, but it may evolve following the end of the transition period and it is uncertain whether our operations in, and data transfers to and from, the UK can comply with any future changes in the law. Similarly, the State of California legislature passed the CCPA, which became effective on January 1, 2020. The CCPA requires us to make new disclosures to consumers about our data collection, use, and sharing practices. The CCPA also allows consumers to opt out of certain data sharing with third parties, and provides a new cause of action for data breaches with the possibility of significant statutory damage awards. The CCPA prohibits discrimination against individuals who exercise their privacy rights, provides for civil penalties for violations, and creates a private right of action for data breaches that is expected to increase data breach litigation. The CCPA itself will expand substantially when the California Privacy Rights Act of 2020 (the “CPRA”), which California voters approved in November 2020, takes effect on January 1, 2023. The CPRA will, among other things, restrict use of certain categories of sensitive personal information that we handle; further restrict the sharing of personal information; establish restrictions on the retention of personal information; expand the types of data breaches subject to the private right of action; and establish the California Privacy Protection Agency to implement and enforce the new law, as well as impose administrative fines. Since the enactment of the CCPA, new privacy and data security laws have been proposed in more than half of the U.S. states and in the U.S. Congress, reflecting a trend toward more stringent privacy legislation in the U.S. Additionally, the Federal Trade Commission and many state attorneys general are interpreting federal and state consumer protection laws as imposing standards for the online collection, use, dissemination, and security of data.

The costs of compliance with and other burdens imposed by privacy and data security laws and regulations may reduce the efficiency of our marketing, lead to negative publicity, make it more difficult or more costly to meet expectations of or commitments to clients, or lead to significant fines, penalties or liabilities for noncompliance, any of which could harm our business. These laws could also impact our ability to offer our products in certain locations. The costs, burdens, and potential liabilities imposed by existing privacy laws could be compounded if other jurisdictions in the U.S. or abroad begin to adopt similar or more restrictive laws.

Even the perception that the privacy of personal information is not satisfactorily protected or does not meet regulatory requirements could inhibit clients’ use of our service or harm our brand and reputation.

Any of these matters could materially adversely affect our business, financial condition, or operating results.

Unfavorable changes or failure by us to comply with evolving internet and eCommerce regulations could substantially harm our business and operating results.

We are subject to general business regulations and laws as well as regulations and laws specifically governing the internet and eCommerce. These regulations and laws may involve taxes, privacy and data security, consumer protection, the ability to collect and/or share necessary information that allows us to conduct business on the internet, marketing communications and advertising, content protection, electronic contracts, or gift cards. Furthermore, the regulatory landscape impacting internet and eCommerce businesses is constantly evolving. For example, California’s Automatic Renewal Law requires companies to adhere to enhanced disclosure requirements when entering into automatically renewing contracts with consumers. As a result, a wave of consumer class action lawsuits was brought against companies that offer online products and services on a subscription or recurring basis. Any failure, or perceived failure, by us to comply with any of these laws or regulations could result in damage to our reputation, lost business, and proceedings or actions against us by governmental entities or others, which could impact our operating results.

If the use of “cookie” tracking technologies is further restricted, regulated, or blocked, or if changes in technology cause cookies to become less reliable or acceptable as a means of tracking consumer behavior, the amount or accuracy of internet user information we collect would decrease, which could harm our business and operating results.

Cookies are small data files that are sent by websites and stored locally on an internet user's computer or mobile device. We, and third parties who work on our behalf, collect data via cookies that is used to track the behavior of visitors to our sites, to provide a more personal and interactive experience, and to increase the effectiveness of our marketing. However, internet users can easily disable, delete, and block cookies directly through browser settings or through other software, browser extensions, or hardware platforms that physically block cookies from being created and stored.

Privacy regulations restrict how we deploy our cookies and this could potentially increase the number of internet users that choose to proactively disable cookies on their systems. In the EU, the Directive on Privacy and Electronic Communications requires users to give their consent before cookie data can be stored on their local computer or mobile device. Users can decide to opt out of nearly all cookie data creation, which could negatively impact our operating results. We may have to develop alternative systems to determine our clients' behavior, customize their online experience, or efficiently market to them if clients block cookies or regulations introduce additional barriers to collecting cookie data.

If we cannot successfully protect our intellectual property, our business would suffer.

We rely on trademark, copyright, trade secrets, patents, confidentiality agreements, and other practices to protect our brands, proprietary information, technologies, and processes. Our principal trademark assets include the registered trademarks “Stitch Fix” and “Fix,” multiple private label clothing and accessory brand names, and our logos and taglines. Our trademarks are valuable assets that support our brand and consumers' perception of our services and merchandise. We also hold the rights to the “stitchfix.com” internet domain name and various other related domain names, which are subject to internet regulatory bodies and trademark and other related laws of each applicable jurisdiction. If we are unable to protect our trademarks or domain names in the United States, the UK, or in other jurisdictions in which we may ultimately operate, our brand recognition and reputation would suffer, we would incur significant expense establishing new brands and our operating results would be adversely impacted.

We currently have nine patents issued and a number of additional patent applications pending in the United States. We have also filed patent applications in Europe and the People's Republic of China. The patents we own and those that may be issued in the future may not provide us with any competitive advantages or may be challenged by third parties, and our patent applications may never be granted. Even if issued, there can be no assurance that these patents will adequately protect our intellectual property or survive a legal challenge, as the legal standards relating to the validity, enforceability, and scope of protection of patent and other intellectual property rights are uncertain. Our limited patent protection may restrict our ability to protect our technologies and processes from competition. We primarily rely on trade secret laws to protect our technologies and processes, including the algorithms we use throughout our business. Others may independently develop the same or similar technologies and processes, or may improperly acquire and use information about our technologies and processes, which may allow them to provide a service similar to ours, which could harm our competitive position.

We may be required to spend significant resources to monitor and protect our intellectual property rights, and the efforts we take to protect our proprietary rights may not be sufficient.

We may be accused of infringing intellectual property rights of third parties.

We are also at risk of claims by others that we have infringed their copyrights, trademarks, or patents, or improperly used or disclosed their trade secrets. The costs of supporting any litigation or disputes related to these claims can be considerable, and we cannot assure you that we will achieve a favorable outcome of any such claim. If any such claims are valid, we may be compelled to cease our use of such intellectual property and pay damages, which could adversely affect our business. Even if such claims are not valid, defending them could be expensive and distracting, adversely affecting our operating results.

Risks Relating to Taxes

Changes in U.S. tax or tariff policy regarding apparel produced in other countries could adversely affect our business.

A predominant portion of the apparel we sell is originally manufactured in countries other than the United States. International trade disputes that result in tariffs and other protectionist measures could adversely affect our business, including disruption and cost increases in our established patterns for sourcing our merchandise and increased uncertainties in planning our sourcing strategies and forecasting our margins. For example, in recent years, the U.S. government imposed significant new tariffs on China related to the importation of certain product categories, including apparel, footwear, and other goods. A substantial portion of our products are manufactured in China. As a result of these tariffs, our cost of goods imported from China increased slightly. Although we continue to work with our vendors to mitigate our exposure to current or potential tariffs, there can be no assurance that we will be able to offset any increased costs. Other changes in U.S. tariffs, quotas, trade relationships, or tax provisions could also reduce the supply of goods available to us or increase our cost of goods. Although such changes would have implications across the entire industry, we may fail to effectively adapt to and manage the adjustments in strategy that would be necessary in response to those changes. In addition to the general uncertainty and overall risk from potential changes in U.S. laws and policies, as we make business decisions in the face of such uncertainty, we may incorrectly anticipate the outcomes, miss out on business opportunities, or fail to effectively adapt our business strategies and manage the adjustments that are necessary in response to those changes. These risks could adversely affect our revenues, reduce our profitability, and negatively impact our business.

We could be required to collect additional sales taxes or be subject to other tax liabilities that may increase the costs our clients would have to pay for our offering and adversely affect our operating results.

In general, we have not historically collected state or local sales, use, or other similar taxes in any jurisdictions in which we do not have a tax nexus, in reliance on court decisions and/or applicable exemptions that restrict or preclude the imposition of obligations to collect such taxes with respect to the online sales of our products. In addition, we have not historically collected state or local sales, use, or other similar taxes in certain jurisdictions in which we do have a physical presence, in reliance on applicable exemptions. On June 21, 2018, the U.S. Supreme Court decided, in *South Dakota v. Wayfair, Inc.*, that state and local jurisdictions may, at least in certain circumstances, enforce a sales and use tax collection obligation on remote vendors that have no physical presence in such jurisdiction. As of June 30, 2021, all states have enacted legislation to begin, requiring sales and use tax collection by remote vendors and/or by online marketplaces. The details and effective dates of these collection requirements vary from state to state. While we now collect, remit, and report sales tax in all states that impose a sales tax, it is still possible that one or more jurisdictions may assert that we have liability from previous periods for which we did not collect sales, use, or other similar taxes, and if such an assertion or assertions were successful it could result in substantial tax liabilities, including for past sales taxes and penalties and interest, which could materially adversely affect our business, financial condition, and operating results.

Federal income tax reform could have unforeseen effects on our financial condition and results of operations.

On March 27, 2020, the U.S. enacted the CARES Act. We provided for an estimated effect of the CARES Act in our financial statements for the period ended July 31, 2021. The CARES Act requires significant judgments to be made in the interpretation of the law and significant estimates in the calculation of the provision for income taxes. However, additional guidance may be issued by the Internal Revenue Service, the Department of the Treasury, or other governing body that may significantly differ from our interpretation of the law, which may result in a material adverse effect on our business, cash flow, results of operations, or financial conditions.

We may be subject to additional tax liabilities, which could adversely affect our operating results.

We are subject to income- and non-income-based taxes in the United States under federal, state, and local jurisdictions and in the UK. The governing tax laws and applicable tax rates vary by jurisdiction and are subject to interpretation. Various tax authorities may disagree with tax positions we take and if any such tax authorities were to successfully challenge one or more of our tax positions, the results could have a material effect on our operating results. Further, the ultimate amount of tax payable in a given financial statement period may be materially impacted by sudden or unforeseen changes in tax laws, changes in the mix and level of earnings by taxing jurisdictions, or changes to existing accounting rules or regulations. The determination of our overall provision for income and other taxes is inherently uncertain as it requires significant judgment around complex transactions and calculations. As a result, fluctuations in our ultimate tax obligations may differ materially from amounts recorded in our financial statements and could adversely affect our business, financial condition, and operating results in the periods for which such determination is made.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

As of July 31, 2021, we had state net operating loss carryforwards of \$142.0 million, which begin to expire in 2025, if not utilized. The ability to use our net operating loss carryforwards depends on the availability of future taxable income. In addition, as of July 31, 2021, we had federal and California research and development tax credit carryforwards of \$30.1 million and \$17.0 million, respectively. The federal research and development credits will begin to expire in 2036, if not utilized; California research and development credits do not have an expiration date. A portion of our tax attributes are subject to Section 382 and 383 of the Internal Revenue Code and similar state provisions, which sets limitations arising from ownership changes. Any potential limitations on our ability to offset future income with our tax attributes could result in increased future tax liability to us.

Risks Relating to Ownership of Our Class A Common Stock

The market price of our Class A common stock may continue to be volatile or may decline steeply or suddenly regardless of our operating performance and we may not be able to meet investor or analyst expectations. You may lose all or part of your investment.

The market price of our Class A common stock may fluctuate or decline significantly in response to numerous factors, many of which are beyond our control, including:

- actual or anticipated fluctuations in our client base, the level of client engagement and client acquisition, revenue, or other operating results;
- variations between our actual operating results and the expectations of securities analysts, investors, and the financial community;
- any forward-looking financial or operating information we may provide to the public or securities analysts, any changes in this information, or our failure to meet expectations based on this information;
- actions of securities analysts who initiate or maintain coverage of us, changes in financial estimates by any securities analysts who follow our company, or our failure to meet these estimates or the expectations of investors;
- whether investors or securities analysts view our stock structure unfavorably, particularly our dual-class structure and the significant voting control of our executive officers, directors, and their affiliates;
- additional shares of our Class A common stock being sold into the market by us or our existing stockholders, or the anticipation of such sales;
- announcements by us or our competitors of significant products or features, technical innovations, acquisitions, strategic partnerships, joint ventures, or capital commitments;
- changes in operating performance and stock market valuations of companies in our industry, including our vendors and competitors;
- price and volume fluctuations in the overall stock market, including as a result of trends in the economy as a whole;
- targeted efforts of social media or other groups to transact in and affect the price of Stitch Fix stock, such as the activity in early 2021 targeting GameStop Corp and others;
- lawsuits threatened or filed against us;
- developments in new legislation and pending lawsuits or regulatory actions, including interim or final rulings by judicial or regulatory bodies; and
- other events or factors, including those resulting from war or incidents of terrorism, public health crises such as the COVID-19 pandemic, or responses to these events.

In addition, extreme price and volume fluctuations in the stock markets have affected and continue to affect many eCommerce and other technology companies' stock prices. Often, their stock prices have fluctuated in ways unrelated or disproportionate to the companies' operating performance. In the past, stockholders have filed securities class action litigation following periods of market volatility. For example, beginning in October 2018, we and certain of our directors and officers were sued in putative class action and derivative lawsuits alleging violations of the federal securities laws for allegedly making materially false and misleading statements. We may be the target of additional litigation of this type in the future as well. Such securities litigation could subject us to substantial costs, divert resources and the attention of management from our business, and seriously harm our business.

Moreover, because of these fluctuations, comparing our operating results on a period-to-period basis may not be meaningful. You should not rely on our past results as an indication of our future performance. This variability and unpredictability could also result in our failing to meet the expectations of industry or financial analysts or investors for any period. If our revenue or operating results fall below the expectations of analysts or investors or below any forecasts we may provide to the market, or if the forecasts we provide to the market are below the expectations of analysts or investors, the price of our Class A common stock could decline substantially. Such a stock price decline could occur even when we have met any previously publicly stated revenue or earnings forecasts that we may provide.

Future sales of shares by existing stockholders could cause our stock price to decline.

If our existing stockholders sell, or indicate an intention to sell, substantial amounts of our Class A common stock in the public market, then the trading price of our Class A common stock could decline. In addition, shares underlying any outstanding options and restricted stock units will become eligible for sale if exercised or settled, as applicable, and to the extent permitted by the provisions of various vesting agreements and Rule 144 of the Securities Act. All the shares of Class A and Class B common stock subject to stock options and restricted stock units outstanding and reserved for issuance under our 2011 Equity Incentive Plan, as amended, our 2017 Incentive Plan, and our 2019 Inducement Plan have been registered on Form S-8 under the Securities Act and such shares are eligible for sale in the public markets, subject to Rule 144 limitations applicable to affiliates. If these additional shares are sold, or if it is perceived that they will be sold in the public market, the trading price of our Class A common stock could decline.

The dual class structure of our common stock concentrates voting control with our executive officers, directors and their affiliates, and may depress the trading price of our Class A common stock.

Our Class B common stock has ten votes per share and our Class A common stock has one vote per share. As a result, the holders of our Class B common stock, including our directors, executive officers, and their affiliates, are able to exercise considerable influence over matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions, such as a merger or other sale of our company or our assets, even if their stock holdings represent less than 50% of the outstanding shares of our capital stock. As of September 21, 2021, 31,476,875 of our 108,731,974 shares outstanding were held by our directors, executive officers, and their affiliates, and 29,233,301 of such shares held by our directors, executive officers, and their affiliates were shares of Class B common stock. This concentration of ownership will limit the ability of other stockholders to influence corporate matters and may cause us to make strategic decisions that could involve risks to you or that may not be aligned with your interests. This control may adversely affect the market price of our Class A common stock.

In addition, in July 2017, FTSE Russell and Standard & Poor's announced that they would cease to allow most newly public companies utilizing dual or multi-class capital structures to be included in their indices. Affected indices include the S&P 500, S&P MidCap 400, and S&P SmallCap 600, which together make up the S&P Composite 1500. Under the announced policies, our dual class capital structure currently makes us ineligible for inclusion in Standard & Poor's indices and, as a result, mutual funds, exchange-traded funds, and other investment vehicles that attempt to passively track the S&P indices will not be investing in our stock. It is unclear what effect, if any, these policies have had or may have on the valuations of publicly traded companies excluded from the indices, but it is possible that they may depress these valuations compared to those of other similar companies that are included.

We do not currently intend to pay dividends on our Class A common stock and, consequently, your ability to achieve a return on your investment will depend on appreciation of the value of our Class A common stock.

We have never declared or paid cash dividends on our capital stock. We currently intend to retain any future earnings to finance the operation and expansion of our business, and we do not expect to pay any cash dividends on our Class A common stock in the foreseeable future. As a result, any investment return our Class A common stock will depend upon increases in the value for our Class A common stock, which is not certain.

Delaware law and provisions in our amended and restated certificate of incorporation and amended and restated bylaws could make a merger, tender offer, or proxy contest difficult, thereby depressing the trading price of our Class A common stock.

Our amended and restated certificate of incorporation and amended and restated bylaws contain provisions that could depress the trading price of our Class A common stock by acting to discourage, delay, or prevent a change of control of our company or changes in our management that the stockholders of our company may deem advantageous. These provisions include the following:

- establish a classified board of directors so that not all members of our board of directors are elected at one time;
- permit the board of directors to establish the number of directors and fill any vacancies and newly created directorships;
- provide that directors may only be removed for cause;
- require super-majority voting to amend some provisions in our certificate of incorporation and bylaws;
- authorize the issuance of "blank check" preferred stock that our board of directors could use to implement a stockholder rights plan;
- eliminate the ability of our stockholders to call special meetings of stockholders;
- prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders;
- provide that the board of directors is expressly authorized to make, alter, or repeal our bylaws;
- restrict the forum for certain litigation against us to Delaware;
- reflect the dual class structure of our common stock; and

- establish advance notice requirements for nominations for election to our board of directors or for proposing matters that can be acted upon by stockholders at annual stockholder meetings.

Any provision of our amended and restated certificate of incorporation or amended and restated bylaws that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our Class A common stock.

Our amended and restated certificate of incorporation provides that the Court of Chancery of the State of Delaware and the federal district courts of the United States are the exclusive forums for substantially all disputes between us and our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, or employees.

Our amended and restated certificate of incorporation provides that the Court of Chancery of the State of Delaware is the exclusive forum for the following types of actions or proceedings under Delaware statutory or common law:

- any derivative action or proceeding brought on our behalf;
- any action asserting a breach of fiduciary duty;
- any action asserting a claim against us arising under the Delaware General Corporation Law, our amended and restated certificate of incorporation, or our amended and restated bylaws; and
- any action asserting a claim against us that is governed by the internal-affairs doctrine.

This provision would not apply to suits brought to enforce a duty or liability created by the Exchange Act. Furthermore, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all such Securities Act actions. Accordingly, both state and federal courts have jurisdiction to entertain such claims. To prevent having to litigate claims in multiple jurisdictions and the threat of inconsistent or contrary rulings by different courts, among other considerations, our amended and restated certificate of incorporation further provides that the federal district courts of the United States are the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act. While the Delaware courts have determined that such choice of forum provisions are facially valid, a stockholder may nevertheless seek to bring a claim in a venue other than those designated in the exclusive forum provisions. In such instance, we would expect to vigorously assert the validity and enforceability of the exclusive forum provisions of our amended and restated certificate of incorporation. This may require significant additional costs associated with resolving such action in other jurisdictions and there can be no assurance that the provisions will be enforced by a court in those other jurisdictions.

These exclusive forum provisions may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers, or other employees, which may discourage lawsuits against us and our directors, officers and other employees. If a court were to find either exclusive-forum provision in our amended and restated certificate of incorporation to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving the dispute in other jurisdictions, which could seriously harm our business.

General Risk Factors

If we are unable to maintain effective internal control over financial reporting, investors may lose confidence in the accuracy of our reported financial information and this may lead to a decline in our stock price.

We are required to comply with Section 404 of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"). Specifically, the Sarbanes-Oxley Act requires management to assess the effectiveness of our internal controls over financial reporting and to report any material weaknesses in such internal control. We have in the past experienced material weaknesses and significant deficiencies in our internal controls, including for our fiscal year ended August 3, 2019. Management has concluded that our internal control over financial reporting was effective as of July 31, 2021. However, our testing, or the subsequent testing by our independent public accounting firm, may reveal deficiencies in our internal control over financial reporting that are deemed to be material weaknesses. If we or our accounting firm identify deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, it could harm our operating results, adversely affect our reputation, or result in inaccurate financial reporting. Furthermore, should any such deficiencies arise we could be subject to lawsuits, sanctions or investigations by regulatory authorities, including SEC enforcement actions and we could be required to restate our financial results, any of which would require additional financial and management resources.

Even if we do not detect deficiencies, our internal control over financial reporting will not prevent or detect all errors and fraud, and individuals, including employees and contractors, could circumvent such controls. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud will be detected.

In addition, we may encounter difficulties in the timely and accurate reporting of our financial results, which would impact our ability to provide our investors with information in a timely manner. Should we encounter such difficulties, our investors could lose confidence in the reliability of our reported financial information and trading price of our common stock. could be negatively impacted.

We may require additional capital to support business growth, and this capital might not be available or may be available only by diluting existing stockholders.

We intend to continue making investments to support our business growth and may require additional funds to support this growth and respond to business challenges, including the need to develop our services, expand our inventory, enhance our operating infrastructure, expand the markets in which we operate, and potentially acquire complementary businesses and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional funds through further issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences, and privileges superior to those of holders of our Class A common stock. We are also party to an amended and restated credit agreement with Silicon Valley Bank and other lenders that contains covenants limiting our ability to, among other things, dispose of assets, undergo a change in control, merge or consolidate, make acquisitions, incur debt, incur liens, pay dividends, repurchase stock, and make investments, in each case subject to certain exceptions, and contains financial covenants requiring us to maintain minimum free cash flow and an adjusted current ratio above specified levels, measured in each case at the end of each fiscal quarter. The restrictive covenants of this or any future debt financing secured may make it more difficult for us to obtain additional capital and to pursue business opportunities. Any debt financing secured by us in the future could involve restrictive covenants relating to our capital-raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities. In addition, we may not be able to obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us, when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly limited, and our business and prospects could fail or be adversely affected.

If securities or industry analysts either do not publish research about us or publish inaccurate or unfavorable research about us, our business, or our market, or if they change their recommendations regarding our common stock adversely, the trading price or trading volume of our Class A common stock could decline.

The trading market for our Class A common stock is influenced in part by the research and reports that securities or industry analysts may publish about us, our business, our market, or our competitors. If one or more of the analysts initiate research with an unfavorable rating or downgrade our Class A common stock, provide a more favorable recommendation about our competitors, or publish inaccurate or unfavorable research about our business, our Class A common stock price would likely decline. If any analyst who may cover us were to cease coverage of us or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause the trading price or trading volume of our Class A common stock to decline.

Future securities sales and issuances could result in significant dilution to our stockholders and impair the market price of our Class A common stock.

We may issue additional equity securities in the future. We also issue common stock to our employees and others under our incentive plans. Future issuances of shares of our Class A common stock or the conversion of a substantial number of shares of our Class B common stock, or the perception that these sales or conversions may occur, could depress the market price of our Class A common stock and result in dilution to existing holders of our Class A common stock. Also, to the extent outstanding options to purchase our shares of our Class A or Class B common stock are exercised or options or other stock-based awards are issued or become vested, there will be further dilution. The amount of dilution could be substantial depending upon the size of the issuances or exercises. Furthermore, we may issue additional equity securities that could have rights senior to those of our Class A common stock. As a result, holders of our Class A common stock bear the risk that future issuances of debt or equity securities may reduce the value of our Class A common stock and further dilute their ownership interest.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our principal physical properties are located in the United States and UK. Our corporate headquarters are located in San Francisco, California, and comprise approximately 134,000 square feet of space. Although the majority of our employees who utilize this space are currently working from home due to the COVID-19 pandemic, as of the date of this filing we still intend to occupy this location when conditions permit.

We also lease and operate six fulfillment centers in the United States. These comprise a total of approximately 3,635,000 square feet, at which we receive merchandise from vendors, ship products to clients and receive and process returns from clients. These facilities are located in Arizona, Texas, Pennsylvania, Indiana, and Georgia. In addition, we have one fulfillment center that is leased and operated by a third-party logistics contractor in the UK, representing approximately 277,000 square feet.

In November 2020, we entered into an agreement to lease approximately 700,000 square feet of space to be used as a fulfillment center in Salt Lake City, Utah, which will be our seventh fulfillment center in the United States. We expect this facility to begin receiving merchandise from vendors and shipping products to clients in early fiscal 2022.

We believe our facilities, including our planned expansions, are sufficient for our current needs.

Item 3. Legal Proceedings.

The information contained in Note 8 “Commitments and Contingencies” under the heading “Contingencies” in the Notes to the Consolidated Financial Statements included within this Annual Report on Form 10-K is incorporated herein by reference.

Item 4. Mine Safety Disclosures.

None.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Information for Common Stock

Our Class A common stock, par value \$0.00002 per share, is listed on the Nasdaq Global Select Market, under the symbol “SFIX” and began trading on November 17, 2017. Prior to that date, there was no public trading market for our Class A common stock. There is no public trading market for our Class B common stock, par value \$0.00002 per share.

Holders of Record

As of the close of business on September 21, 2021, there were 40 stockholders of record of our Class A common stock and 16 stockholders of record of our Class B common stock. The actual number of holders of our Class A and Class B common stock is greater than the number of record holders, and includes stockholders who are beneficial owners, but whose shares are held in street name by brokers or other nominees. The number of holders of record presented here also does not include stockholders whose shares may be held in trust by other entities.

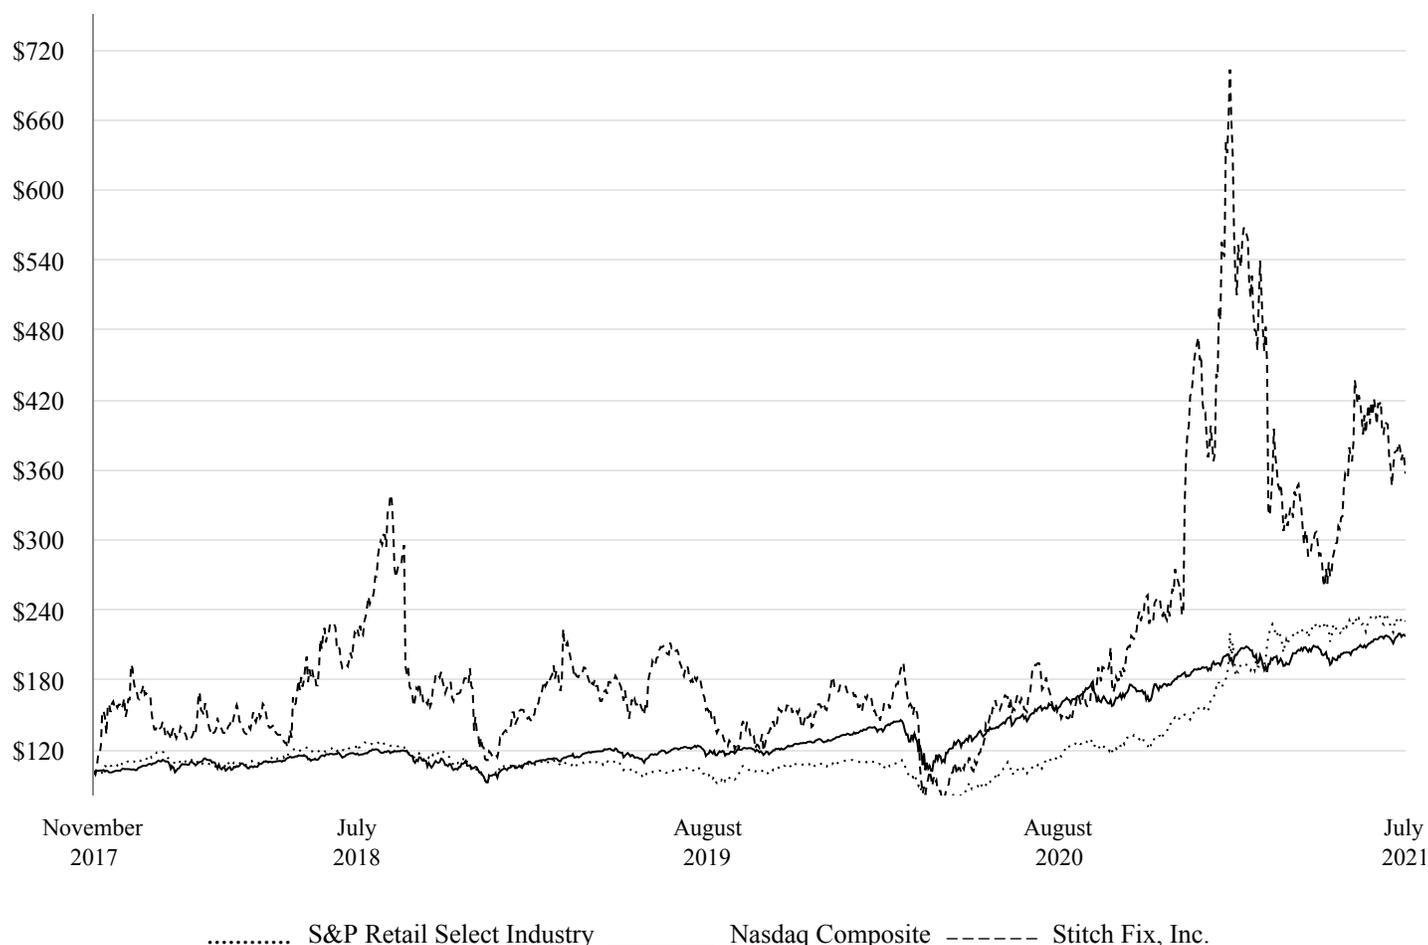

Dividend Policy

We have never declared or paid cash dividends on our capital stock. We currently intend to retain all available funds and future earnings to fund the development and expansion of our business, and we do not anticipate paying any cash dividends in the foreseeable future. Any future determination regarding the declaration and payment of dividends, if any, will be at the discretion of our board of directors and will depend on then-existing conditions, including our financial condition, operating results, contractual restrictions, capital requirements, business prospects, and other factors our board of directors may deem relevant.

Cumulative Stock Performance Graph

The following graph compares the cumulative total return to stockholders on our Class A common stock relative to the cumulative total returns of the Standard and Poor’s Retail Select Industry Index (S&P Retail Select Industry) and Nasdaq Composite Index (Nasdaq Composite). An investment of \$100 (with reinvestment of all dividends) is assumed to have been made in our Class A common stock and in each index on November 17, 2017, the date our Class A common stock began trading on the Nasdaq, and its relative performance is tracked through July 31, 2021. The comparisons are based on historical data and are not indicative of, nor intended to forecast, the future performance of our Class A common stock.

Cumulative Stock Performance Graph

The following table assumes an investment of \$100 (with reinvestment of all dividends) to have been made in our Class A common stock and in each index on November 17, 2017, the date our Class A common stock began trading on the Nasdaq, and indicates the cumulative total return to stockholders on our Class A common stock and the cumulative total return of each index at July 28, 2018, August 3, 2019, August 1, 2020, and July 31, 2021:

(in dollars)	November 17, 2017	July 28, 2018	August 3, 2019	August 1, 2020	July 31, 2021
S&P Retail Select Industry	\$ 100.00	\$ 118.27	\$ 98.40	\$ 113.49	\$ 229.33
Nasdaq Composite	\$ 100.00	\$ 114.07	\$ 118.01	\$ 158.42	\$ 216.32
Stitch Fix, Inc.	\$ 100.00	\$ 194.79	\$ 163.89	\$ 146.20	\$ 355.91

The information under “Cumulative Stock Performance Graph” is not deemed to be “soliciting material” or “filed” with the SEC or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act, and is not to be incorporated by reference in any filing of Stitch Fix under the Securities Act or the Exchange Act, whether made before or after the date of this Annual Report and irrespective of any general incorporation language in those filings.

Recent Sales of Unregistered Securities

None.

Issuer Purchases of Equity Securities

None.

Item 6. Selected Financial Data.

No disclosure required by Item 301 of Regulation S-K as in effect on the date of this Annual Report.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

You should read the following discussion and analysis of our financial condition and results of operations together with our audited consolidated financial statements and related notes thereto included in Part II, Item 8 of this Annual Report on Form 10-K, or Annual Report. We use a 52- or 53-week fiscal year, with our fiscal year ending on the Saturday that is closest to July 31 of that year. Each fiscal year generally consists of four 13-week fiscal quarters, with each fiscal quarter ending on the Saturday that is closest to the last day of the last month of the quarter. The fiscal years ended July 31, 2021 (“2021”) and August 1, 2020 (“2020”) consisted of 52 weeks. The fiscal year ended August 3, 2019 (“2019”) consisted of 53 weeks. Throughout this Annual Report, all references to quarters and years are to our fiscal quarters and fiscal years unless otherwise noted.

In addition, this discussion contains forward-looking statements that reflect our plans, estimates, and beliefs, and involve risks and uncertainties. Our actual results and the timing of certain events could differ materially from those anticipated in or implied by these forward-looking statements as a result of several factors, including those discussed in the section titled “Risk Factors” included under Part I, Item 1A and elsewhere in this Annual Report. See “Special Note Regarding Forward-Looking Statements” in this Annual Report.

A discussion regarding our financial condition and results of operation for the fiscal year ended July 31, 2021, compared to the fiscal year ended August 1, 2020, is presented below. A discussion regarding our financial condition and results of operations for fiscal year ended August 1, 2020, compared to the fiscal year ended August 3, 2019, can be found under Item 7 in our Annual Report on Form 10-K for the fiscal year ended August 1, 2020, filed with the SEC on September 25, 2020, which is available on the SEC’s website at www.sec.gov and on the SEC Filings section of the Investor Relations section of our website at: <https://investors.stitchfix.com>.

Overview

Since our founding in 2011, we have helped millions of women, men, and kids discover and buy what they love through personalized shipments of apparel, shoes, and accessories. Currently, clients can engage with us in one of two ways that, combined, form an ecosystem of personalized experiences across styling, shopping and inspiration: (1) by receiving a personalized shipment of apparel informed by our algorithms and sent by a Stitch Fix stylist (a “Fix”); or (2) by purchasing directly from our website or mobile app based on a personalized assortment of outfit and item recommendations (“Freestyle”). For a Fix, clients can choose to schedule automatic shipments or order on demand after they fill out a style profile on our website or mobile app. After receiving a Fix, our clients purchase the items they want to keep and return the other items, if any. Freestyle utilizes our algorithms to recommend a personalized assortment of outfit and item recommendations that will update throughout the day and will continue to evolve as we learn more about the client.

For the fiscal year ended July 31, 2021, we reported \$2.1 billion of revenue representing year-over-year growth of 22.8% from the fiscal year ended August 1, 2020. As of July 31, 2021, and August 1, 2020, we had approximately 4,165,000 and 3,522,000 active clients, respectively, representing year-over-year growth of 18.3%.

Net loss for the fiscal year ended July 31, 2021, was \$8.9 million, compared to net loss of \$67.1 million for the fiscal year ended August 1, 2020. For more information on the components of net income (loss), refer to the section titled “Results of Operations” below.

COVID-19 Update

There continues to be uncertainty around the COVID-19 pandemic as the Delta variant of COVID-19, which appears to be the most transmissible and contagious variant to date, has caused a surge in COVID-19 cases globally. The full impact of the COVID-19 crisis on our business will depend on factors such as the length of time of the pandemic; how federal, state and local governments are responding, especially in light of the recent surge in cases due to the Delta variant; vaccination rates among the population; the efficacy of the COVID-19 vaccines against the Delta variant and other variants as they emerge; the longer-term impact of the crisis on the economy and consumer behavior; and the effect on our clients, employees, vendors, and other partners.

During this time, we are focused on protecting the health and safety of our employees while seeking to continue operating our business responsibly.

In the third quarter of fiscal 2020, we temporarily closed three of our fulfillment centers to assess our ability to operate under shelter-in-place orders and develop protocols to protect the welfare of our fulfillment center employees. Those fulfillment centers reopened shortly thereafter, and all of our fulfillment centers are currently operating with safety measures in place. We have also experienced smaller, intermittent interruptions at our fulfillment centers in connection with temporary closures of certain fulfillment centers for part of a work day or for a full day. While we have only experienced intermittent and temporary closures since the third quarter of 2020, we have recently begun to experience an increase of COVID-19 cases in our fulfillment centers in connection with the surge of cases caused by the Delta variant. This recent increase in cases has affected capacity at our fulfillment centers, which could affect shipments to clients and inventory management. Additionally, we have experienced difficulty hiring employees in our fulfillment centers, which we attribute to COVID-19 concerns and to increased competition and rising wages for eCommerce fulfillment center workers as eCommerce demand accelerates.

While we expect many employees to return to our offices later this fiscal year, the timing of such a return has been affected by the Delta variant and related surge in COVID-19 cases and could be further effected by this resurgence of COVID-19 or additional resurgences. When we return to our office, we expect many employees to continue to work in a remote capacity or a hybrid of in-person and remote work. These changes to our operations going forward present additional challenges and increased costs to ensure our offices are safe and functional for hybrid offices that enable effective collaboration of both remote and in-person colleagues.

The effect of the COVID-19 pandemic on the broader economy and consumer behavior continues to evolve. During the latter half of our third fiscal quarter of 2020, we did experience lower demand, which negatively affected net revenue per active client, and which we believe was largely attributable to consumer reactions as the COVID-19 crisis escalated during March and April of 2020. Despite the continuing impact of COVID-19 on the overall economy, we saw strong retention from our auto-ship clients and growth in new client demand from increases in first Fix shipments in the second half of fiscal 2020. We continued to see growth in new client demand and strong auto-ship retention during fiscal 2021 and believe we are benefiting from the dislocation in the retail apparel market that is resulting from the COVID-19 pandemic. For further discussion of the COVID-19 related risks facing our business, refer to the “Risk Factors” section included in Part I, Item 1A.

Although we are experiencing unprecedented challenges during this global health crisis, we continue to focus on our long-term growth and strategies that capture the changing ways people shop. While we cannot reasonably estimate the long-term impacts of the COVID-19 pandemic, we believe that our business model positions us to emerge from this crisis with a structural advantage and new opportunities to increase market share.

Key Financial and Operating Metrics

Non-GAAP Financial Measures

We report our financial results in accordance with generally accepted accounting principles in the United States (“GAAP”). However, management believes that certain non-GAAP financial measures provide users of our financial information with additional useful information in evaluating our performance. We believe that adjusted EBITDA is frequently used by investors and securities analysts in their evaluations of companies, and that this supplemental measure facilitates comparisons between companies. We believe free cash flow is an important metric because it represents a measure of how much cash from operations we have available for discretionary and non-discretionary items after the deduction of capital expenditures. These non-GAAP financial measures may be different than similarly titled measures used by other companies.

Our non-GAAP financial measures should not be considered in isolation from, or as substitutes for, financial information prepared in accordance with GAAP. There are several limitations related to the use of our non-GAAP financial measures as compared to the closest comparable GAAP measures. Some of these limitations include:

- adjusted EBITDA excludes interest (income) expense and other (income) expense, net, as these items are not components of our core business;
- adjusted EBITDA does not reflect our tax provision (benefit), which may increase or decrease cash available to us;
- adjusted EBITDA excludes the recurring, non-cash expenses of depreciation and amortization of property and equipment and, although these are non-cash expenses, the assets being depreciated and amortized may have to be replaced in the future;
- adjusted EBITDA excludes the non-cash expense of stock-based compensation, which has been, and will continue to be for the foreseeable future, an important part of how we attract and retain our employees and a significant recurring expense in our business; and
- free cash flow does not represent the total residual cash flow available for discretionary purposes and does not reflect our future contractual commitments.

Adjusted EBITDA

We define adjusted EBITDA as net income (loss) excluding interest (income) expense, other (income) expense, net, provision (benefit) for income taxes, depreciation and amortization, and stock-based compensation expense. The following table presents a reconciliation of net income (loss), the most comparable GAAP financial measure, to adjusted EBITDA for each of the periods presented:

(in thousands)	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Adjusted EBITDA:			
Net income (loss)	\$ (8,876)	\$ (67,117)	\$ 36,881
Add (deduct):			
Interest (income) expense	(2,610)	(5,535)	(5,791)
Other (income) expense, net	366	1,593	(1,535)
Provision (benefit) for income taxes	(52,241)	19,395	(6,060)
Depreciation and amortization	27,610	22,562	16,095
Stock-based compensation expense	100,696	67,530	35,256
Adjusted EBITDA	\$ 64,945	\$ 38,428	\$ 74,846

Free Cash Flow

We define free cash flow as cash flows provided by (used in) operating activities reduced by purchases of property and equipment that are included in cash flows used in investing activities. The following table presents a reconciliation of cash flows provided by (used in) operating activities, the most comparable GAAP financial measure, to free cash flow for each of the periods presented:

(in thousands)	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Free cash flow reconciliation:			
Cash flows provided by (used in) operating activities	\$ (15,675)	\$ 42,877	\$ 78,594
Deduct:			
Purchases of property and equipment	(35,256)	(30,207)	(30,825)
Free cash flow	\$ (50,931)	\$ 12,670	\$ 47,769
Cash flows used in investing activities	\$ 39,093	\$ (70,461)	\$ (225,184)
Cash flows provided by (used in) financing activities	\$ (38,885)	\$ (1,435)	\$ 6,945

Operating Metrics

	July 31, 2021	August 1, 2020	August 3, 2019
Active clients (in thousands)	4,165	3,522	3,236
Net revenue per active client ⁽¹⁾	\$ 505	\$ 486	\$ 488

⁽¹⁾ Fiscal year 2019 was a 53-week year, with the extra week occurring in the quarter ended August 3, 2019.

Active Clients

We believe that the number of active clients is a key indicator of our growth and the overall health of our business. We define an active client as a client who checked out a Fix or was shipped an item using our direct-buy functionality, "Freestyle," in the preceding 52 weeks, measured as of the last day of that period. A client checks out a Fix when she indicates what items she is keeping through our mobile application or on our website. We consider each Women's, Men's, or Kids account as a client, even if they share the same household. We had 4,165,000 and 3,522,000 active clients as of July 31, 2021, and August 1, 2020, respectively, representing year-over-year growth of 18.3%.

Net Revenue per Active Client

We believe that net revenue per active client is an indicator of client engagement and satisfaction. We calculate net revenue per active client based on net revenue over the preceding four fiscal quarters divided by the number of active clients, measured as of the last day of the period. Net revenue per active client was \$505 and \$486 as of July 31, 2021, and August 1, 2020, respectively, representing a year-over-year increase of 3.9%.

Factors Affecting Our Performance

Inventory Management

We leverage our data science to buy and manage our inventory, including merchandise assortment and fulfillment center optimization. Because our merchandise assortment directly correlates to client success, we may at times optimize our inventory to prioritize long-term client success over short-term gross margin impact. To ensure sufficient availability of merchandise, we generally enter into purchase orders well in advance and frequently before apparel trends are confirmed by client purchases. As a result, we are vulnerable to demand and pricing shifts and availability of merchandise at time of purchase. We incur inventory write-offs and changes in inventory reserves that impact our gross margins.

Our inventory investments will fluctuate with the needs of our business. For example, in the first half of fiscal 2020, we purchased inventory based on our pre-COVID-19 pandemic projections, which resulted in excess inventory levels and higher inventory reserves during our third fiscal quarter. As noted above, in March 2020, we temporarily closed three of our fulfillment centers resulting in significantly less capacity in our warehouses and in turn delayed Fix shipments and a substantial backlog, delayed return processing, extended wait times for our clients, and significant inventory management challenges. During the fourth quarter of fiscal 2020, we increased capacity at our fulfillment centers and we experienced an uptick in client demand, both of which contributed to healthier inventory levels and lower inventory reserves than in our third fiscal quarter. During fiscal 2021, we increased our inventory levels to expand our inventory assortment and support our growth and future growth projections. If we fail to effectively predict client preferences or meet future sales projections, our inventory reserves, and potentially our inventory write-offs, will increase. Additionally, capacity constraints at our fulfillment centers due to hiring challenges, increased cases of COVID-19 among fulfillment center employees, or other reasons, will affect our ability to successfully manage our inventory. Furthermore, entering new locations, expanding to new categories, offering new functionalities such as Freestyle, or adding new fulfillment centers will all require additional investments in inventory.

Client Acquisition and Engagement

To grow our business, we must continue to acquire clients and successfully engage them. We believe that implementing broad-based marketing strategies that increase our brand awareness has the potential to strengthen Stitch Fix as a national consumer brand, help us acquire new clients, and drive revenue growth. As our business has achieved a greater scale and we are able to support a large and growing client base, we have increased our investments in marketing to take advantage of more marketing channels to efficiently acquire clients. We currently utilize both digital and offline channels to attract new visitors to our website or mobile app and subsequently convert them into clients. Our current marketing efforts include client referrals, affiliate programs, partnerships, display advertising, television, print, radio, video, content, direct mail, social media, email, mobile “push” communications, search engine optimization, and keyword search campaigns. While we expect to continue to make significant marketing investments to grow our business in the long run, our marketing expenses may vary from period to period.

The largest component of our marketing spend is advertising, which was \$174.7 million for the fiscal year ended July 31, 2021, compared to \$167.8 million for the fiscal year ended August 1, 2020.

To successfully acquire clients and increase engagement, we must also continue to improve the diversity of our offering. These efforts may include broadening our brand partnerships and expanding into new categories, product types, price points, and geographies. For example, in July 2018 we launched Stitch Fix Kids, expanding our client and vendor base, and in May 2019, we launched our services in the UK, expanding our geographic scope. In June 2019, we launched Direct Buy, predecessor to Freestyle, in the United States which provides clients the flexibility to purchase items outside of a Fix.

Investment in our Operations and Infrastructure

To grow our client base and enhance our offering, we will incur additional expenses. We intend to leverage our data science and deep understanding of our clients’ needs to inform investments in operations and infrastructure. We anticipate that our expenses will increase as we continue to hire additional personnel and further advance our technological and data science capabilities. Moreover, we intend to make capital investments in our inventory, fulfillment centers, and office space and logistics infrastructure as we launch new categories, expand internationally, and drive operating efficiencies. For example, in November 2020, we entered into an agreement to lease approximately 700,000 square feet of space to be used as a new fulfillment center in Salt Lake City, Utah, and in May 2021, we closed our South San Francisco fulfillment center, which was the smallest facility in our network. We expect to increase our spending on these investments in the future and cannot be certain that these efforts will grow our client base or be cost-effective. However, we believe these strategies will yield positive returns in the long term.

Merchandise Mix

We offer apparel, shoes, and accessories across categories, brands, product types, and price points. We currently serve our clients in the following categories: Women’s, Men’s, Kids, Petite, Maternity, and Plus. We carry a mix of third-party branded merchandise, including premium brands, and our own Exclusive Brands. We also offer a wide variety of product types, including denim, dresses, blouses, skirts, shoes, jewelry, and handbags. We sell merchandise across a broad range of price points and may further broaden our price point offerings in the future.

While changes in our merchandise mix have not caused significant fluctuations in our gross margin to date, categories, brands, product types, and price points do have a range of margin profiles. For example, our Exclusive Brands have generally contributed higher margins, shoes have generally contributed lower margins, and newer categories tend to initially have lower margins. Shifts in merchandise mix driven by client demand may result in fluctuations in our gross margin from period to period.

Components of Results of Operations

Revenue

We generate revenue from the sale of merchandise, either through our Fix or Freestyle offerings. With our Fix offering, we charge a nonrefundable upfront fee, referred to as a “styling fee,” that is credited towards any merchandise purchased. We offer Style Pass to provide select U.S. clients with an alternative to paying a styling fee per Fix. Style Pass clients pay a nonrefundable annual fee for unlimited styling that is credited towards merchandise purchases. We deduct discounts, sales tax, and estimated refunds to arrive at net revenue, which we refer to as revenue throughout this Annual Report. We also recognize revenue resulting from estimated breakage income on gift cards. We expect our revenue to increase in absolute dollars as we grow our business, although our revenue growth rate may slow in future periods.

Cost of Goods Sold

Cost of goods sold consists of the costs of merchandise, expenses for inbound freight and shipping to and from clients, inventory write-offs and changes in our inventory reserve, payment processing fees, and packaging materials costs, offset by the recoverable cost of merchandise estimated to be returned. We expect our cost of goods sold to fluctuate as a percentage of revenue primarily due to how we manage our inventory and merchandise mix. Our classification of cost of goods sold may vary from other companies in our industry and may not be comparable.

Selling, General, and Administrative Expenses

Selling, general, and administrative expenses consist primarily of compensation and benefits costs, including stock-based compensation expense, for our employees including our stylists, fulfillment center operations, data analytics, merchandising, engineering, marketing, client experience, and corporate personnel. Selling, general, and administrative expenses also include marketing and advertising costs, third-party logistics costs, facility costs for our fulfillment centers and offices, professional service fees, information technology costs, and depreciation and amortization expense. We expect our selling, general, and administrative expenses to increase in absolute dollars and to fluctuate as a percentage of revenue due to the anticipated growth of our business. Our classification of selling, general, and administrative expenses may vary from other companies in our industry and may not be comparable.

Interest Income

Interest income is generated from our cash, cash equivalents, and investments in available-for-sale securities.

Provision (Benefit) for Income Taxes

Our provision (benefit) for income taxes consists of an estimate of federal, state, and international income taxes based on enacted federal, state, and international tax rates, as adjusted for allowable credits, deductions, uncertain tax positions, and changes in the valuation of our net federal and state deferred tax assets.

Results of Operations

Comparison of the Fiscal Years Ended July 31, 2021, August 1, 2020, and August 3, 2019

The following table sets forth our results of operations for the periods indicated:

(in thousands)	For the Fiscal Year Ended ⁽¹⁾			2021 vs. 2020	2020 vs. 2019
	July 31, 2021	August 1, 2020	August 3, 2019	% Change	% Change
Revenue, net	\$ 2,101,258	\$ 1,711,733	\$ 1,577,558	22.8 %	8.5 %
Cost of goods sold	1,153,622	957,523	874,429	20.5 %	9.5 %
Gross profit	947,636	754,210	703,129	25.6 %	7.3 %
Selling, general, and administrative expenses	1,010,997	805,874	679,634	25.5 %	18.6 %
Operating income (loss)	(63,361)	(51,664)	23,495	22.6 %	(319.9)%
Interest (income) expense	(2,610)	(5,535)	(5,791)	(52.8)%	(4.4)%
Other (income) expense, net	366	1,593	(1,535)	(77.0)%	(203.8)%
Income (loss) before income taxes	(61,117)	(47,722)	30,821	28.1 %	(254.8)%
Provision (benefit) for income taxes	(52,241)	\$ 19,395	\$ (6,060)	(369.4)%	(420.0)%
Net income (loss)	\$ (8,876)	\$ (67,117)	\$ 36,881	(86.8)%	(282.0)%

⁽¹⁾Fiscal 2021 and 2020 included 52 weeks. Fiscal 2019 was a 53-week year.

The following table sets forth the components of our results of operations as a percentage of revenue:

	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Revenue, net	100.0 %	100.0 %	100.0 %
Cost of goods sold	54.9 %	55.9 %	55.4 %
Gross margin	45.1 %	44.1 %	44.6 %
Selling, general, and administrative expenses	48.1 %	47.1 %	43.1 %
Operating income (loss)	(3.0)%	(3.0)%	1.5 %
Interest (income) expense	(0.1)%	(0.3)%	(0.4)%
Other (income) expense, net	— %	0.1 %	(0.1)%
Income (loss) before income taxes	(2.9)%	(2.8)%	2.0 %
Provision (benefit) for income taxes	(2.5)%	1.1 %	(0.3)%
Net income (loss)	(0.4)%	(3.9)%	2.3 %

Revenue and Gross Margin

Revenue in the fiscal year ended July 31, 2021 increased by \$389.5 million, or 22.8%, from revenue in the fiscal year ended August 1, 2020. The increase in revenue was primarily attributable to a 18.3% increase in active clients from August 1, 2020 to July 31, 2021, which drove increased sales of merchandise.

Gross margin for the fiscal year ended July 31, 2021, increased by 1.0% compared with the fiscal year ended August 1, 2020. The increase was primarily attributable to improved product margins as we strengthened partnerships with our vendors, lower packaging costs, and improved inventory reserves year over year. The increase in gross margin was partially offset by increased shipping expenses largely due to higher rates with our carriers.

Selling, General, and Administrative Expenses

Selling, general, and administrative expenses in the fiscal year ended July 31, 2021, increased by \$205.1 million, compared with the fiscal year ended August 1, 2020. As a percentage of revenue, selling, general, and administrative expenses increased to 48.1% for the fiscal year ended July 31, 2021, compared with 47.1% for the fiscal year ended August 1, 2020. The increase was primarily related to higher compensation and benefits expense including an increase in hourly wages for our full-time U.S. warehouse associates. Our average full-time hourly wage for our U.S. warehouse employees is over \$17 per hour and all full-time U.S. warehouse employees start with a minimum of \$16 per hour.

Provision for Income Taxes

The following table summarizes our effective tax rate for the periods presented:

(in thousands)	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Income (loss) before income taxes	\$ (61,117)	\$ (47,722)	\$ 30,821
Provision (benefit) for income taxes	(52,241)	19,395	(6,060)
Effective tax rate	85.5 %	(40.6)%	(19.7)%

We are subject to income taxes in the United States and the UK. Our effective tax rate and provision for income taxes increased from the fiscal year ended August 1, 2020, to the fiscal year ended July 31, 2021, primarily due to the net operating loss carryback provisions of the CARES Act and excess tax benefits from stock-based compensation, partially offset by the change in valuation allowance and certain nondeductible expenses.

Liquidity and Capital Resources

Sources of Liquidity

Our principal sources of liquidity since inception have been our cash flows from operations, as well as the net proceeds we received through private sales of equity securities and our IPO.

As of July 31, 2021, we had \$129.8 million of cash and cash equivalents and \$160.6 million of investments. Our investment balance includes \$101.5 million of short-term investments with contractual maturities of 12 months or less as of July 31, 2021.

In June 2020, we entered into a \$90.0 million credit agreement (the “2020 Credit Agreement”) with Silicon Valley Bank and other lenders. On June 2, 2021, we entered into a \$100.0 million amended and restated credit agreement (the “Amended Credit Agreement”) with Silicon Valley Bank and other lenders, which replaced the 2020 Credit Agreement. The Amended Credit Agreement includes a letter of credit sub-facility of \$30.0 million and a swingline sub-facility of up to \$50.0 million. As of July 31, 2021, we did not have any borrowings outstanding under the Credit Agreement.

Our obligations under the Amended Credit Agreement and any hedging or cash management agreements entered into with any lender thereunder are secured by substantially all of our current and future property, rights, and assets, including, but not limited to, cash, goods, equipment, contractual rights, financial assets, and intangible assets. The Amended Credit Agreement contains covenants limiting the ability to, among other things, dispose of assets, undergo a change in control, merge or consolidate, make acquisitions, incur debt, incur liens, pay dividends, repurchase stock, and make investments, in each case subject to certain exceptions. The Amended Credit Agreement also contains financial covenants requiring us to maintain minimum free cash flow and an adjusted current ratio above specified levels, measured in each case at the end of each fiscal quarter. The Amended Credit Agreement contains events of default that include, among others, non-payment of principal, interest, or fees, breach of covenants, inaccuracy of representations and warranties, cross defaults to certain other indebtedness, bankruptcy and insolvency events, and material judgments.

For information on the terms of the Amended Credit Agreement, please see “Credit Agreement” in Note 7 of the Notes to Consolidated Financial Statements included in this Annual Report.

Uses of Cash

Our primary use of cash includes operating costs such as merchandise purchases, lease obligations, compensation and benefits, marketing, and other expenditures necessary to support our business growth.

We believe our existing cash, cash equivalents, investment balances, and the borrowing available under our Amended Credit Agreement, if needed, will be sufficient to meet our working capital and capital expenditure needs for at least the next 12 months.

Cash Flows

The following table summarizes our cash flows for the periods indicated (in thousands):

(in thousands)	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Net cash provided by (used in) operating activities	\$ (15,675)	\$ 42,877	\$ 78,594
Net cash provided by (used in) investing activities	39,093	(70,461)	(225,184)
Net cash provided by (used in) financing activities	(38,885)	(1,435)	6,945
Net increase (decrease) in cash, cash equivalents, and restricted cash	\$ (15,467)	\$ (29,019)	\$ (139,645)

Cash provided by operating activities

During the fiscal year ended July 31, 2021, cash used in operating activities was \$15.7 million, which consisted of a net loss of \$8.9 million, adjusted by non-cash charges of \$135.9 million and a change of \$142.7 million in our net operating assets and liabilities. The non-cash charges were largely driven by \$100.7 million of stock-based compensation expense, and \$29.9 million of depreciation, amortization, and accretion. The change in our net operating assets and liabilities was primarily due to an increase of \$96.1 million in our inventory balance due to increased inventory purchases to support growth and selection, and a change of \$31.7 million in income tax receivables primarily due to the net operating loss carryback provisions of the CARES Act.

During the fiscal year ended August 1, 2020, cash provided by operating activities was \$42.9 million, which consisted of a net loss of \$67.1 million, adjusted by non-cash charges of \$122.7 million and a change of \$12.7 million in our net operating assets and liabilities. The non-cash charges were largely driven by \$67.5 million of stock-based compensation expense, a \$43.2 million valuation allowance on our deferred tax assets, and \$22.6 million of depreciation, amortization, and accretion, partially offset by a \$20.3 million change in deferred tax expense. The change in our net operating assets and liabilities was primarily due to an increase of \$15.2 million in our inventory balance due to increased inventory purchases to support our growth and an increase of \$6.7 million in our prepaid expenses and other assets balance due to timing of payments made in the period. This activity was substantially offset by an increase of \$8.3 million in accrued expenses related to increased advertising activity during fiscal 2020 and expenses related to our California styling organization restructuring.

Cash used in investing activities

During the fiscal year ended July 31, 2021, cash provided by investing activities was \$39.1 million, primarily related to purchases, sales, and maturities of \$74.4 million in highly rated available-for-sale securities, partially offset by \$35.3 million in purchases of property and equipment.

During the fiscal year ended August 1, 2020, cash used in investing activities was \$70.5 million, primarily related to our net investment of \$40.3 million in highly rated available-for-sale securities and \$30.2 million purchases of property and equipment.

Cash provided by (used in) financing activities

During the fiscal year ended July 31, 2021, cash used in financing activities was \$38.9 million, which was primarily due to payments for tax withholding related to vesting of restricted stock units of \$64.3 million, partially offset by proceeds from the exercise of stock options of \$25.9 million.

During the fiscal year ended August 1, 2020, cash used in financing activities was \$1.4 million, which was primarily due to payments for tax withholding related to vesting of restricted stock units, substantially offset by proceeds from the exercise of stock options

Contractual Obligations and Other Commitments

Our most significant contractual obligations relate to purchase commitments on inventory and operating lease obligations on our fulfillment centers and corporate offices. As of July 31, 2021, we had \$397.5 million of enforceable and legally binding inventory purchase commitments predominantly due within one year. For information on our contractual obligations for operating leases, please see “Leases” in Note 4 of the Notes to Consolidated Financial Statements included in this Annual Report.

In November 2020, we entered into an agreement to lease approximately 700,000 square feet of space to be used as a fulfillment center in Salt Lake City, Utah. We expect to classify this lease as an operating lease, with a commencement date within the first quarter of fiscal 2022. The lease expires in 2031 and we expect to record fixed operating lease costs of approximately \$35.6 million over the life of the lease.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with GAAP. The preparation of our financial statements requires us to make assumptions and estimates about future events and apply judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures. We base our estimates on historical experience and other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates.

The critical accounting policies, estimates, and judgments that we believe to have the most significant impacts to our consolidated financial statements are described below.

Inventory

Inventory consists of finished goods, which are recorded at the lower of cost or net realizable value using the specific identification method. We establish a reserve for excess and slow-moving inventory we expect to write off based on historical trends. In addition, we estimate and accrue shrinkage as a percentage of inventory out to the client and damaged items at 100% of cost. Inventory shrinkage and damage estimates are made to reduce the inventory value for lost, stolen, or damaged items. If actual experience differs significantly from our estimates due to changes in client merchandise preferences, client demand, or economic conditions, our operating results could be adversely affected.

We have not made any material changes to our assumptions included in the calculations of the lower of cost or net realizable value reserves during the fiscal year ended July 31, 2021.

Stock-Based Compensation

We grant stock options and restricted stock units (RSUs) to our employees and members of our board of directors, and recognize stock-based compensation expense based on the fair value of such awards at grant date. We estimate the fair value of stock options using the Black-Scholes option-pricing model. This model requires us to use certain estimates and assumptions such as:

- Expected volatility of our common stock-based on the volatility of comparable publicly traded companies;
- Expected term of our stock options—as we do not have sufficient historical experience for determining the expected term of the stock option awards granted, we base our expected term on the simplified method, generally calculated as the mid-point between the vesting date and the end of the contractual term;
- Expected dividend yield—as we have not paid and do not anticipate paying dividends on our common stock, our expected dividend yield is 0%; and
- Risk-free interest rates-based on the U.S. Treasury zero coupon notes in effect at the grant date with maturities equal to the expected terms of the options granted.

We record stock-based compensation expense net of estimated forfeitures so that expense is recorded for only the stock options and RSUs that we expect to vest. We estimate forfeitures based on our historical forfeiture of stock options and RSUs adjusted to reflect future changes in facts and circumstances, if any. We will revise our estimated forfeiture rate if actual forfeitures differ from our initial estimates.

We will continue to use judgment in evaluating assumptions related to our stock-based compensation expense. As we continue to accumulate data related to our common stock, we may have refinements to our estimates and assumptions which could impact our future stock-based compensation expense. We have not made any material changes to our assumptions and estimates related to our stock-based compensation during the fiscal year ended July 31, 2021.

Income Taxes

We are subject to income taxes in the United States and the UK. We compute our provision for income taxes using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities and for tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that are expected to apply to taxable income for the years in which those tax assets and liabilities are expected to be realized or settled.

Deferred tax assets are evaluated for future realization and reduced by a valuation allowance to the amount that is more likely than not to be realized. We consider many factors when assessing the likelihood of future realization, including our recent cumulative loss, earnings expectations in earlier future years, unsettled economic disruption of the COVID-19 pandemic, and other relevant factors.

Significant judgment is required in determining our uncertain tax positions. We continuously review issues raised in connection with all ongoing examinations and open tax years to evaluate the adequacy of our tax liabilities. We evaluate uncertain tax positions under a two-step approach. The first step is to evaluate the uncertain tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained upon examination based on its technical merits. The second step is, for those positions that meet the recognition criteria, to measure the tax benefit as the largest amount that is more than 50% likely of being realized. We believe our recorded tax liabilities are adequate to cover all open tax years based on our assessment. This assessment relies on estimates and assumptions and involves significant judgments about future events. To the extent that our view as to the outcome of these matters changes, we will adjust income tax expense in the period in which such determination is made. We classify interest and penalties related to income taxes as income tax expense.

Revenue Recognition

While our revenue recognition does not involve significant judgment, it represents an important accounting policy. Revenue is recognized net of sales taxes, discounts, and estimated refunds. For a Fix, we generate revenue when clients purchase merchandise, at which point we apply the nonrefundable upfront styling fee against the price of merchandise purchased. If none of the items within the Fix are purchased, we recognize the nonrefundable upfront styling fee as revenue at that time. For Style Pass clients, we recognize revenue at the earlier of the time the annual Style Pass fee is applied against the price of merchandise purchased or the expiry of the annual period. For Freestyle transactions, we generate revenue when the item is shipped to the client. If a client would like to exchange an item, we recognize revenue at the time the exchanged item is shipped, which coincides with the transfer of control to the customer. Sales tax collected from clients is not considered revenue and is included in accrued liabilities until remitted to the taxing authorities. Discounts are recorded as a reduction to revenue when merchandise is purchased. We record a refund reserve based on our historical refund patterns. The impact of our refund reserve on our operating results may fluctuate based on changes in client refund activity over time.

We sell gift cards to clients and establish a liability based on the face value of such gift cards. The liability is relieved and we recognize revenue upon redemption by our clients. If a gift card is not used, we will recognize estimated gift card breakage revenue proportionately to customer usage of gift cards over the expected gift card usage period, subject to requirements to remit balances to governmental agencies.

We have not made any material changes to our revenue recognition accounting policies during the fiscal year ended July 31, 2021.

Recent Accounting Pronouncements

For recent accounting pronouncements, please see “Significant Accounting Policies” in Note 2 of the Notes to Consolidated Financial Statements included in this Annual Report.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Interest Rate Risk

We are primarily exposed to market risks through interest rate risk on our investments. As of July 31, 2021, we had \$160.6 million in highly rated investments accounted for as available-for-sale securities, which are presented on our balance sheet at their fair market value. These interest-earning instruments carry a degree of interest rate risk; however, a hypothetical 10% change in interest rates during any of the periods presented would not have had a material impact on our consolidated financial statements.

Foreign Currency Risk

As of July 31, 2021, our revenue was earned in U.S. dollars and British pound sterling. Our expansion into the UK exposes us to fluctuations in foreign currency exchange rates on our operating expenses. Fluctuations in foreign currency exchange rates may also result in transaction gains or losses on transactions in currencies other than the U.S. dollar or British pound sterling. For the fiscal year ended July 31, 2021, a hypothetical 10% increase or decrease in current exchange rates would not have had a material impact on our consolidated financial results.

Inflation Risk

We do not believe that inflation has had a material effect on our business, financial condition, or results of operations. Nonetheless, if our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition, and results of operations.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Stitch Fix, Inc.:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Stitch Fix, Inc. and subsidiaries (the "Company") as of July 31, 2021, and August 1, 2020, and the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the three years in the period ended July 31, 2021, and the related notes (collectively referred to as the "financial statements"). We also have audited the Company's internal control over financial reporting as of July 31, 2021, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of July 31, 2021 and August 1, 2020, and the results of its operations and its cash flows for each of the fiscal years ended July 31, 2021, August 1, 2020 and August 3, 2019, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of July 31, 2021, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

Change in Accounting Principle

As discussed in Note 2 to the financial statements, effective August 4, 2019, the Company adopted FASB ASU No. 2016-02, Leases ("ASC 842") using the modified retrospective approach.

Basis for Opinions

The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing separate opinions on the critical audit matter or on the accounts or disclosures to which it relates.

Inventory - Excess and Slow-Moving Inventory Reserves - Refer to Note 2 to the financial statements

Critical Audit Matter Description

The Company establishes an inventory reserve, which includes a reserve for excess and slow-moving inventory on hand that is expected to be written-off or otherwise disposed of at a future date. The Company's estimate of the appropriate amount of the excess and slow-moving inventory reserve utilizes certain inputs and involves judgment. Such inputs include data associated with historical trends, historical inventory write-off activity, and the on-hand inventory aging distribution. The calculation and analysis of historical trend data, historical write-off activity, and the application of this analysis to on-hand inventory involves complex calculations. The excess and slow-moving inventory reserve as of July 31, 2021, totaled \$27.1 million. Net inventory as of July 31, 2021, totaled \$212.3 million.

We identified the estimated inventory reserve for excess and slow-moving inventory as a critical audit matter given the estimation uncertainty which is impacted by a number of subjective factors including current and future customer merchandise preference, consumer spending trends, and economic conditions. This required a high degree of auditor judgment and an increased extent of effort when performing audit procedures to evaluate the methodology and the reasonableness of these subjective factors in combination with assumptions and inputs including historical inventory trends, historical inventory write-off activity, and the on-hand inventory aging distribution used to determine excess and slow-moving inventory.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the excess and slow-moving inventory reserve included the following, among others:

- We evaluated the appropriateness of specified inputs supporting management's estimate, including the age of on-hand inventory items, historical inventory trends, and historical write-off activity.
- We evaluated the appropriateness and consistency of management's methods and assumptions used in developing their estimate of the excess and slow-moving inventory reserve, which included consideration of write-off trends by merchandise category, on-hand inventory aging distribution and the impact of current and future customer merchandise preference, consumer spending trends and economic conditions.
- We developed an independent expectation of the excess and slow-moving inventory reserve using historical inventory activity and compared our independent expectation to the amount recorded in the financial statements.
- We compared actual write-off activity in the current year to the excess and slow-moving reserve estimated by the Company in the prior year to evaluate management's ability to accurately estimate the reserve.
- We looked for indications that the reserve for excess and slow-moving inventory may be understated by evaluating write-off activity of inventory subsequent to July 31, 2021.

STITCH FIX, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of Business

Stitch Fix, Inc. (“we,” “our,” “us,” or “the Company”) delivers personalization to our clients through the pairing of data science and human judgment. Currently, clients can engage with us in one of two ways that, combined, form an ecosystem of personalized experiences across styling, shopping and inspiration: (1) by receiving a personalized shipment of apparel informed by our algorithms and sent by a Stitch Fix stylist (a “Fix”); or (2) by purchasing directly from our website or mobile app based on a personalized assortment of outfit and item recommendations (“Freestyle”). Clients can choose to schedule automatic shipments or order a Fix on demand after they fill out a style profile on our website or mobile app. After receiving a Fix, our clients purchase the items they want to keep and return the other items, if any. Freestyle utilizes our algorithms to recommend a personalized assortment of outfit and item recommendations that will update throughout the day and will continue to evolve as we learn more about the client. We are incorporated in Delaware and have operations in the United States and the UK.

COVID-19 Update

There continues to be uncertainty around the COVID-19 pandemic as the Delta variant of COVID-19, which appears to be the most transmissible and contagious variant to date, has caused a surge in COVID-19 cases globally. The full impact of the COVID-19 crisis on our business will depend on factors such as the length of time of the pandemic; how federal, state and local governments are responding, especially in light of the recent surge in cases due to the Delta variant; vaccination rates among the population; the efficacy of the COVID-19 vaccines against the Delta variant and other variants as they emerge; the longer-term impact of the crisis on the economy and consumer behavior; and the effect on our clients, employees, vendors, and other partners. As a result of the COVID-19 pandemic, in the third quarter of fiscal 2020, we temporarily closed three of our fulfillment centers, operated at significantly reduced capacity for much of the third quarter of fiscal 2020 as a result of such temporary closures, and reduced our marketing in light of this reduced capacity. During the fourth quarter of fiscal 2020, our fulfillment centers returned to higher capacity levels. During fiscal 2021, we experienced smaller, intermittent interruptions at our fulfillment centers when we temporarily closed for part of a work day or for a full day to perform safety and cleaning procedures following an employee testing positive for COVID-19.

We believe our financial resources will allow us to manage the impact of COVID-19 on our business and operations. We believe our existing cash, cash equivalents, and short-term investment balances, and the borrowing available under our Amended Credit Agreement, if needed, will be sufficient to meet our working capital and capital expenditure needs for at least the next 12 months.

We also do not anticipate any impairments with respect to long-lived assets or short-term and long-term investments that would have a material impact on our financial statements.

Coronavirus Aid, Relief, and Economic Security Act

On March 27, 2020, the U.S. enacted the Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”), which among other things, permits net operating loss (“NOL”) carryovers and carrybacks to offset 100% of taxable income for tax years beginning before 2021 and allows NOLs incurred in 2018, 2019, and 2020 to be carried back to each of the five preceding taxable years to generate a refund of previously paid income taxes. We provided for an estimated effect of the CARES Act in our financial statements for the period ended July 31, 2021.

2. Significant Accounting Policies

Basis of Presentation

The consolidated financial statements and accompanying notes have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). The consolidated financial statements include the accounts of Stitch Fix, Inc. and our wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Our fiscal year is a 52-week or 53-week period ending on the Saturday closest to July 31. The fiscal years ended July 31, 2021 (“2021”) and August 3, 2019 (“2019”), consisted of 52 weeks. The fiscal year ended August 1, 2020 (“2020”) consisted of 53 weeks.

Reclassifications

Certain items in the prior year’s consolidated financial statements have been reclassified to conform to the current year presentation reflected. Specifically, the Company reclassified \$42.3 million previously included in “Deferred tax asset valuation allowance” into “Deferred income taxes and valuation allowance” on the Consolidated Statement of Cash Flow for the fiscal year ended August 1, 2020, to conform to the current year presentation.

Segment Information

We have one operating segment and one reportable segment as our chief operating decision maker, who is our Chief Executive Officer, reviews financial information on a consolidated basis for purposes of allocating resources and evaluating financial performance.

Use of Estimates

The preparation of our consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts in our consolidated financial statements and accompanying footnotes.

Significant estimates and assumptions are used for inventory, stock-based compensation expense, income taxes, and revenue recognition. Actual results could differ from those estimates and such differences may be material to our consolidated financial statements.

We have considered the impact of the COVID-19 pandemic on significant estimates and judgments used in applying accounting policies. While there is a greater degree of uncertainty in applying these judgments in light of this crisis, we believe reasonable estimates have been used in preparing the consolidated financial statements.

Cash and Cash Equivalents

Cash consists of bank deposits and amounts in transit from banks for client credit card and debit card transactions that will process in less than seven days. Cash equivalents consist of investments in short-term money market funds.

Short-Term and Long-Term Investments

Our short-term and long-term investments have been classified and accounted for as available-for-sale securities. We determine the appropriate classification of our investments at the time of purchase and reevaluate the classification at each balance sheet date. Available-for-sale securities with maturities of 12 months or less are classified as short-term and available-for-sale securities with maturities greater than 12 months are classified as long-term. Our available-for-sale securities are carried at fair value, with unrealized gains and losses, net of taxes, reported within accumulated other comprehensive income (loss) ("AOCI") in stockholders' equity. The cost of securities sold is based upon the specific identification method.

In the first quarter of fiscal 2021, we adopted Accounting Standards Update ("ASU") No. 2016-13, or "CECL," which changed the way we evaluate available-for-sale securities for impairment. We no longer evaluate available-for-sale debt securities under the "other than temporary" impairment model, but now use an expected credit loss model. For debt securities with an amortized cost basis in excess of estimated fair value, we determine what amount of that deficit, if any, is caused by expected credit losses. The portion of the deficit attributable to expected credit losses is recognized in other (income) expense, net on our consolidated statements of income. During the twelve months ended July 31, 2021, we did not record any expected credit losses on our available-for-sale debt securities.

We have elected to present accrued interest receivable separately from short-term and long-term investments on our consolidated balance sheets. Accrued interest receivable was \$1.0 million as of July 31, 2021, and was recorded in prepaid expenses and other current assets. We have also elected to exclude accrued interest receivable from the estimation of expected credit losses on our available-for-sale securities and reverse accrued interest receivable through interest income (expense) when amounts are determined to be uncollectible. We did not write off any accrued interest receivable during the twelve months ended July 31, 2021.

Foreign Currency

The functional currency of our international subsidiary is the local currency. For that subsidiary, we translate assets and liabilities to U.S. dollars using period-end exchange rates, and average monthly exchange rates for revenues, costs, and expenses. We record translation gains and losses in AOCI as a component of stockholders' equity. Net foreign exchange transaction gains and losses resulting from the conversion of the transaction currency to functional currency are recorded in other income, net in the consolidated statements of operations and comprehensive income.

Inventory, net

Inventory consists of finished goods which are recorded at the lower of cost or net realizable value using the specific identification method. The cost of inventory consists of merchandise costs and in-bound freight costs. We establish a reserve for excess and slow-moving inventory we expect to write off based on historical trends. In addition, we estimate and accrue shrinkage as a percentage of inventory out to the client and damaged items at 100% of cost. Inventory shrinkage and damage estimates are made to reduce the inventory value for lost, stolen, or damaged items.

Our total inventory reserves, which reduce inventory in our consolidated balance sheets, were \$43.4 million and \$34.4 million as of July 31, 2021, and August 1, 2020, respectively.

Property and Equipment, net

Property and equipment, net is recorded at cost less accumulated depreciation and amortization. Depreciation and amortization is recorded on a straight-line basis over the estimated useful lives of the respective assets. Repair and maintenance costs are expensed as incurred.

The estimated useful lives of our assets are as follows:

	Estimated useful life
Computer equipment and capitalized software	3 years
Office furniture and equipment	5 years
Buildings	25 years
Leasehold improvements	Shorter of lease term or estimated useful life

We capitalize eligible costs to develop our proprietary systems, website, and mobile app. Capitalization of such costs begins when the preliminary project stage is completed and it is probable that the project will be completed and the software will be used to perform the function intended. A subsequent addition, modification, or upgrade to internal-use software is capitalized to the extent that it enhances the software's functionality or extends its useful life. Costs related to design or maintenance are expensed as incurred.

Leases

Our leasing portfolio consists of operating leases, which include lease arrangements for our corporate offices, fulfillment centers, and, to a lesser extent, equipment. Operating leases with a term greater than one year are recorded on the consolidated balance sheets as operating lease right-of-use assets and operating lease liabilities at the commencement date. These balances are initially recorded at the present value of future minimum lease payments calculated using our incremental borrowing rate and expected lease term. Certain adjustments to our operating lease right-of-use assets may be required for items such as initial direct costs paid or incentives received.

Impairment of Long-Lived Assets

We review our long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of assets held and used is measured by comparison of the carrying amount of an asset to the future undiscounted cash flows expected to be generated from the use of the asset and its eventual disposition. If such assets are considered to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount exceeds the fair value of the impaired assets. Assets to be disposed of are reported at the lower of their carrying amount or fair value less cost to sell. We have not recorded an impairment of long-lived assets since inception.

Revenue Recognition

We generate revenue from the sale of merchandise in a Fix and from Freestyle purchases. Clients create an online account on our website or mobile app, complete a style profile, and order a Fix or merchandise to be delivered on a specified date.

Each Fix represents an offer made by us to the client to purchase merchandise. The client is charged a nonrefundable upfront styling fee before the Fix is shipped. As an alternative to the styling fee, we offer select clients the option to purchase a Style Pass. Style Pass clients pay a nonrefundable annual fee for unlimited Fixes that is credited towards merchandise purchases. If the offer to purchase merchandise is accepted, we charge the client the order amount for the accepted merchandise, net of the upfront styling fee or Style Pass annual fee. For each Fix, acceptance occurs when the client checks out the merchandise on our website or mobile app. We offer a discount to clients who purchase all of the items in the Fix.

We recognize revenue through the following steps: (1) identification of the contract, or contracts, with the customer; (2) identification of the performance obligations in the contract; (3) determination of the transaction price; (4) allocation of the transaction price to the performance obligations in the contract; and (5) recognition of revenue when, or as, we satisfy a performance obligation.

Both our styling fee and Style Pass arrangements consist of one performance obligation, which is the option to purchase merchandise. The upfront styling fee is not a performance obligation as the styling activity is not distinct within the context of the contract. Similarly, the right to receive multiple options under Style Pass does not provide the customer with material stand-alone value and therefore does not give rise to a separate performance obligation. Both the upfront styling fee and Style Pass annual fee are included in deferred revenue until the performance obligation is satisfied when the client exercises his or her option to purchase merchandise (i.e., upon checkout of a Fix) or when the option(s) to purchase merchandise expire(s).

Revenue is recognized when control of the promised goods is transferred to the client. For a Fix, control is transferred when the client accepts or rejects the offer to purchase merchandise. Upon acceptance by purchasing one or more items within the Fix at checkout, the total amount of the order, including the upfront styling fee, is recognized as revenue. If none of the items within the Fix are accepted at checkout, the upfront styling fee is recognized as revenue at that time. The Style Pass annual fee is recognized at the earlier of (i) the time at which a client accepts and applies the Style Pass fee to an offer to purchase merchandise or (ii) upon expiry of the annual period. Under Style Pass arrangements, if a client does not accept any items within the Fix, the annual fee will continue to be deferred until it is applied to a future purchase or upon expiry of the annual period. If a client would like to exchange an item, we recognize revenue at the time the exchanged item is shipped, which coincides with the transfer of control to the customer. For a Freestyle purchase, control is transferred upon shipment to the client.

We deduct discounts, sales tax, and estimated refunds to arrive at net revenue. Sales tax collected from clients is not considered revenue and is included in accrued liabilities until remitted to the taxing authorities. All shipping and handling costs are accounted for as fulfillment costs in cost of goods sold and as selling, general, and administrative expense (“SG&A”), respectively, and are therefore not evaluated as a separate performance obligation. Discounts are recorded as a reduction to revenue when the order is accepted. We record a refund reserve based on our historical refund patterns. Our refund reserve, which is included in accrued liabilities in the consolidated balance sheets, was \$11.7 million and \$5.0 million as of July 31, 2021, and August 1, 2020, respectively.

We have five types of contractual liabilities: (i) cash collections of upfront styling fees, which are included in deferred revenue and are recognized as revenue upon the earlier of application to a merchandise purchase or expiry of the offer, (ii) cash collections of Style Pass annual fees, which are included in deferred revenue and are recognized upon the earlier of application to a merchandise purchase or expiry of the Style Pass annual period, (iii) unredeemed gift cards, which are included in gift card liability and recognized as revenue upon usage or inclusion in gift card breakage estimates, (iv) referral credits, which are included in other current liabilities and are recognized as revenue when used, and (v) cash collections of Freestyle purchases, which are included in deferred revenue and are recognized as revenue upon shipment.

We sell gift cards to clients and establish a liability based upon the face value of such gift cards. We reduce the liability and recognize revenue upon usage of the gift card. If a gift card is not used, we will recognize estimated gift card breakage revenue proportionately to customer usage of gift cards over the expected gift card usage period, subject to requirements to remit balances to governmental agencies. All commissions paid to third parties upon issuance of gift cards are recognized in SG&A as incurred, as on average, gift cards are used within a one-year period. Similarly, referral credits that are considered incremental costs of obtaining a contract with a customer are recognized in SG&A when issued, as on average, referral credits are used within a one-year period.

We expect deferred revenue for upfront styling fees, Freestyle orders, and Style Pass annual fees to be recognized within one year. On average, gift card liability and other current liabilities are also recognized within one year.

The following table summarizes the balances of contractual liabilities included in other current liabilities, deferred revenue and gift card liability as of the dates indicated:

(in thousands)	July 31, 2021	August 1, 2020
Deferred revenue		
Upfront styling fees	\$ 11,989	\$ 9,119
Style Pass annual fees	3,474	2,711
Freestyle orders	2,691	\$ 1,229
Total deferred revenue	\$ 18,154	\$ 13,059
Gift card liability	\$ 9,903	\$ 8,590
Other current liabilities		
Referral credits	\$ 1,231	\$ 2,577

The following table summarizes revenue recognized during the twelve months ended July 31, 2021, that was previously included in deferred revenue, gift card liability, and other current liabilities at August 1, 2020:

(in thousands)	Revenue Recognized From Amounts Previously Included in Deferred Balances at August 1, 2020
Upfront styling fees	\$ 9,110
Style Pass annual fees	2,703
Freestyle orders	947
Gift card liability	2,876
Referral credits	1,906

Cost of Goods Sold

Cost of goods sold consists of the costs of merchandise, expenses for shipping to and from clients and inbound freight, inventory write-offs and changes in our inventory reserve, payment processing fees, and packaging materials costs, offset by the recoverable cost of merchandise estimated to be returned.

Selling, General, and Administrative Expenses

Selling, general, and administrative expenses consist primarily of compensation and benefits costs, including stock-based compensation expense, for our employees including our stylist, fulfillment center operations, data analytics, merchandising, engineering, client experience, marketing, and corporate personnel. Selling, general, and administrative expenses also include marketing and advertising, third-party logistics costs, facility costs for our fulfillment centers and offices, professional services fees, information technology, and depreciation and amortization.

Advertising Expenses

Costs associated with the production of advertising, such as writing, copy, printing, and other production costs are expensed as incurred. Costs associated with communicating advertising on television and radio are expensed the first time the advertisement is run. Online advertising costs are expensed as incurred. Advertising costs totaled \$174.7 million, \$167.8 million, and \$152.1 million for 2021, 2020, and 2019, respectively, and are included within selling, general, and administrative expenses in the consolidated statements of operations.

Marketing Programs

We have a client referral program under which we issue credits for future purchases to clients when the referral results in a new client who has ordered a Fix. We record a liability at the time of issuing the credit and reduce the liability upon application of the credit to a client's purchase. We also have an affiliate program under which we make cash payments to lifestyle or fashion bloggers or others who refer clients in high volumes. Amounts related to both of these programs are included within selling, general, and administrative expenses in the consolidated statements of operations.

Income Taxes

We account for income taxes using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities and for operating losses and tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which they are expected to be realized or settled.

Deferred tax assets are evaluated for future realization and reduced by a valuation allowance to the amount that is more likely than not to be realized. We consider many factors when assessing the likelihood of future realization, including our recent cumulative loss, earnings expectations in earlier future years, unsettled economic disruption of the COVID-19 pandemic, and other relevant factors.

We recognize tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the consolidated financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. We recognize interest and penalties related to unrecognized tax benefits, if any, as income tax expense.

Stock-Based Compensation Expense

We measure stock-based compensation expense associated with option awards made to employees and members of our board of directors based on the estimated fair values of the awards at grant date using the Black-Scholes option-pricing model. For options with service conditions only, stock-based compensation expense is recognized, net of forfeitures, over the requisite service period using the straight-line method such that an expense is only recognized for those awards that we expect to vest. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Comprehensive Income (Loss)

Comprehensive income (loss) represents all changes in stockholders' equity during a period from sources other than transactions with stockholders. For 2020 and 2019, comprehensive income (loss) includes the net income (loss) for the period, the gain (loss) due to foreign currency translation, and the change in unrealized gain (loss) on available-for-sale securities. Our net income (loss) was equal to our comprehensive income (loss) for 2018.

Concentration of Credit Risks

We are subject to concentrations of credit risk principally from cash and cash equivalents and investment securities. The majority of our cash is held by two financial institutions within the United States. Our cash balances held by these institutions may exceed federally insured limits. The associated risk of concentration for cash is mitigated by banking with credit-worthy institutions. The associated risk of concentration for cash equivalents and investments is mitigated by maintaining a diversified portfolio of highly rated instruments.

No client accounted for greater than 10% of total revenue, net for the twelve months ended 2021, 2020, and 2019, respectively.

Recently Adopted Accounting Pronouncements

In June 2016, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2016-13, *Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. The standard requires entities to use a financial instrument impairment model based on expected losses, known as the current expected credit loss model, rather than incurred losses. Under the new guidance, an entity recognizes an allowance for estimated credit losses upon recognition of the financial instrument. The new guidance also changes the impairment model for available-for-sale debt securities, requiring the use of an allowance to record estimated credit losses and subsequent recoveries. We adopted this standard in the first quarter of fiscal year 2021. The adoption of this standard did not have a material impact on our consolidated financial statements.

In August 2018, the FASB issued ASU No. 2018-15, *Intangibles—Goodwill and Other—Internal-use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Contract*. The amendment aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. We adopted this standard in the first quarter of fiscal year 2021. The adoption of this standard did not have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (“ASU 2016-02”), which requires lessees to record most leases on their balance sheets but recognize the expenses on their income statements in a manner similar to Accounting Standards Codification (“ASC”) 840. ASU 2016-02 states that a lessee would recognize a lease liability for the obligation to make lease payments and a right-of-use asset for the right to use the underlying asset for the lease term. Presentation of leases within the consolidated statements of operations and comprehensive income and consolidated statements of cash flow is generally consistent with prior periods presented under ASC 840. However, this standard resulted in a substantial increase in our long-term assets and liabilities on our consolidated balance sheet. We adopted this standard on August 4, 2019, on a modified retrospective basis through a cumulative-effect adjustment of zero to opening retained earnings. We also elected the package of practical expedients to leases that commenced before the effective date whereby we elected to not reassess the following:

- (i) whether any expired or existing contracts contain leases;
- (ii) the lease classification for any expired or existing leases; and
- (iii) initial direct costs for any existing leases.

Upon adoption of ASU 2016-02, we did not record right-of-use assets or lease liabilities for leases with an initial term of 12 months or less. Payments on those leases will be recognized on a straight-line basis through the consolidated statements of operations and comprehensive income over the lease term. We also elected to combine lease and non-lease components on new or modified leases after adoption. Upon adoption on August 4, 2019, we recorded \$133.0 million in right-of-use assets, net of \$25.7 million previously recorded as deferred rent on our consolidated balance sheets. We also recorded \$22.0 million in current operating lease liabilities and \$136.7 million in operating lease liabilities, net of current portion.

In June 2018, the FASB issued ASU No. 2018-07, *Compensation—Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting* (“ASU 2018-07”). Under ASU 2018-07, the accounting for awards issued to nonemployees will be similar to the accounting for employee awards. This includes allowing for the measurement of awards at the grant date and recognition of awards with performance conditions when those conditions are probable, both of which are earlier than under current guidance for nonemployee awards. We adopted this standard in the first quarter of fiscal year 2020. The standard did not have a material impact on our consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)* (“ASU 2014-09”), which amended the existing FASB Accounting Standards Codification. ASU 2014-09 establishes a principle for recognizing revenue upon the transfer of promised goods or services to customers, in an amount that reflects the expected consideration received in exchange for those goods or services and also provides guidance on the recognition of costs related to obtaining and fulfilling customer contracts. The new guidance may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of adoption (“modified retrospective method”).

We adopted the standard in the first quarter of 2019 under the modified retrospective approach. Under the new standard, we recognize estimated gift card breakage revenue proportionately to customer gift card usage over the expected gift card usage period rather than waiting until the likelihood of redemption becomes remote. Further, we recognize revenue related to exchanges upon shipment by us, rather than upon receipt by the customer. In the first quarter of 2019, the Company recorded a cumulative catch-up adjustment resulting in an increase to opening retained earnings, net of tax, of \$0.4 million, comprised of the impact of \$0.3 million from the change in revenue recognition related to gift cards and \$0.1 million from the recognition of exchanges upon shipment. The impact to net revenue for the fiscal year ended August 3, 2019, was an increase of \$1.4 million as a result of adopting the standard.

In October 2016, the FASB issued ASU No. 2016-16, *Income Taxes: Intra-Entity Transfers of Assets Other Than Inventory (Topic 740)*, which amends existing guidance on the recognition of current and deferred income tax impacts for intra-entity asset transfers other than inventory. We adopted the standard in the first quarter of 2019 under the modified retrospective approach. As a result, a cumulative adjustment of \$0.4 million, net of tax, was recorded to reduce opening retained earnings in connection with adoption of this standard.

Recently Issued Accounting Pronouncements

In December 2019, the FASB issued ASU No. 2019-12, *Income Taxes (Topic 740) – Simplifying the Accounting for Income Taxes*. This update amends and simplifies the accounting for income taxes by eliminating certain exceptions in existing guidance related to performing intraperiod tax allocation, calculating interim period taxes, and recognizing deferred taxes for investments. The update also provides new guidance to reduce complexity in certain areas. This standard is effective beginning in our first fiscal quarter of 2022 with early adoption permitted. We do not anticipate the adoption of this standard to have a material impact on our consolidated financial statements or related disclosures.

3. Fair Value Measurements

We disclose and recognize the fair value of our assets and liabilities using a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date. The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date;

Level 2: Inputs are observable, unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities; and

Level 3: Unobservable inputs that are significant to the measurement of the fair value of the assets or liabilities that are supported by little or no market data.

Our financial instruments consist of cash and cash equivalents, short-term and long-term investments, accounts payable, and accrued liabilities. At July 31, 2021, and August 1, 2020, the carrying values of cash and cash equivalents, accounts payable, and accrued liabilities approximated fair value due to their short-term maturities.

The following table sets forth the amortized cost, gross unrealized gains, gross unrealized losses and fair values of our short-term and long-term investments accounted for as available-for-sale securities as of July 31, 2021, and August 1, 2020:

(in thousands)	July 31, 2021				August 1, 2020			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Financial Assets:

Asset-backed securities	—	10,402	—	10,402	—	45,260	—	45,260
Corporate bonds	—	96,443	—	96,443	—	83,543	—	83,543
Total	<u>\$ 52,772</u>	<u>\$ 118,537</u>	<u>\$ —</u>	<u>\$ 171,309</u>	<u>\$ 70,244</u>	<u>\$ 170,284</u>	<u>\$ —</u>	<u>\$ 240,528</u>

There were no transfers of financial assets or liabilities into or out of Level 1, Level 2, or Level 3 for the fiscal years ended July 31, 2021, and August 1, 2020.

4. Leases

On August 4, 2019, we adopted ASU 2016-02. Upon adoption, we recognized operating lease right-of-use assets and operating lease liabilities of \$133.0 million and \$158.7 million, respectively. As part of this adoption, we elected to not record operating lease right-of-use assets or operating lease liabilities for leases with an initial term of 12 months or less. We also elected to combine lease and non-lease components on all new or modified leases into a single lease component.

Our leasing portfolio includes lease arrangements for our corporate offices, fulfillment centers, and, to a lesser extent, equipment. Such leases generally have original lease terms between five and eight years, and often include one or more options to renew. We include options to extend in the lease term if they are reasonably certain of being exercised. We do not currently consider our renewal options reasonably certain to be exercised. We do not have residual value guarantees associated with our leases.

The following table includes the components of our rent expense recorded in selling, general, and administrative expense:

(in thousands)	For the Fiscal Year Ended	
	July 31, 2021	August 1, 2020
Operating lease cost	\$ 31,231	\$ 29,232
Variable lease costs	6,236	6,061
Short-term lease costs	2,016	1,031
Sublease income	(876)	(1,657)
Total	\$ 38,607	\$ 34,667

Certain leases contain variable payments, which are expensed as incurred and not included in our operating lease right-of-use assets and operating lease liabilities. These amounts primarily include payments for maintenance, utilities, taxes, and insurance on our office and fulfillment center leases. Operating lease right-of-use assets and operating lease liabilities are recognized based on the present value of future minimum lease payments at lease commencement. Certain adjustments to our operating lease right-of-use assets may be required for items such as initial direct costs paid or incentives received. The Company calculates the present value of its leases using an estimated incremental borrowing rate, which requires judgment. Our incremental borrowing rate is determined for each lease using a peer group of companies with similar credit profiles, adjusted for the impact of collateralization and lease term.

The following is a schedule by year of the maturities of operating lease liabilities with original terms in excess of one year, as of July 31, 2021:

(in thousands)	July 31, 2021
2022	\$ 32,280
2023	30,202
2024	26,270
2025	23,681
2026	22,524
Thereafter	37,204
Total undiscounted future minimum lease payments	172,161
Less imputed interest	(24,836)
Total discounted future minimum lease payments	\$ 147,325

The weighted average remaining term for our leases as of July 31, 2021 and August 1, 2020 was 6.0 years and 6.7 years, respectively. The weighted average discount rate for our leases as of July 31, 2021 and August 1, 2020 was 4.9% and 4.8%, respectively.

Supplemental cash flow information related to our leases is as follows:

(in thousands)	For the Fiscal Year Ended	
	July 31, 2021	August 1, 2020
Cash paid for amounts included in the measurement of operating lease liabilities	\$ 33,061	\$ 28,922
Operating lease right-of-use assets obtained in exchange for operating lease liabilities	8,766	153,522

5. Property and Equipment, net

Property and equipment, net consisted of the following:

(in thousands)	July 31, 2021	August 1, 2020
Computer equipment	\$ 7,637	\$ 5,967
Office furniture and equipment	37,454	26,695
Leasehold improvements	44,118	37,570
Capitalized software	66,656	47,151
Construction in progress	9,254	5,973
Building and land	430	430
Total property and equipment	165,549	123,786
Less: accumulated depreciation and amortization	(78,590)	(53,417)
Property and equipment, net	\$ 86,959	\$ 70,369

Depreciation and amortization expense for 2021, 2020, and 2019 was \$27.6 million, \$22.6 million, and \$16.1 million, respectively.

6. Accrued Liabilities

Accrued liabilities consisted of the following:

(in thousands)	July 31, 2021	August 1, 2020
Compensation and related benefits	\$ 13,645	\$ 11,987
Advertising	12,649	14,979
Sales taxes	9,937	7,134
Shipping and freight	6,209	8,624
Accrued accounts payable	5,804	5,892
Inventory purchases	30,384	15,427
Sales refund reserve	11,704	5,023
Other	8,696	8,524
Total accrued liabilities	<u>\$ 99,028</u>	<u>\$ 77,590</u>

California Styling Organization

On June 1, 2020, we announced a restructuring plan to eliminate substantially all of our Styling team based in California. As a result of this restructuring, we recognized aggregate charges of \$4.8 million for termination benefits within selling, general, and administrative expenses during 2020. Cash payments of \$3.1 million and \$1.7 million occurred during 2021 and 2020, respectively, with no outstanding liability as of July 31, 2021. Other costs such as relocation assistance were expensed as incurred.

7. Credit Agreement

In June 2020, we entered into a credit agreement (the “2020 Credit Agreement”) with Silicon Valley Bank and other lenders, to provide a revolving line of credit of up to \$90.0 million, including a letter of credit sub-facility in the aggregate amount of \$20.0 million, and a swingline sub-facility in the aggregate amount of \$50.0 million.

On June 2, 2021, we entered into an amended and restated credit agreement (the “Amended Credit Agreement”) with Silicon Valley Bank and other lenders, to provide a revolving line of credit of up to \$100.0 million, including a letter of credit sub-facility in the aggregate amount of \$30.0 million, and a swingline sub-facility in the aggregate amount of \$50.0 million, to replace the 2020 Credit Agreement. We also have the option to request an incremental facility of up to an additional \$150.0 million from one or more of the lenders under the Amended Credit Agreement.

Under the terms of the Amended Credit Agreement, revolving loans may be either Eurodollar Loans or ABR Loans. Outstanding Eurodollar Loans incur interest at the Eurodollar Rate, which is defined in the Amended Credit Agreement as LIBOR (or any successor thereto), plus a margin of 2.25%. Outstanding ABR Loans incur interest at the highest of (a) the Prime Rate, as published by the Wall Street Journal, (b) the federal funds rate in effect for such day plus 0.50%, and (c) the Eurodollar Rate plus 1.00%, in each case plus a margin of 1.25%. We will be charged a commitment fee of 0.25% for committed but unused amounts. The revolving line of credit under the Amended Credit Agreement will terminate on May 31, 2024, unless the termination date is extended at the election of the lenders.

Our obligations under the Amended Credit Agreement and any hedging or cash management agreements entered into with any lender thereunder are secured by substantially all of our current and future property, rights, and assets, including, but not limited to, cash, goods, equipment, contractual rights, financial assets, and intangible assets. The Amended Credit Agreement contains covenants limiting the ability to, among other things, dispose of assets, undergo a change in control, merge or consolidate, make acquisitions, incur debt, incur liens, pay dividends, repurchase stock, and make investments, in each case subject to certain exceptions. The Amended Credit Agreement also contains financial covenants requiring us to maintain minimum free cash flow and an adjusted current ratio above specified levels, measured in each case at the end of each fiscal quarter. The Amended Credit Agreement contains events of default that include, among others, non-payment of principal, interest, or fees, breach of covenants, inaccuracy of representations and warranties, cross defaults to certain other indebtedness, bankruptcy and insolvency events, and material judgments.

As of July 31, 2021, we did not have any borrowings outstanding under the Amended Credit Agreement and we were in compliance with all financial covenants.

8. Commitments and Contingencies

Commitments

In November 2020, we entered into an agreement to lease approximately 700,000 square feet of space to be used as a fulfillment center in Salt Lake City, Utah. We expect to classify this lease as an operating lease, with a commencement date of early fiscal 2022. The lease expires in 2031 and we expect to record fixed operating lease costs of approximately \$35.6 million over the life of the lease.

Contingencies

We record a loss contingency when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. We also disclose material contingencies when we believe a loss is not probable but reasonably possible. Accounting for contingencies requires us to use judgment related to both the likelihood of a loss and the estimate of the amount or range of loss. Although we cannot predict with assurance the outcome of any litigation or tax matters, we do not believe there are currently any such actions that, if resolved unfavorably, would have a material impact on our operating results, financial position, and cash flows.

On October 11, 2018, October 26, 2018, November 16, 2018, and December 10, 2018, four putative class action lawsuits alleging violations of the federal securities laws were filed in the U.S. District Court for the Northern District of California, naming as defendants us and certain of our officers. The four lawsuits each make the same allegations of violations of the Securities Exchange Act of 1934, as amended, by us and our officers for allegedly making materially false and misleading statements regarding our active client growth and strategy with respect to television advertising between June 2018 and October 2018. The plaintiffs seek unspecified monetary damages and other relief. The four lawsuits have been consolidated and a lead plaintiff has been appointed. On September 18, 2019, the lead plaintiff in the consolidated class action lawsuits (the “Class Action”) filed a consolidated complaint for violation of the federal securities laws. On October 28, 2019, we and other defendants filed a motion to dismiss the consolidated complaint. The lead plaintiff filed an opposition to the motion to dismiss on December 9, 2019, and we and the other defendants filed our reply in support of our motion to dismiss on December 30, 2019. The court granted our motion to dismiss on September 30, 2020 but allowed the lead plaintiff to file an amended complaint. On November 6, 2020, the lead plaintiff filed an amended complaint. We filed a motion to dismiss the amended complaint on December 7, 2020. The lead plaintiff filed an opposition to the motion to dismiss on January 8, 2021, and we filed our reply in support of our motion to dismiss on January 22, 2021. The court has taken the motion under submission.

On December 12, 2018, a derivative action was filed against our directors in the same court, alleging the same violations of securities laws as alleged in the Class Action and breach of fiduciary duties. The derivative action has been stayed pending the outcome of the motion to dismiss in the Class Action pursuant to the parties’ stipulation. On December 12, 2019, a second derivative action was filed against our directors in the same court, alleging the same violations of securities laws and breach of fiduciary duties as the other derivative action. The second derivative action has also been stayed pending the outcome of the motion to dismiss in the Class Action pursuant to the parties’ stipulation. The two derivative actions have been related to each other and to the Class Action, and all the related cases are now proceeding before a single judge in the U.S. District Court for the Northern District of California.

Indemnifications

In the ordinary course of business, we may provide indemnifications of varying scope and terms to vendors, directors, officers, and other parties with respect to certain matters. We have not incurred any material costs as a result of such indemnifications and have not accrued any liabilities related to such obligations in our consolidated financial statements.

9. Accumulated Other Comprehensive Income (Loss)

The table below presents the changes in AOCI by component and the reclassifications out of AOCI:

(in thousands)	Changes in Accumulated Other Comprehensive Income (Loss)		
	Available-for-sale Securities	Foreign Currency Translation	Total
Balance at August 1, 2020	\$ 1,213	\$ 1,515	\$ 2,728
Other comprehensive income (loss) before reclassifications ⁽¹⁾	(1,358)	2,186	828
Amounts reclassified from AOCI	(145)	—	(145)
Net change in AOCI	(1,503)	2,186	683
Balance at July 31, 2021	\$ (290)	\$ 3,701	\$ 3,411

(in thousands)	Changes in Accumulated Other Comprehensive Income (Loss)		
	Available-for-sale Securities	Foreign Currency Translation	Total
Balance at August 3, 2019	\$ 391	\$ (578)	\$ (187)
Other comprehensive income (loss) before reclassifications ⁽¹⁾	882	2,093	2,975
Amounts reclassified from AOCI	(60)	—	(60)
Net change in AOCI	822	2,093	2,915
Balance at August 1, 2020	\$ 1,213	\$ 1,515	\$ 2,728

⁽¹⁾The associated income tax effects for gains / losses on available-for-sale securities for the twelve months ended July 31, 2021 and August 1, 2020 was \$430 and \$430, respectively. There was no change in income tax effect for gains/ losses on available-for-sale securities for the twelve months ended July 31, 2021, as we recorded a valuation allowance against these deferred tax balances beginning in fiscal 2021.

10. Stock-Based Compensation

2011 Equity Incentive Plan

In 2011, we adopted the 2011 Equity Incentive Plan (the “2011 Plan”). The 2011 Plan provided for the grant of stock-based awards to employees, directors, and nonemployees under terms and provisions established by the board of directors.

The 2011 Plan allowed for the grant of incentive stock options or nonqualified stock options as well as restricted stock units, restricted stock, and stock appreciation rights. Only incentive and nonqualified stock options were granted under the 2011 Plan. Employee stock option awards generally vest 25% on the first anniversary of the grant date with the remaining shares subject to the option vesting ratably over the next three years. Options generally expire after 10 years. Effective upon our initial public offering in 2017, the 2011 Plan was replaced by the 2017 Incentive Plan.

2017 Incentive Plan

In November 2017, our board of directors and stockholders adopted our 2017 Incentive Plan (the “2017 Plan”). The remaining shares available for issuance under our 2011 Plan became reserved for issuance under the 2017 Plan. Our 2017 Plan provides for the grant of Class A incentive stock options to employees, including employees of any parent or subsidiary, and for the grant of nonqualified stock options, stock appreciation rights, restricted stock (“RSU”) awards, restricted stock unit awards, performance stock awards, performance cash awards, and other forms of stock awards to employees, directors, and consultants, including employees and consultants of our subsidiaries. Employee stock option awards generally vest 25% on the first anniversary of the grant date with the remaining shares subject to the option vesting ratably over the next three years. Options generally expire after 10 years. RSU awards generally vest 25% on the first anniversary of the grant date with the remaining RSU awards vesting ratably over the next three years. The number of shares authorized for issuance under the 2017 Plan was 27,395,455 shares of Class A common stock as of July 31, 2021.

2019 Inducement Plan

In October 2019, our board of directors adopted our 2019 Inducement Plan (the “2019 Plan”). Our 2019 Plan provides for the grant of nonqualified stock options and restricted stock unit awards with respect to our Class A common stock to individuals who satisfy the standards for inducement grants under the relevant Nasdaq Stock Market rules. The number of shares authorized for issuance under the 2019 Plan was 4,750,000 shares of Class A common stock as of July 31, 2021.

Stock Options

Employee stock options generally vest 25% on the first anniversary of the grant date with the remaining vesting ratably over the next three years. Options generally expire after 10 years.

The following table summarizes the shares available for grant under the 2017 Plan:

	Shares Available for Grant
Balance – August 1, 2020	916,172
Authorized	5,187,757
Granted	(6,605,011)
Forfeited	4,668,798
Balance – July 31, 2021	<u>4,167,716</u>

Stock option activity under the 2011 Plan, 2017 Plan, and 2019 Plan is as follows:

	Options Outstanding			
	Number of Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life (in Years)	Aggregate Intrinsic Value (in thousands)
Balance – August 1, 2020	6,817,196	\$ 17.10	7.41	\$ 40,252
Granted	633,659	57.26		
Exercised	(2,067,751)	12.53		
Forfeited	(1,732,622)	19.63		
Balance – July 31, 2021	<u>3,650,482</u>	\$ 25.47	7.40	\$ 106,490
Options vested and exercisable - July 31, 2021	<u>1,817,354</u>	\$ 18.83	6.61	\$ 63,912
Options vested and expected to vest - July 31, 2021	<u>3,558,106</u>	\$ 25.44	7.38	\$ 103,883

The weighted-average grant date fair value of options granted during 2021, 2020, and 2019 was \$29.07, \$11.35, and \$11.60 per share, respectively. The total grant date fair value of options that vested during 2021, 2020, and 2019 was \$13.3 million, \$15.3 million, and \$13.1 million, respectively. The aggregate intrinsic value of options exercised during 2021, 2020, and 2019 was \$78.3 million, \$19.1 million, and \$49.1 million, respectively. The aggregate intrinsic value of options exercised is the difference between the fair value of the underlying common stock on the date of exercise and the exercise price for in-the-money stock options.

Restricted Stock Units

Employee restricted stock units are granted under the 2017 Plan and 2019 Plan, settle into Class A common stock, and generally vest 25% on the first anniversary of the grant date with the remaining vesting ratably over the next three years.

The following table summarizes the restricted stock unit (“RSU”) award activity under the 2017 Plan and 2019 Plan:

	<u>Unvested RSUs</u>	
	<u>Class A Common Stock</u>	<u>Weighted- Average Grant Date Fair Value</u>
Unvested at August 1, 2020	9,123,341	\$ 20.11
Granted	6,463,980	40.33
Vested	(2,132,298)	21.62
Forfeited	(3,190,098)	23.83
Unvested at July 31, 2021	<u>10,264,925</u>	<u>\$ 31.35</u>

Stock-Based Compensation Expense

Stock-based compensation expense for options and RSUs granted to employees was \$100.7 million, \$67.5 million, and \$35.2 million for 2021, 2020, and 2019, respectively. The income tax benefit related to stock-based compensation was \$25.6 million, \$17.2 million, and \$8.9 million for 2021, 2020, and 2019, respectively. Stock-based compensation expense is included in selling, general, and administrative expenses in our consolidated statements of operations.

As of July 31, 2021, the total unrecognized compensation expense related to unvested options and RSUs, net of estimated forfeitures, was \$298.5 million, which we expect to recognize over an estimated weighted average period of 2.4 years.

In determining the fair value of the stock-based awards, we use the Black-Scholes option-pricing model and assumptions discussed below. Each of these inputs is subjective and generally requires significant judgment.

Fair Value of Common Stock - As of July 31, 2021, the fair value of the shares of common stock underlying our stock options has been determined based on market prices. Prior to our IPO on November 16, 2017, the fair value of the shares of common stock underlying our stock options was determined by the board of directors. As there was no public market for our common stock, the board of directors determined the fair value of the common stock on the stock option grant date by considering a number of objective and subjective factors, including third-party valuations of our common stock, sales of our common stock, operating and financial performance, the lack of marketability of our common stock and general macroeconomic conditions.

Expected Term - The expected term represents the period that our stock options are expected to be outstanding and is determined using the simplified method (generally calculated as the mid-point between the vesting date and the end of the contractual term).

Expected Volatility - The expected volatility was estimated based on the average volatility for publicly traded companies that we considered comparable, over a period equal to the expected term of the stock option grants.

Risk-Free Interest Rate - The risk-free interest rate is based on the U.S. Treasury zero coupon notes in effect at the time of grant for periods corresponding with the expected term of the option.

Expected Dividend - We have not paid dividends on our common stock and do not anticipate paying dividends on our common stock; therefore, we use an expected dividend yield of zero.

The fair value of stock options granted to employees was estimated at the grant date using the Black-Scholes option-pricing model with the following assumptions:

	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Expected term (in years)	5.3 - 6.3	5.5 - 6.2	5.1 - 6.5
Volatility	55.5 - 55.9%	50.1 - 51.2%	41.7 - 52.2%
Risk free interest rate	0.3 - 1.1%	1.4 - 1.7%	2.3 - 3.0%
Dividend yield	— %	— %	— %

Early Exercise of Employee Options

We allow certain employees to exercise options granted under the 2011 Plan prior to vesting in exchange for shares of restricted common stock subject to a right of repurchase that lapses according to the original option vesting schedule. The proceeds from the exercise of options are recorded in other current liabilities and other long-term liabilities in our consolidated balance sheets at the time the options are exercised and reclassified to common stock and additional paid-in capital as our repurchase right lapses. Upon termination of employment, any unvested shares are subject to repurchase by us at the original purchase price.

We did not issue any shares upon exercise of unvested stock options during 2021, 2020, and 2019. As of July 31, 2021, and August 1, 2020, there were no shares of common stock subject to repurchase.

11. Income Taxes

The components of income (loss) before income taxes are as follows:

(in thousands)	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Income (loss) before income taxes			
United States	\$ (62,341)	\$ (48,302)	\$ 31,657
Foreign	1,224	580	(836)
Total	<u>\$ (61,117)</u>	<u>\$ (47,722)</u>	<u>\$ 30,821</u>

The components of the provision (benefit) for income tax expense are as follows:

(in thousands)	For the Fiscal Year Ended		
	July 31, 2021	August 1, 2020	August 3, 2019
Current:			
Federal	\$ (49,552)	\$ (5,528)	\$ (221)
State	(2,562)	1,768	2,431
Foreign	(191)	275	(67)
Total current	<u>(52,305)</u>	<u>(3,485)</u>	<u>2,143</u>
Deferred:			
Federal	—	17,367	(5,464)
State	—	5,773	(2,667)
Foreign	64	(260)	(72)
Total deferred	<u>64</u>	<u>22,880</u>	<u>(8,203)</u>
Provision (benefit) for income taxes	<u>\$ (52,241)</u>	<u>\$ 19,395</u>	<u>\$ (6,060)</u>

The reconciliation of our effective tax rate to the statutory federal rate is as follows:

(in thousands, except percentages)	For the Fiscal Year Ended					
	July 31, 2021		August 1, 2020		August 3, 2019	
Taxes at federal statutory rate	\$ (12,835)	21.0 %	\$ (10,022)	21.0 %	\$ 6,472	21.0 %
State taxes, net of federal effect	(2,417)	4.0 %	(4,868)	10.2 %	(1,068)	(3.5)%
Stock-based compensation	(34,314)	56.1 %	(2,047)	4.3 %	(7,114)	(23.1)%
CARES Act carryback benefit	(13,571)	22.2 %	(3,070)	6.4 %	—	0.0 %
Change in valuation allowance	21,789	(35.7)%	43,153	(90.4)%	—	0.0 %
R&D credits	(13,582)	22.2 %	(6,536)	13.7 %	(5,984)	(19.4)%
Uncertain tax positions	(40)	0.1 %	2,343	(4.9)%	2,030	6.6 %
Return to provision	783	(1.3)%	(777)	1.6 %	(1,821)	(5.9)%
Other	1,946	(3.1)%	1,219	(2.5)%	1,425	4.6 %
Effective tax rate	<u>\$ (52,241)</u>	<u>85.5 %</u>	<u>\$ 19,395</u>	<u>(40.6)%</u>	<u>\$ (6,060)</u>	<u>(19.7)%</u>

The components of net deferred tax assets are as follows:

(in thousands)	July 31, 2021	August 1, 2020	August 3, 2019
Deferred tax assets:			
Inventory reserve and UNICAP	\$ 23,007	\$ 17,015	\$ 11,696
Deferred rent	—	—	232
Accruals and reserves	5,997	4,632	6,623
Research and development credits	27,964	11,611	4,778
Stock-based compensation	17,062	11,717	6,195
Deferred revenue	276	435	713
Operating lease liability	35,969	39,380	—
Net operating losses	10,136	739	—
Other	1,105	349	302
Gross deferred tax assets	121,516	85,878	30,539
Less: valuation allowance	(77,604)	(43,153)	—
Deferred tax assets, net of valuation allowance	<u>43,912</u>	<u>42,725</u>	<u>30,539</u>
Deferred tax liabilities:			
Depreciation and amortization	(13,110)	(11,044)	(8,275)
Operating lease right-of-use assets	(28,607)	(31,267)	—
Other	(1,907)	(81)	(89)
Gross deferred tax liabilities	<u>(43,624)</u>	<u>(42,392)</u>	<u>(8,364)</u>
Net deferred tax assets, net of valuation allowance	<u>\$ 288</u>	<u>\$ 333</u>	<u>\$ 22,175</u>

Our effective tax rate and provision for income taxes increased from the fiscal year ended August 1, 2020, to the fiscal year ended July 31, 2021, primarily due to the net operating loss carryback provisions of the CARES Act and excess tax benefits from stock-based compensation, partially offset by the change in valuation allowance and certain nondeductible expenses.

Our effective tax rate and provision for income taxes increased from the fiscal year ended August 3, 2019, to the fiscal year ended August 1, 2020, primarily due to recording a valuation allowance on our net federal and state deferred tax assets and decreased excess tax benefits from stock-based compensation, partially offset by the net operating loss carryback provisions of the CARES Act.

The Company considers all undistributed earnings of foreign subsidiaries indefinitely reinvested outside the United States.

As of July 31, 2021 we had state net operating loss carryforwards of \$142.0 million which begin to expire in 2025. As of July 31, 2021 and August 1, 2020, we had federal research and development tax credit carryforwards of \$30.1 million and \$6.5 million which begin to expire in 2036 and 2040, respectively. As of July 31, 2021 and August 1, 2020, we had California research and development tax credit carryforwards of \$17.0 million and \$9.2 million, respectively, which are not subject to expiration. Utilization of the net operating loss carryforwards, tax credits and other tax attributes may be subject to various limitations due to the ownership change limitations provided by Internal Revenue Code (IRC) Section 382 and similar state provisions. The annual limitation may result in the expiration of net operating losses and credits before their utilization and our ability to offset future income with our tax attributes.

Uncertain Tax Positions

A reconciliation of our unrecognized tax benefits is as follows:

(in thousands)	July 31, 2021	August 1, 2020	August 3, 2019
Balance at the beginning of the year	\$ 16,693	\$ 10,995	\$ 5,503
Lapse of statute of limitations	(1,909)	(939)	(422)
Increase related to prior period tax positions	495	1,074	2,602
Decrease related to prior period tax positions	—	—	(183)
Increase related to current year tax positions	8,346	5,563	3,495
Balance at the end of the year	<u>\$ 23,625</u>	<u>\$ 16,693</u>	<u>\$ 10,995</u>

The amount of unrecognized tax benefits relating to our tax positions is subject to change based on future events including, but not limited to, the settlements of ongoing audits and/or the expiration of applicable statutes of limitations. Although the outcomes and timing of such events are highly uncertain, we anticipate that the balance of the liability for unrecognized tax benefits and related deferred tax assets will decrease by \$2.2 million during the next 12 months due to lapses of applicable statutes of limitation. Our liability for uncertain tax positions as of July 31, 2021, includes \$4.0 million related to amounts that would impact our current and future tax expense.

We recognize interest related to uncertain tax positions in our provision for income taxes. The Company files income tax returns in the U.S. federal and various state and local jurisdictions and in the UK. As of July 31, 2021, the fiscal year 2016 through 2020 tax returns are subject to potential examination in one or more jurisdictions. We are under examination by the New York State Department of Taxation for fiscal years 2016 through 2018 and Texas Franchise Tax Board for the fiscal years 2017 through 2019.

We regularly assess whether it is more likely than not that we will realize our deferred tax assets in each taxing jurisdiction in which we operate. We consider many factors when assessing the likelihood of future realization, including our recent cumulative loss, earnings expectations in earlier future years, unsettled economic disruption of the COVID-19 pandemic, and other relevant factors. We continue to record a full valuation allowance on our US and state net deferred tax assets due to cumulative historical losses. The valuation allowance primarily relates to federal and state deferred tax assets, including unrealized federal and state credit carryforwards and state net operating losses. The valuation allowance increased by \$34.5 million in the year ended July 31, 2021 and \$43.2 million in the year ended August 1, 2020.

A reconciliation of our valuation allowance is as follows:

(in thousands)	July 31, 2021	August 1, 2020
Beginning of year valuation allowance	\$ 43,153	\$ —
Valuation allowance charged / (credited) to expense	40,995	43,153
Valuation allowance charged / (credited) to other accounts	(6,544)	—
End of year valuation allowance	<u>\$ 77,604</u>	<u>\$ 43,153</u>

12. Earnings (Loss) Per Share Attributable to Common Stockholders

Basic and diluted net income (loss) per share attributable to common stockholders is presented in conformity with the two-class method required for participating securities. We consider early exercised share options to be participating securities. In connection with our IPO, we established two classes of authorized common stock: Class A common stock and Class B common stock. As a result, all then-outstanding shares of common stock were converted into shares of Class B common stock upon effectiveness of our IPO. The rights of the holders of Class A and Class B common stock are identical, except with respect to voting, conversion, and transfer rights. Each share of Class A common stock is entitled to one vote per share and each share of Class B common stock is entitled to ten votes per share. Each share of Class B common stock is convertible at any time at the option of the stockholder into one share of Class A common stock.

Undistributed earnings allocated to participating securities are subtracted from net income (loss) in determining net income (loss) attributable to common stockholders. Basic earnings per share (“EPS”) attributable to common stockholders is computed by dividing the net income (loss) attributable to common stockholders by the weighted-average number of common shares outstanding during the period. All participating securities are excluded from basic weighted-average common shares outstanding.

For the calculation of diluted earnings (loss) per share, net income (loss) attributable to common stockholders for basic EPS is adjusted by the effect of dilutive securities. Diluted net income (loss) per share attributable to common stockholders is computed by dividing the net income (loss) attributable to common stockholders by the weighted-average number of common shares outstanding, including all potentially dilutive common shares. The undistributed earnings are allocated based on the contractual participation rights of the Class A and Class B common shares as if the earnings for the year have been distributed. As the liquidation and dividend rights are identical, the undistributed earnings are allocated on a proportionate basis. The computation of the diluted net income (loss) per share of Class A common stock assumes the conversion of Class B common stock, while diluted net income (loss) per share of Class B common stock does not assume the conversion of Class A common stock as Class A common stock is not convertible into Class B common stock.

A reconciliation of the numerator and denominator used in the calculation of the basic and diluted EPS attributable to common stockholders is as follows (in thousands except share and per share amounts):

(in thousands except share and per share amounts)	July 31, 2021		August 1, 2020		August 3, 2019	
	Class A	Class B	Class A	Class B	Class A	Class B
Numerator:						
Net income (loss)	(5,557)	(3,319)	(36,860)	(30,257)	16,604	20,277
Less: noncumulative dividends to preferred stockholders	—	—	—	—	—	—
Less: undistributed earnings to participating securities	—	—	—	—	(8)	(10)
Net income (loss) attributable to common stockholders – basic	(5,557)	(3,319)	(36,860)	(30,257)	16,596	20,267
Add: adjustments to undistributed earnings to participating securities	—	—	—	—	1	—
Reallocation of undistributed earnings as a result of conversion of Class B common stock to Class A common stock	—	—	—	—	20,267	—
Reallocation of undistributed earnings to Class B common stock	—	—	—	—	—	302
Net income (loss) attributable to common stockholders – diluted	(5,557)	(3,319)	(36,860)	(30,257)	36,864	20,569
Denominator:						
Weighted-average shares of common stock – basic	66,351,916	39,623,487	56,228,429	46,154,853	45,027,352	54,986,110
Conversion of Class B common stock to Class A common stock outstanding	—	—	—	—	54,986,110	—
Effect of dilutive stock options and restricted stock units	—	—	—	—	3,640,164	2,849,737
Effect of potentially dilutive preferred stock warrants	—	—	—	—	—	—
Weighted-average shares of common stock – diluted	66,351,916	39,623,487	56,228,429	46,154,853	103,653,626	57,835,847
Earnings (loss) per share attributable to common stockholders:						
Basic	<u>\$ (0.08)</u>	<u>\$ (0.08)</u>	<u>\$ (0.66)</u>	<u>\$ (0.66)</u>	<u>\$ 0.37</u>	<u>\$ 0.37</u>
Diluted	<u>\$ (0.08)</u>	<u>\$ (0.08)</u>	<u>\$ (0.66)</u>	<u>\$ (0.66)</u>	<u>\$ 0.36</u>	<u>\$ 0.36</u>

The following common stock equivalents were excluded from the computation of diluted earnings (loss) per share for the periods presented because including them would have been antidilutive:

	July 31, 2021	August 1, 2020	August 3, 2019
Restricted stock units that settle into Class A common stock	10,264,925	7,965,447	2,914,630
Stock options to purchase Class A common stock	2,361,055	2,924,512	1,547,495
Stock options to purchase Class B common stock	1,289,427	3,540,414	969,179
Total	<u>13,915,407</u>	<u>14,430,373</u>	<u>5,431,304</u>

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)), as of the end of the period covered by this Annual Report.

Disclosure controls and procedures are designed to provide reasonable assurance that (i) the information required to be disclosed in the reports that we file or submit under the Exchange Act has been appropriately recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) such information is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. Based on the evaluation of our disclosure controls and procedures as of July 31, 2021, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of July 31, 2021.

Management's Report on Internal Control Over Financial Reporting

Management, including our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of our financial statements for external purposes in accordance with U.S. GAAP.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we have conducted an evaluation of the effectiveness of our internal control over financial reporting based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on evaluation under these criteria, management determined that our internal control over financial reporting was effective as of July 31, 2021.

Deloitte & Touche LLP, our independent registered public accounting firm, has audited the effectiveness of our internal control over financial reporting and, as part of the audit, has issued a report on the effectiveness of our internal control over financial reporting as of July 31, 2021, which is included in Part II, Item 8 of this Annual Report on Form 10-K.

Changes in Internal Control over Financial Reporting

There were no changes during the fiscal year ended July 31, 2021, in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. We have not experienced any material impact to our internal controls over financial reporting despite the fact that most of our employees are working remotely due to the COVID-19 pandemic. We are continually monitoring and assessing the impact of COVID-19 on our internal controls.

Inherent Limitations on Effectiveness of Controls

An effective internal control system, no matter how well designed, has inherent limitations, including the possibility of human error or overriding of controls, and therefore can provide only reasonable assurance with respect to reliable financial reporting. Because of its inherent limitations, our internal control over financial reporting may not prevent or detect all misstatements, including the possibility of human error, the circumvention or overriding of controls, or fraud. Effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Information required by this item regarding directors and director nominees, executive officers, the board of directors and its committees, certain corporate governance matters, and compliance with Section 16(a) of the Exchange Act is incorporated by reference to the information set forth under the captions “Proposal 1: Election of Directors,” “Executive Officers,” and “Delinquent Section 16(a) Reports” in the definitive proxy statement for our 2021 Annual Meeting of Stockholders (the “2021 Proxy Statement”).

We have adopted a written code of business conduct and ethics (“Code of Conduct”) that applies to all of our employees, officers and directors, including our principal executive officer, principal financial officer and principal accounting officer. The Code of Conduct is available on our corporate website at <https://investors.stitchfix.com> under “Documents” under the section entitled “Governance.” If we make any substantive amendments to our Code of Conduct or grant any of our directors or executive officers any waiver, including any implicit waiver, from a provision of our Code of Conduct, we will disclose the nature of the amendment or waiver on our website or in a Current Report on Form 8-K.

Item 11. Executive Compensation.

Information required by this item regarding executive compensation is incorporated by reference to the information set forth under the captions “Executive Compensation” and “Director Compensation” in our 2021 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information required by this item regarding security ownership of certain beneficial owners and management and securities authorized for issuance under our equity compensation plans is incorporated by reference to the information set forth under the captions “Security Ownership of Certain Beneficial Owners and Management” and “Executive Compensation—Equity Compensation Plan Information” in our 2021 Proxy Statement.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Information required by this item regarding certain relationships and related transactions and director independence is incorporated by reference to the information set forth under the captions “Transactions with Related Persons and Indemnification” and “Proposal 1: Election of Directors—Independence of the Board” in our 2021 Proxy Statement.

Item 14. Principal Accounting Fees and Services.

Information required by this item regarding principal accounting fees and services is incorporated by reference to the information set forth under the caption “Proposal 3: Ratification of Selection of Independent Registered Public Accounting Firm” in our 2021 Proxy Statement.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) The following documents are filed as part of this Annual Report:

- (1) The financial statements are filed as part of this Annual Report under “Item 8. Financial Statements and Supplementary Data.”
- (2) The financial statement schedules are omitted because they are either not applicable or the information required is presented in the financial statements and notes thereto under “Item 8. Financial Statements and Supplementary Data.”
- (3) The exhibits listed in the following Exhibit Index are filed, furnished, or incorporated by reference as part of this Annual Report.
